Towards Gender Equity in Mathematics Education Gila Hanna, 2006-04-11 THE REAL WORLD OF MATHEMATICS SCIENCE AND TECHNOLOGY EDUCATION In this Preface I would like to focus on what I mean by education and speak about the models and metaphors that are used when people talk write and act in the domain of education We need to look at the assumptions and processes that the models and metaphors implicitly and explicitly contain I feel we should explore whether

there is a specific thrust to mathematics education in the here and now and be very practical about it For me education is the enhancement of knowledge and understanding and there is a strong and unbreakable link between the two There seems little point in acquiring knowledge without understanding its meaning Nor is it enough to gain a deep understanding of problems without gaining the appropriate knowledge to work for their solution Thus knowledge and understanding are each necessary conditions for the process of education but only when they are linked will the process bear fruit Only in the balanced interplay of knowledge and understanding can we expect to achieve genuine education Classroom-Ready Rich Math Tasks, Grades K-1 Beth McCord Kobett, Francis (Skip) Fennell, Karen S. Karp, Delise Andrews, Latrenda Knighten, Jeff Shih, 2021-04-12 Detailed plans for helping elementary students experience deep mathematical learning Do you work tirelessly to make your math lessons meaningful challenging accessible and engaging Do you spend hours you don't have searching for adapting and creating tasks to provide rich experiences for your students that supplement your mathematics curriculum Help has arrived Classroom Ready Rich Math Tasks for Grades K-1 details 56 research and standards aligned high cognitive demand tasks that will have your students doing deep problem based learning These ready to implement engaging tasks connect skills concepts and practices while encouraging students to reason problem solve discuss explore multiple solution pathways connect multiple representations and justify their thinking They help students monitor their own thinking and connect the mathematics they know to new situations In other words these tasks allow students to truly do mathematics Written with a strengths based lens and an attentiveness to all students this guide includes Complete task based lessons referencing mathematics standards and practices vocabulary and materials Downloadable planning tools student resource pages and thoughtful questions and formative assessment prompts Guidance on preparing launching facilitating and reflecting on each task Notes on access and equity focusing on students strengths productive struggle and distance or alternative learning environments With concluding guidance on adapting or creating additional rich tasks for your students this guide will help you give all of your students the deepest most enriching and engaging mathematics learning experience possible ENC Focus, 2000
