Fulltext Sources Online, 2007 **Lives in Science** Joseph C. Hermanowicz, 2010-04-15 What can we learn when we follow people over the years and across the course of their professional lives Joseph C Hermanowicz asks this question specifically about scientists and answers it here by tracking fifty five physicists through different stages of their careers at a variety of universities across the country He explores these scientists shifting perceptions of their jobs to uncover the meanings they invest in their work when and where they find satisfaction how they succeed and fail and how the rhythms of their work change as they age His candid interviews with his subjects meanwhile shed light on the ways career

goals are and are not met on the frustrations of the academic profession and on how one deals with the boredom and stagnation that can set in once one is established. An in depth study of American higher education professionals eloquently told through their own words. Hermanowicz's keen analysis of how institutions shape careers will appeal to anyone interested in life in academia. **Literature 1980, Part 1** Siegfried Böhme, Ute Esser, Professor Dr. Walter Fricke, Inge

Heinrich, Wilfried Hofmann, Dietlinde Krahn, Dorothea Rosa, Dr. Lutz D. Schmadel, Gert Zech, 2013-11-11 *Astronomy and Astrophysics Abstracts* which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world. It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970. *Astronomy and Astrophysics Abstracts* aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. In 1980 some older Volume 27 contains literature published in 1980 and received before August. Literature which was received late and which is not recorded in earlier volumes is also included. We acknowledge with thanks contributions to this volume by Dr J Bouska Prague who surveyed journals and publications in Czech and supplied us with abstracts in English. **Literature 1980, Part 2** Siegfried Böhme, Professor Dr. Walter Fricke, Inge Heinrich, Wilfried

Hofmann, Dietlinde Krahn, Dorothea Rosa, Dr. Lutz D. Schmadel, Gert Zech, 2013-04-18 *The Stars Are Not Enough* Joseph C. Hermanowicz, 1998-10-15 Based on sixty interviews with physicists at universities across the United States *The Stars are Not Enough* offers a detailed and intimate account of the worlds in which scientists work. Joseph C Hermanowicz looks at a range of scientists from young graduate students to older professionals well into their careers. The result is a colorful portrait of a profession and its diverse cast of characters. These deeply personal narratives reveal dreams of fame and glory in which scientists confess their ambitions of becoming the next Newton or Einstein. However these scientists also discuss the meaning of success and failure. We hear their stories of aspiration and anxiety disappointment and tragedy hope and achievement we are privy to their doubts and to what they consider to be their limitations and weaknesses. As the scientists age in their professions the specter of failure often visits them and they have to accept something less than scientific immortality or even the Nobel Prize. Ultimately these stories give us more than an inside look at the details of careers in science they also examine ambition by uncovering the forces that drive people in their professions and by describing how these forces persist or fade over time. Ambition for greatness often ignites a career and often sustains it. Yet as Hermanowicz's study reveals greatness eludes nearly all people in their heroic quests for extraordinary achievement. *The Stars Are Not Enough* offers a fascinating account that will appeal to anyone interested in how people's dreams blossom and evolve.
