

Problem Solving

Tips to make Problem Solving EASY!

1. Read the question carefully and highlight/underline the **actual question** asked, e.g. *How many marbles do they have all together?*
2. Underline/highlight the **key words that refer to operations**. Remember that any problem solving question requires an operation or more. One operation can be used to determine how many items were shared equally, added, subtracted, multiplied, divided, etc. More than one operation should be by using the key words, e.g. more, less, each, of, shared equally, added, subtracted, multiplied, divided, etc.
3. Sometimes no key words are given, but you can **determine the operation** by carefully reading the question, e.g. If it costs R35 for one ball, how much will you pay if you bought 5 balls? Multiply – $R35 \times 5 = R175$
4. Decide if this is a **one-step problem** or if **more than one operation** is required to solve the problem.
 Example: Emma saves R145,00 a month and Daniel saves R136,00 a month. How much money will they save in 3 months?
 Two operations: Addition – $R145 + R136 = R281$
 Multiply – $R281 \times 3 = R843$
5. Formulate your **Open Number Sentence**. Some problems may require more than one number sentence.
6. **Calculate the answers**, working accurately and showing all your calculations!
7. **Always answer in a full sentence**. Be sure that you are answering the question asked! Remember that if you copy the question and don't answer exactly what has been asked, in exactly the same words, you will lose marks.

Example:

Charlie buys a toaster for R15,50, a Coke for R8,50 and a packet of crisps for R6,30 at the tuck shop every day from Monday to Friday. How much money will he spend at the tuck shop in one week?

1. Read the question carefully and underline the question to be answered:
How much money will he spend at the tuck shop in one week?
2. Decide which operations should be used to solve the problem.
 Addition – **a Coke and a packet of crisps** – addition
 $R8,50 + R6,30 = R14,80$
 Multiplication – **Monday to Friday** – multiply by 5
 $R14,80 \times 5 = R74,00$
3. Write an **open number sentence** or more than one sentence if necessary:
 $R15,50 + R8,50 + R6,30 = \text{▲} \quad \text{▲} \times 5 = \text{▲}$

Mathematics Problem Solving For Success Grade 4:

Mastering Grade 4 Math Reza Nazari, 2023-09-02 Dive into Grade 4 Math with Mastery Remember those days when math was all about counting apples and oranges By fourth grade mathematics takes on a new form It starts challenging young minds with multi digit multiplication fractions and complex geometrical shapes Imagine the thrill of multiplying for the first time or the magic of understanding how fractions work Exciting isn't it The Need for a Comprehensive Guide With the heightened complexity of topics the real challenge lies in understanding these concepts deeply and applying them But how does one make this journey smooth and enjoyable Challenges Faced by Fourth Graders Let's be real the jump from third to fourth grade can be daunting Students encounter bigger numbers unfamiliar concepts and a world where math is no longer just about counting It's about reasoning logic and application Why Mastering Grade 4 Math is the Solution This is where our guide Mastering Grade 4 Math comes into play Like a trusty friend it walks students through every topic making the challenging ones seem like a piece of cake Dive Deep into Key Features Attaining Conceptual Clarity Remember the joy of finally getting a tricky concept Each chapter in our book aims to provide that aha moment With simple clear explanations it breaks down even the most complex topics into digestible chunks The Power of Practice Ever heard the saying Practice makes perfect Our guide believes in it wholeheartedly With a wide array of exercises it's like a gym for the brain flexing and strengthening those math muscles Math in the Real World Why do we learn math anyway Our guide bridges the gap between classroom learning and real world applications showing students the magic of using math in everyday life The Joy of Interactive Learning Why should learning be boring With puzzles games and quizzes our book transforms learning into a fun adventure The Progressive Pathway Just like building a house brick by brick our guide ensures that each concept builds on the previous one ensuring a strong foundation for the mathematical mansion Embracing Expert Tips Who wouldn't love some insider information With tips from experts those tricky problems won't stand a chance The Benefits of Using This Guide For Parents Seeking the perfect resource to support your child's mathematical journey This guide promises to be the co-pilot you've been looking for For Teachers Need effective teaching material that resonates with your students Look no further Our guide not only teaches but inspires For Students Aiming for the stars in 4th grade math With this guide not only will you reach the stars but you'll also understand their mathematical patterns In the vast sea of educational resources Mastering Grade 4 Math stands out as a beacon for all those seeking clarity understanding and a genuine love for math Dive in explore and let the magic of math wash over you

Affect and Mathematical Problem Solving Douglas B. McLeod, Verna M. Adams, 2012-12-06 Research on cognitive aspects of mathematical problem solving has made great progress in recent years but the relationship of affective factors to problem solving performance has been a neglected research area The purpose of Affect and Mathematical Problem Solving A New Perspective is to show how the theories and methods of cognitive science can be extended to include the role of affect in mathematical problem solving The book presents Mandler's theory of emotion

and explores its implications for the learning and teaching of mathematical problem solving Also leading researchers from mathematics education and psychology report how they have integrated affect into their own cognitive research The studies focus on metacognitive processes aesthetic influences on expert problem solvers teacher decision making technology and teaching problem solving and beliefs about mathematics The results suggest how emotional factors like anxiety frustration joy and satisfaction can help or hinder performance in problem solving *Resources in Education* ,2000 **Math Wise!**

Over 100 Hands-On Activities that Promote Real Math Understanding, Grades K-8 James L. Overholt,Laurie Kincheloe,2010-02-12 A fun easy to implement collection of activities that give elementary and middle school students a real understanding of key math concepts Math is a difficult and abstract subject for many students yet teachers need to make sure their students comprehend basic math concepts This engaging activity book is a resource teachers can use to give students concrete understanding of the math behind the questions on most standardized tests and includes information that will give students a firm grounding to work with more advanced math concepts Contains over 100 activities that address topics like number sense geometry computation problem solving and logical thinking Includes projects and activities that are correlated to National Math Education Standards Activities are presented in order of difficulty and address different learning styles Math Wise is a key resource for teachers who want to teach their students the fundamentals that drive math problems

Rigorous Mathematical Thinking James T. Kinard,Alex Kozulin,2008-06-02 This book demonstrates how rigorous mathematical thinking can be fostered through the development of students cognitive tools and operations This approach seems to be particularly effective with socially disadvantaged and culturally different students The authors argue that children s cognitive functions cannot be viewed as following a natural maturational path they should be actively constructed during the educational process The Rigorous Mathematical Thinking RMT model is based on two major theoretical approaches Vygotsky s theory of psychological tools and Feuerstein s concept of mediated learning experience The book starts with general cognitive tools that are essential for all types of problem solving and then moves to mathematically specific cognitive tools and methods for utilizing these tools for mathematical conceptual formation The application of the RMT model in various urban classrooms demonstrates how mathematics education standards can be reached even by the students with a history of educational failure who were considered hopeless underachievers **Research in Education** ,1971 *Problem-Solver's Math Journal Guide* Teacher Created Materials Staff,2004-12-01 Use the Teacher s Guide with your students Problem Solver s Math Journal Teacher s Guides include the answer key *Teaching in Inclusive Classrooms*

Martignon,Katharina Loibl,2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems Thus it is par excellence a model of rational inquiry Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades Indeed the Enlightenment view of the rational human mind that reasons makes decisions and solves problems based on logic and probabilities was shaken during the second half of the twentieth century Cognitive psychologists discovered that humans thoughts and actions often deviate from rules imposed by strict normative theories of inference Yet these deviations should not be called errors as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats Humans as the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program In Simon s bounded rationality and its direct descendant ecological rationality rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e g transitivity **Assessing English Language Learners: Bridges to Educational**
