Mathematical Morphology and Its Applications to Image Processing Jean Serra, Pierre Soille, 2012-12-06
Mathematical morphology MM is a theory for the analysis of spatial structures It is called morphology since it aims at analysing the shape and form of objects and it is mathematical in the sense that the analysis is based on set theory topology lattice algebra random functions etc MM is not only a theory but also a powerful image analysis technique The purpose of the present book is to provide the image analysis community with a snapshot of current theoretical and applied developments of MM The book consists of forty five contributions classified by subject It demonstrates a wide range of topics suited to the morphological approach *Mathematical Morphology and Its Applications to Image and Signal Processing* Petros Maragos, Ronald W. Schafer, Muhammad Akmal Butt, 1996-05-31 Mathematical morphology MM is a powerful methodology for the quantitative analysis of geometrical structures It consists of a broad and coherent collection of theoretical concepts nonlinear signal operators and algorithms aiming at extracting from images or other geometrical objects information related to their shape and size Its mathematical origins stem from set theory lattice algebra and integral and stochastic geometry MM was initiated in the late 1960s by G Matheron and J Serra at the Fontainebleau School of Mines in France Originally it was applied to analyzing images from geological or biological specimens However its rich theoretical framework algorithmic efficiency easy implementability on special hardware and suitability for many shape oriented problems have propelled its widespread diffusion and adoption by many academic and industry groups in many countries as one among the dominant image analysis methodologies The purpose of *Mathematical Morphology and its Applications to Image and Signal Processing* is to provide the image analysis community with a sampling from the current developments in the theoretical deterministic and stochastic and computational aspects of MM and its applications to image and signal processing The book consists of the papers presented at the ISMM 96 grouped into the following themes Theory Connectivity Filtering Nonlinear System Related to Morphology Algorithms Architectures Granulometries Texture Segmentation Image Sequence Analysis Learning Document Analysis Applications *Mathematical Morphology and Its Applications to Image and Signal Processing* Pierre Soille, Martino Pesaresi, Georgios Ouzounis, 2011-06-29 This book contains the refereed proceedings of the 10th International Symposium on Mathematical Morphology ISMM 2011 held in Verbania Intra Italy in July 2011 It is a collection of 39 revised full papers from which 27 were selected for oral and 12 for poster presentation from a total of 49 submissions Moreover the book features two invited contributions in the fields of remote sensing image analysis and scientific visualization The papers are organized in thematic sections on theory lattices and order connectivity image analysis processing and segmentation adaptive morphology algorithms remote sensing visualization and applications *Mathematical Morphology and Its Applications to Image and Signal Processing* Aldo Morales, 1990 *Mathematical Morphology and Its Applications to Signal and Image Processing* Instituto Nacional de Pesquisas Espaciais (Brazil), Brazil. Computer Vision and Graphics K. Wojciechowski, B. Smolka, H. Palus, R.S. Kozera, W. Skarbek, L. Noakes, 2006-03-11. As the speed capabilities and economic advantages of modern digital devices continue to grow the need for efficient information processing especially in computer vision and graphics dramatically increases. Growth in these fields stimulated by emerging applications has been both in concepts and techniques. New ideas concepts and techniques are developed presented discussed and evaluated subsequently expanded or abandoned. Such processes take place in different forms in various fields of the computer science and technology. The objectives of the ICCVG are presentation of current research topics and discussions leading to the integration of the community engaged in machine vision and computer graphics carrying out and supporting research in the field and finally promotion of new applications. The ICCVG is a continuation of the former International Conference on Computer Graphics and Image Processing called GKPO held in Poland every second year in May since 1990 organized by the Institute of Computer Science of the Polish Academy of Sciences Warsaw and chaired by the Editor of the International Journal of Machine Graphics and Vision Prof Wojciech S. Mokrzycki.
