ALFRED RUSSELL. WALLACE

Malay Archipelago The Land Of The Orang:

The Malay Archipelago Alfred Russel Wallace, 1869 *The Malay Archipelago* Alfred Russel Wallace, 2022-05-17 In *The Malay Archipelago* Alfred Russel Wallace presents an engaging and meticulously detailed account of his explorations through the diverse islands of Southeast Asia. Written in a vivid and accessible style, Wallace's narrative combines his observations of natural history with profound reflections on evolution, showcasing the rich biodiversity of the region. This work is not only a travelogue but also a crucial contribution to the scientific discourse of the 19th century, where he laid the groundwork for biogeography and underscored the importance of geographical isolation in species development. Alfred Russel Wallace, a contemporary of Charles Darwin, was a pioneering naturalist and explorer whose travels in the Malay Archipelago profoundly influenced his ideas about evolution and natural selection. His extensive fieldwork, marked by a keen eye for detail, allowed him to collect thousands of specimens and establish connections between species and their environments. Wallace's unique perspective on the interconnectedness of life and the impact of ecological factors undoubtedly shaped the insights presented in this seminal work. *The Malay Archipelago* is essential reading for both enthusiasts of natural history and those seeking to understand the foundations of evolutionary biology. Wallace's passion for discovery and his eloquent prose invite readers to explore the complexities of nature alongside him, making this book a timeless treasure that resonates with the spirit of inquiry and adventure.

An intrepid explorer who earned his living by collecting bird skins, Wallace also cataloged the vast number of plant and animal species that inhabited this unique geographical area. In addition, he includes numerous observations on the people, their languages, and ways of living and social organization, as well as geological insights into the nature and activity of volcanoes and the destructive force

of nature Colorful personal anecdotes based on experiences during his travels also pepper the text First published in 1869 i The Malay Archipelago i provided some of the initial evidence of the modern theory of evolution Discursive captivating occasionally offensive but always wonderfully descriptive The Malay Archipelago remains one of the most extensive works of natural history ever compiled The Malay Archipelago: The Land of the Orang-utan and the Bird of Paradise; A Narrative of Travel with Studies of Man and Nature (Complete) Alfred Russel Wallace, 2020-09-28 From a look at a globe or a map of the Eastern hemisphere we shall perceive between Asia and Australia a number of large and small islands forming a connected group distinct from those great masses of land and having little connection with either of them Situated upon the Equator and bathed by the tepid water of the great tropical oceans this region enjoys a climate more uniformly hot and moist than almost any other part of the globe and teems with natural productions which are elsewhere unknown The richest of fruits and the most precious of spices are Indigenous here It produces the giant flowers of the Rafflesia the great green winged Ornithoptera princes among the butterfly tribes the man like Orangutan and the gorgeous Birds of Paradise It is inhabited by a peculiar and interesting race of mankind the Malay found nowhere beyond the limits of this insular tract which has hence been named the Malay Archipelago To the ordinary Englishman this is perhaps the least known part of the globe Our possessions in it are few and scanty scarcely any of our travellers go to explore it and in many collections of maps it is almost ignored being divided between Asia and the Pacific Islands It thus happens that few persons realize that as a whole it is comparable with the primary divisions of the globe and that some of its separate islands are larger than France or the Austrian Empire The traveller however soon acquires different ideas He sails for days or even weeks along the shores of one of these great islands often so great that its inhabitants believe it to be a vast continent He finds that voyages among these islands are commonly reckoned by weeks and months and that their several inhabitants are often as little known to each other as are the native races of the northern to those of the southern continent of America He soon comes to look upon this region as one apart from the rest of the world with its own races of men and its own aspects of nature with its own ideas feelings customs and modes of speech and with a climate vegetation and animated life altogether peculiar to itself From many points of view these islands form one compact geographical whole and as such they have always been treated by travellers and men of science but a more careful and detailed study of them under various aspects reveals the unexpected fact that they are divisible into two portions nearly equal in extent which differ widely in their natural products and really form two parts of the primary divisions of the earth I have been able to prove this in considerable detail by my observations on the natural history of the various parts of the Archipelago and as in the description of my travels and residence in the several islands I shall have to refer continually to this view and adduce facts in support of it I have thought it advisable to commence with a general sketch of the main features of the Malayan region as will render the facts hereafter brought forward more interesting and their bearing upon the general question more easily understood I proceed therefore to sketch

the limits and extent of the Archipelago and to point out the more striking features of its geology physical geography vegetation and animal life **The Malay Archipelago** Alfred Russel Wallace, 2013-11 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book The below data was compiled from various identification fields in the bibliographic record of this title This data is provided as an additional tool in helping to ensure edition identification The Malay Archipelago The Land Of The Orang utan And The Bird Of Paradise A Narrative Of Travel With Studies Of Man And Nature Alfred Russel Wallace Harper Malay Archipelago Natural history The Malay Archipelago the Land of the Orang-Utan and the Bird of Paradise: A Narrative of Travel, with Studies of Man and Nature; Wallace Alfred Russel, 2018-11-10 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

The Malay Archipelago Alfred Russel Wallace, 1869 Malay Archipelago Wallace Alfred Russel, 1901 **The Malay Archipelago, Volume 1 : the Land of the Orang-Utan and the Bird of Paradise; a Narrative of Travel, with Studies of Man and Nature** Alfred Russel Wallace, 2016-02-20 Alfred Russel Wallace 8 January 1823 7 November 1913 was a British naturalist explorer geographer anthropologist and biologist He is best known for independently conceiving the theory of evolution through natural selection his paper on the subject was jointly published with some of Charles Darwin's writings in 1858 **The Malay Archipelago, the Land of the Orang-Utan and the Bird of Paradise; a Narrative of Travel, with Studies of Man and Nature - Volume 2** Alfred Russel Wallace, 2018-07-07 The Malay Archipelago the land of the orang utan and the bird of paradise a narrative of travel with studies of man and nature Volume 2 by Alfred Russel Wallace ON the morning of the 8th of January 1858 I arrived at Ternate the fourth of a row of fine conical volcanic islands which skirt the west coast of the large and almost unknown island of Gilolo The largest and most perfectly conical mountain is Tidore which is over four thousand Feet high Ternate being very nearly the same height but with a more rounded and irregular summit The town of Ternate is concealed from view till we enter between the two islands when it is discovered stretching along the

shore at the very base of the mountain Its situation is fine and there are grand views on every side Close opposite is the rugged promontory and beautiful volcanic cone of Tidore to the east is the long mountainous coast of Gilolo terminated towards the north by a group of three lofty volcanic peaks while immediately behind the town rises the huge mountain sloping easily at first and covered with thick groves of fruit trees but soon becoming steeper and furrowed with deep gullies Almost to the summit whence issue perpetually faint wreaths of smoke it is clothed with vegetation and looks calm and beautiful although beneath are hidden fires which occasionally burst forth in lava streams but more frequently make their existence known by the earthquakes which have many times devastated the town We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience **Malay Archipelago**
