Matter Of Metalaw:

Contact with Extraterrestrial Intelligence and Human Law Michael Bohlander, 2023-08-07 It is statistically unlikely that humans are the only intelligent species in the universe Nothing about the others will be known until contact is made beyond a radio signal from space that merely tells us they existed when it was sent That contact may occur tomorrow in a hundred years or never If it does it will be a high risk scenario for humanity It may be peaceful or hostile Relying on alien altruism and benign intentions is wishful thinking We need to begin identifying as a planetary species and develop a global consensus on how to respond in either scenario *Precedent and Statute* Orlin Yalnazov, 2018-11-02 Should laws be made in courts or in parliaments Orlin Yalnazov proposes a new approach to the problem He conceptualizes law as an information product and law making as an exercise in production Law making has inputs and outputs and technology is used to transform one into the other Law may depending on input and technology take on different forms it can be vague or it can be certain The technologies between which we may choose are precedent and statute Differences between the two being sizeable our choice has significant repercussions for the cost of the input and the form of the output The author applies this framework to several problems including the comparison between the common and the civil law comparative civil procedure and EU law Perhaps most critically he offers a critique of the efficiency of the common law hypothesis **Astrobiology, Discovery, and Societal Impact**

Steven J. Dick, 2018-05-03 The search for life in the universe once the stuff of science fiction is now a robust worldwide research program with a well defined roadmap probing both scientific and societal issues This volume examines the humanistic aspects of astrobiology systematically discussing the approaches critical issues and implications of discovering life beyond Earth What do the concepts of life and intelligence culture and civilization technology and communication mean in a cosmic context What are the theological and philosophical implications if we find life and if we do not Steven J Dick argues that given recent scientific findings the discovery of life in some form beyond Earth is likely and so we need to study the possible impacts of such a discovery and formulate policies to deal with them The remarkable and often surprising results are presented here in a form accessible to disciplines across the sciences social sciences and humanities
