The History of Mathematical Tables Martin Campbell-Kelly,Mary Croarken,Raymond Flood,Eleanor Robson,2003-10-02 The oldest known mathematical table was found in the ancient Sumerian city of Shuruppag in southern Iraq Since then tables have been an important feature of mathematical activity table making and printed tabular matter are important precursors to modern computing and information processing This book contains a series of articles summarising the technical institutional and intellectual history of mathematical tables from earliest times until the late twentieth century It covers mathematical tables the most important computing aid for several hundred years until the 1960s data tables eg Census tables professional tables eg insurance tables and spreadsheets the most recent tabular innovation The book is presented in a scholarly yet accessible way making appropriate use of text boxes and illustrations Each chapter has a frontispiece featuring a table along with a small illustration of the source where the table was first displayed Most chapters have sidebars telling a short story or history relating to the chapter The aim of this edited volume is to capture the history of tables through eleven chapters written by subject specialists The contributors describe the various information processing techniques and artefacts whose unifying concept is the mathematical table *Mathematical Tables* James Mills Peirce,1895

Handbook of Mathematical Functions with Formulas, Graphs, and Mathematical Tables Milton Abramowitz,Irene A. Stegun,1968 **Mathematical Tables and Formulas** Percey Franklyn Smith,William Raymond Longley,1929 This collection of tables and formulas is intended primarily as a handbook for solving numerical problems in connection with the courses in mathematics of the freshman and sophomore years in colleges and technical schools It will also be useful to workers in fields requiring applications of calculus The numerical tables in this book are those which have been found by experience to be most useful in solving the problems which arise in connection with college courses in trigonometry analytic geometry calculus and mechanics The collection of formulas is intended to save time and relieve the burden on the memory without reducing problem work to mere substitution of numbers in equations Preface *A Guide to Mathematical Tables* N. M. Burunova,A. V. Lebedev,R. M. Fedorova,2014-05-09 A Guide to Mathematical Tables is a supplement to the Guide to Mathematical Tables published by the U S S R Academy of Sciences in 1956 The tables contain information on subjects such as powers rational and algebraic functions and trigonometric functions as well as logarithms and polynomials and Legendre functions An index listing all functions included in both the Guide and the Supplement is included Comprised of 15 chapters this supplement first describes mathematical tables in the following order the accuracy of the table that is the number of decimal places or significant figures the limits of variation of the argument and the interval of the table and the serial number of the book or journal in the reference material The second part gives the author title publishing house and date and place of publication for books and the name of the journal year of publication series volume and number page and author and title of the article cited for journals Topics range from exponential and hyperbolic functions

to factorials Euler integrals and related functions Sums and quantities related to finite differences are also tabulated This book will be of interest to mathematicians and mathematics students New Mathematical Tables Containing the Factors, Squares, Cubes, Square Roots, Cube Roots, Reciprocals, and Hyperbolic Logarithms Peter Barlow,1814 Mathematical Tables Consisting of Logarithms of Numbers 1 to 108000, Trigonometrical, Nautical and Other Tables James Pryde,1878

Daniells,1993 This is the reference work that librarians and business people have been waiting for Lorna Daniells s updated guide to selected business books and reference sources Completely revised with the best most recent information available this edition contains several new sections covering such topics as competitive intelligence economic and financial measures and health care marketing Handbooks bibliographies indexes and abstracts online databases dictionaries directories statistical sources and periodicals are also included Speedy access to up to date information is essential in the competitive computerized business world This classic guide will be indispensable to anyone doing business research today **Calculating a Natural World** Atsushi Akera,2007 How the complex interplay of academic commercial and military interests produced an intense period of scientific discovery and technological innovation in computing during the Cold War *A Remarkable Collection of Babylonian Mathematical Texts* Jöran Friberg,2007-10-01 The sub collection of mathematical cuneiform texts in the Sch yen Collection makes a substantial addition to the known corpus of such texts It contains 121 texts not counting 151 multiplication tables and 53 small weight stones According to the catalog at the end of the Index of Subjects below where those 121 mathematical texts are ordered by content nearly all known kinds and some new kinds of mathematical cun form texts are represented in the collection Therefore it has been possible to organize the present work as a broad general account of Mesopotamian mathematics illustrated mainly by texts from the Sch yen Collection but occasionally also by previously published texts The general disposition of the book is borrowed from my own concise but comprehensive survey of

Mesopotamian mathematics in the article on Mathematics in Reallexikon der Assyriologie vol 7 1990 My ambition has been to make the account easily accessible to all kinds of readers yet still as detailed and exhaustive as possible For that purpose there is for instance an introductory Chapter 0 on how to get a better understanding of mathematical cuneiform texts The chapter begins with a discussion of the danger of unintentional anachronisms in translations of pre Greek mathematical texts and continues with a presentation of the kind of conform transliterations translations and interpretations true to the original that will be used throughout the book in discussions of individual texts
