Gerontological Society, 1966 **Reflections on Old Age** Cornelius F. Murphy Jr., 2015-04-07 The English writer E M Forster described old age as a seductive combination of increased wisdom and decaying powers to which too little intelligence is devoted This book is a response to that criticism It explains how old age has been considered throughout the ages by philosophers poets and other literary figures and explores how the extraordinary increase of life expectancy that began in the last century has been sustained by science and medicine Unfortunately the general public still prefers to keep the elderly out of sight and especially out of mind To overcome this marginalization I call for the emergence of a more inclusive

humanism one that is welcoming to persons of all ages To overcome the pervasive isolation of the elderly requires a new dialogue across all the living generations Echoing the sentiments of Cicero in his classic study of old age I also call for a reflective maturity to develop among the elderly one that reaches deeply into themselves and increases their understanding of the world around them Spiritual maturity demands growth in virtue and charity in the advance of years A reaching out to all in the pursuit of justice and the common good is strongly recommended The book concludes with some reflections upon hopes for personal immortality as well as the qualities of divine justice and mercy

The Role of the Church in Aging: Implications for policy and action Michael C. Hendrickson, 1985 This informative volume examines the multidimensional nature of aging identifies key issues involved in meeting the needs of the growing numbers of older adults and suggests effective methods of mobilizing resources to better meet the needs of the aging population [Catalog of Copyright Entries, Third Series](#) Library of Congress. The Fountain of Youth Stephen G. Post, Robert H. Binstock, 2004-04-08 A wide variety of ambitions and measures to slow stop and reverse phenomena associated with aging have been part of human culture since early civilization From alchemy to cell injections to dietary supplements the list of techniques aimed at altering the processes of aging continues to expand Charlatans quacks and entrepreneurs proffering anti aging products and practices have always exploited uniformed customers and instilled doubt and apprehension toward practices intended to extend life Recently however the pursuit of longevity has developed into a respectable scientific activity Many biologists are substantially funded by the government and the private sector to conduct research that they believe will lead to effective anti aging interventions While many embrace this quest for prolongevity extended youth and long life others fear its consequences If effective anti aging interventions were achieved they would likely bring about profound alterations in the experiences of individual and collective life What if aging could be decelerated to the extent that both average life expectancy and maximum life span would increase by forty percent What if all humans could live to be centenarians free of the chronic diseases and disabilities now commonly associated with old age What if modern scientists could find the modern equivalent to the Fountain of Youth that Ponce de Leon sought This book addresses these questions by exploring the ramifications of possible anti aging interventions on both individual and collective life Through a series of essays it examines the biomedical goal of prolongevity from cultural scientific religious and ethical perspectives offering a sweeping view into the future of aging
