human and nonhuman entanglements through which AD is performed in the lab in relational ways In other words the thesis explores how AD is enacted in the bodies of transgenic fruit flies Drosophila melanogaster as these flies embody the disease live and die with it Last but not least the thesis explores the materialities of death dying embodiment and biological waste in a biochemistry lab as constitutive parts of the produced knowledge about AD Denna avhandling utg r ett bidrag till feministiska laboratoriestudier och r en kritisk analys av naturvetenskaperna N rmare best mt r det en feministisk studie av forskning om Alzheimers sjukdom dess biokemiska verkningar och d dliga relationer utifr n ett rs f ltarbete som labbtekniker i ett fluglabb Naturvetenskaperna har under decennier fascinerat genusforskare Dessa discipliner formar kunskapen om vad som r knas som natur och naturligt h lsa och sjukdom normalt eller inte och de har gjort s med stor samh llelig auktoritet genom Europeisk modernitet Forskare inom feministiska teknovetenskapliga studier har l nge h vdat att vetenskap ocks r social praktik med politiska implikationer Begrepp som natur djur m nskligt eller kropp k n och livet sj lvt kan inte tas f r givna utan formas ocks i laboratoriets naturkultur Med utg ngspunkt i s dana feministiska teknovetenskaplig teoribildningar och metodologiska utg ngspunkter bearbetar denna avhandling fr gor om hur vetenskapliga fakta om Alzheimers sjukdom skapas i laboratoriet idag Vilka kroppar verkligheter och etisk politiska frh llningss tt aktualiseras Vem fr leva och vem fr d i vardagliga laboratoriepraktiker Teoretiskt bygger avhandlingen framf r allt p Karen Barads agentiella realism n r den diskuterar sammanv vningen mellan m nskligt och icke m nskligt samt det som kallas posthumanistisk performativitet i relation till Alzheimers sjukdom som den f rkroppsligas i transgena fruktflugor Drosophila melanogaster i laboratoriet I s rskilt fokus st r relationerna som skapas inom den biokemiska forskningen kring d d biologiskt avfall och kroppslighet

Death Philippe Huneman,2023-02-14 This book addresses several key issues in the biological study of death with the intent of capturing their genealogy the assumptions and presuppositions they make and the way that they open specific new research avenues The book is divided into two sections the first considers physiology and the second evolutionary biology In the first part Huneman reconstructs a conceptual genealogy of experimental physiology based on an

in depth analysis of Bichat's investigations of death processes In the second part he explains that biologists in the late 1950s put forth a research framework that evolutionarily accounts for death in terms of either an effect of the weakness of natural selection or a by product of natural selection for early reproduction He illustrates how the biology of death is a central field and that studying it provides insight into the way that the epistemic structure of this knowledge has been constituted persists until now and may conflict with some traditional philosophical ideas Contradiction Set Free Hermann Levin Goldschmidt, 2020-01-23 First published in in 1976 Hermann Levin Goldschmidt s Contradiction Set Free Freiheit fr den Widerspruch reflects the push to explore new forms of critical thinking that gained momentum in the decade between Theodor Adorno s Negative Dialectics of 1966 and Paul Feyerabend s Against Method in 1975 The book articulates Goldschmidt's reclamation of an epistemologically critical position that acknowledges the deep underlying link between the modes of production of knowledge and the social and political life they produce In signalling a breakout from the academic rut and its repressive hold Goldschmidt pointed beyond the ossified methods of a philosophical discourse whose oppressive consequences could no longer be ignored Contradiction Set Free makes available for the first time in English a pivotal work by one of the great critical thinkers of the 20th century **The Death Penalty** Roger Hood, Carolyn Hoyle, 2015-01-08 The fifth edition of this highly praised study charts and explains the progress that continues to be made towards the goal of worldwide abolition of the death penalty. The majority of nations have now abolished the death penalty and the number of executions has dropped in almost all countries where abolition has not yet taken place Emphasising the impact of international human rights principles and evidence of abuse the authors examine how this has fuelled challenges to the death penalty and they analyse and appraise the likely obstacles political and cultural to further abolition They discuss the cruel realities of the death penalty and the failure of international standards always to ensure fair trials and to avoid arbitrariness discrimination and conviction of the innocent all violations of the right to life They provide further evidence of the lack of a general deterrent effect shed new light on the influence and limits of public opinion and argue that substituting for the death penalty life imprisonment without parole raises many similar human rights concerns This edition provides a strong intellectual and evidential basis for regarding capital punishment as undeniably cruel inhuman and degrading Widely relied upon and fully updated to reflect the current state of affairs worldwide this is an invaluable resource for all those who study the death penalty and work towards its removal as an international goal **Death: A Philosophical Inquiry** Paul Fairfield, 2014-09-19 From Nietzsche's pronouncement that God is dead to Camus argument that suicide is the fundamental question of philosophy the concept of death plays an important role in existential phenomenology reaching from Kierkegaard to Heidegger and Marcel This book explores the phenomenology of death and offers a unique way into the phenomenological tradition Paul Fairfield examines the following key topics the modern denial of death Heidegger's important concept of being toward death and its centrality in phenomenological ideas such as authenticity and existence the philosophical significance of

death rituals what explains the imperative toward ritual around death and what is its purpose and meaning death in an age of secularism the philosophy and ethics of suicide death as a mystery rather than a philosophical problem to be solved the relationship between hope and death Death A Philosophical Inquiry is essential reading for students of phenomenology and existentialism and will also be of interest to students in related fields such as religion anthropology and the medical A Death of the World Harris B. Bechtol, 2025-04-01 A Death of the World offers a phenomenological description of what happens to the world for those who survive the death of someone Bringing Jacques Derrida's works into conversation with the philosophies of Martin Heidegger Emmanuel Levinas Jean Luc Marion Maurice Blanchot and Claude Romano the poetry and literature of Paul Celan W H Auden Emily Dickinson Ovid and Jonathan Safran Foer and psychological works concerning trauma mourning epigenetics and memory author Harris B Bechtol provides interdisciplinary language for understanding the death of the other as an event He argues that such death must be understood as an event because this death is more than just the loss of the other who has died insofar as the meaning of the world to and with this other is also lost Such loss manifests itself through the transformations of both the spaces in which meaning takes place and the lived time of a survivor s world These transformations of the world culminate in his account of workless mourning which establishes the contours of the life after these deaths of the world Making Information Matter Mareile Kaufmann, 2024-10-15 Information matters to us Whether recorded recoded or unregistered information co shapes our present and our becoming This book advances new views on information and surveillance practices Starting with a methodology for studying the liveliness of information Kaufmann provides four empirical examples of making information matter association conversion secrecy and speculation In so doing she presents an original and comprehensive argument about the materiality of information and invites us to investigate and to reflect about what matters This is a go to text for scholars and professionals working in the fields of surveillance data studies and the digitization of specific societal sectors
