Scientific Journals: Issues in Library Selection and Management Tony Stankus, 2019-12-06 This book first published in 1987 brings together from a variety of sources analysis on the major issues involved in the collection of scientific journals Working from the premise that scientists tend to know much more about their subject than about their journals it examines the rationale for journal choices journals and tenure journals and budgeting and the elements of a good journal It shows librarians how to penetrate the internal structure of some imposing technical literatures in a way that can help them make responsible collection management decisions that even their science clientele will respect

Walford's Guide to Reference

Material: Science & technology Albert John Walford, Anthony P. Harvey, H. Drubba, 1980 **Guides to Library Collection Development** John Thomas Gillespie, Ralph J. Folcarelli, 1994-08-15 Intended to enhance collection development in school public and college libraries this volume lists and annotates approximately 1 500 significant bibliographies published from 1985 through 1993 with some earlier but still useful publications Annotations indicate scope of the work size often the number of entries kinds of material included purpose arrangement nature of entries indexes special features and a recommendation Author title and subject indexes provide easy access to the entries With its deep and comprehensive coverage this work will help not only in the process of selecting and acquiring materials for the library but also in the process of identification of items for reference readers advisory interlibrary loan and collection evaluation **Walford's Guide to Reference Material** Albert John Walford, Anthony P. Library Literature H.W. Wilson Company, 1934 An index to library and information science The Commonsense Guide to Writing the Research Paper Pamela West, S. Leonard Rubinstein, 1986 **The Best Books for Academic Libraries: General works, military & naval, library science**, 2002 *New Technical Books* New York Public Library, 1993 **Brief Tests of Collection Strength** Howard D. White, 1995-09-26 For purposes of accreditation resource sharing and institutional mission librarians need to assess the strengths of their collections in particular subject areas This book describes and illustrates a brief test for determining a library's collection strength Though such tests are most often employed in academic libraries the methodology outlined by the author should be useful to all types of libraries in assessing the strength of their holdings In a time of increasing material and limited resources libraries need to be particularly judicious in deciding which works to acquire Oftentimes a library seeks to develop strong holdings in one or more subject areas Such an approach is especially useful for libraries that share their resources with other institutions To plan their acquisitions carefully and to be of greatest use to other consortia members a library needs to gauge the strength of its holdings accurately This volume describes and illustrates a relatively brief test to assign libraries a score for existing collection strength in a subject area Drawing upon expert human judgment and holdings data available from OCLC the test can assist librarians in setting and verifying collection levels on the RLG or WLN Conspectus scales Collection strength is often verified in a labor intensive fashion The brief test presented by the author is an economical alternative to the more typical labor intensive approach to collection analysis *Library Literature*, 1993 Current Information Sources in Mathematics Elie M.
