 McCrea offers insights into the complex task of teaching maths Taking an evidence informed stance Emma first explores the
 age old question of why we study maths and the important role it plays in our lives and in society Next she examines several
 pertinent debates in maths those of pupil grouping mastery and gender Finally we are taken on a grand tour of curriculum
 pedagogy and assessment as the fundamental pillars of great teaching Additionally the book includes four rich case studies
 revisited throughout the curriculum pedagogy and assessment chapters which help to showcase how these ideas can be
 applied in various contexts so you can really see what it all looks like In Action **Mathematics in Action** Consortium for
 Foundation Mathematics,2000-07 This introductory algebra text based on standards in the AMATYC Crossroads document
 motivates college math students to develop mathematical literacy and a solid foundation for future study in mathematics and
 other disciplines This first book of a two book series presents mathematical concepts and skills through relevant activities
 derived from real life situations these activities are meaningful to students because they illustrate how mathematics arises
 naturally from real world situations and problems Mathematics in Action is based on the assumption that students learn
 mathematics best by deriving concepts themselves in a meaningful context Therefore the text takes a collaborative approach
 to learning Students take an active role in their own learning by working in groups thereby developing communication skills
 a sense of independence and a can do attitude about mathematics Technology is integrated throughout the book so that
 students can learn to interpret real life data numerically symbolically and graphically Regardless of their level of preparation
 for the course students can use this text to increase their knowledge of mathematics their problem solving skills and their
