Education in a Research University Kenneth Joseph Arrow, 1996 The research university is one of the most characteristic and important institutions of our time It is an extremely complex entity seeking to achieve a variety of aims and responding to a multiplicity of pressures Its principal obligation is to educate students and to prepare them to live in and contribute to society To serve this function knowledge must be collected organized and disseminated but perhaps even more important new knowledge must be created The knowledge so developed and imparted must ultimately be carried out into society largely through former students but also by other means The present volume is a collection of 30 essays on the character administration and management of research universities with special emphasis on the perspective of statistics and operations research It thus concentrates on issues of systematic planning planning models teaching approaches and management associated with the aims and methods of operations research although it also deals with more general concerns about the management of universities and university resources and with some of the applications of operations research and statistical tools that have moved outside university settings

Dynamic Fleet Management Vasileios S. Zeimpekis, Christos D. Tarantilis, George M. Giaglis, Ioannis E. Minis, 2007-10-05 Dynamic Fleet Management will focus on real time management of a distribution system This means that when a dynamic event occurs within the distribution chain action must be taken in real time The book will integrate the latest results in system design algorithm development and system implementation to capture the state of the art research and application trends While much of the research in this area of transportation problems have almost exclusively concentrated on carrying out static plans on optional distribution conditions this book will examine those problems when some dynamic or unplanned even occurs within the transport or network system It will focus specifically on these cases and integrate the latest results in systems routing algorithms and case studies where information a dynamic event is revealed to the decision maker in a real time manner
