Zoo Studies Tracy McDonald, Daniel Vandersommers, 2019-06-19 Do both the zoo and the mental hospital induce psychosis as humans are treated as animals and animals are treated as humans How have we looked at animals in the past and how do we look at them today How have zoos presented themselves and their purpose over time In response to the emergence of environmental and animal studies anthropologists sociologists philosophers theorists literature scholars and historians around the world have begun to explore the significance of zoological parks past and present *Zoo Studies* considers the modern zoo from a range of approaches and disciplines united in a desire to blur the boundaries between human and nonhuman animals The volume begins with an account of the first modern mental hospital La Salpêtrière established in 1656 and the first panoptical zoo the menagerie at Versailles created in 1662 by the same royal architect the final chapter presents a choreographic performance that imagines the Toronto Zoo as a place where the human body can be inspired by animal bodies From beginning to end through interdisciplinary collaboration this volume decentres the human subject and offers alternative ways of thinking about zoos and their inhabitants This collection immerses readers in the lives of animals and their experiences of captivity and asks us to reflect on our own assumptions about both humans and animals An original and groundbreaking work *Zoo Studies* will change the way readers see nonhuman animals and themselves

acknowledged that for most species habitat loss is a much more significant threat Some argue that the CITES remedy actually exacerbates the problem by removing the incentive to conserve wildlife habitat This collection of essays the first of its kind charts the controversies and changes within CITES It provides case studies of the way CITES has dealt with particular species and notes the growing role of the South in shaping the direction of the treaty It considers the role of sustainable use the precautionary principle and unilateralism within CITES Finally it examines options for the future of CITES Implicit within a number of the contributions is the recognition that questions of wildlife conservation cannot be divorced from wider issues of land use development and social justice This book provides an essential resource for policy makers practitioners academics and students concerned with conservation development and trade
