**Benedictus** Anne E. O'Neill, 2011-11-08 Benedictus is a love story of both divine and human dimensions The story of the nun is also the story of Joseph her psychologist It was a labyrinthian path that brought the two together in a surprising and courageous love that changed both their lives Twenty years of conflict over her vocation had taken Sister Anne into a void whose depths of darkness became what she called a place of Nothing She always believed that someone would come to help her and someone did but not as she had imagined and not in a way that the world would easily accept It would take someone like Joseph who was willing to risk all things professionally and personally to pull her out of that void Sister Anne's risk was no less she had to hold on and meet him every step of the way No door would be left unopened sparing her nothing She walked through them all and when the last door closed behind her Sister Anne knew a choice had to be made **The World's Work**, 1919 A history of our time You Can Become Anything You Want, They Said! **Eco-Deconstruction** Philippe Lynes, David Wood, 2018-03-27 Eco Deconstruction marks a new approach to the degradation of the natural environment including habitat loss species extinction and climate change While the work of French philosopher Jacques Derrida 1930 2004 with its relentless interrogation of the anthropocentric metaphysics of presence has already proven highly influential in posthumanism and animal studies the present volume drawing on published and unpublished work by Derrida and others builds on these insights to address the most pressing environmental issues of our time The volume brings together fifteen prominent scholars from a wide variety of related fields including eco phenomenology eco hermeneutics new materialism posthumanism animal studies vegetal philosophy science and technology studies environmental humanities eco criticism earth art and aesthetics and analytic environmental ethics Overall eco deconstruction offers an account of differential relationality explored in a non totalizable ecological context that addresses our times in both an ontological and a normative register The book is divided into four sections Diagnosing the Present suggests that our times are marked by a facile flattened out understanding of time and thus in need of deconstructive dispositions Ecologies mobilizes the spectral ontology of deconstruction to argue for an originary environmentality the constitutive ecological embeddedness of mortal life Nuclear and Other Biodegradabilities examines remains including such by products and disintegrations of human culture as nuclear waste environmental destruction and species extinctions Environmental Ethics seeks to uncover a demand for justice including human responsibility for suffering beings that emerges precisely as a response to original differentiation and the mortality and unmasterable alterity it installs in living beings As such the book will resonate with readers not only of philosophy but across the humanities and the social and natural sciences
