**Mathematical Papers of the Late George Green** N. M. Ferrers, 2017-10-19 Excerpt from Mathematical Papers of the Late George Green Fellow of Gonville and Caius College Cambridge On the Reflection and Refraction of Light at the common surface of two non crystallized media These two papers should be studied together The question discussed in the first is in fact that of the propagation of normal vibrations through a fluid Particular attention should be paid to the mode in which from the differential equations of motion is deduced explanation of a phenomenon analogous to that known in Optics as Total internal reflection when the angle of incidence exceeds the critical angle By supposing that there are propagated in the second medium vibrations which rapidly diminish in intensity and become evanescent at sensible distances the change of phase which accompanies this phenomenon is clearly brought into View About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**Scientific Papers of George Green Volume 1** George Green, 2005-10 *George Green: Mathematician and Physicist, 1793-1841* D. M. Cannell, 2001-01-01 Mathematicians and lay people alike will enjoy this fascinating book that details the life of George Green a pioneer in the application of mathematics to physical problems Green was a mathematical physicist who spent most of the first 40 years of his life working not as a physicist but as a miller in his father's grain mill Green received only four terms of formal schooling and at the age of nine he had surpassed his teachers Green studied mathematics in his spare time and in 1828 published his most famous work An Essay on the Application of Mathematical Analysis to the Theories of Electricity and Magnetism It was in this essay that the famous Green's Theorem and Green's functions first appeared Although this work was largely ignored during his lifetime it is now considered of major importance in modern physics
