Natural Medicinal Algae:

Medicinal Plants and Environmental Challenges Mansour Ghorbanpour,Ajit Varma,2017-10-31 This book sheds new light on the role of various environmental factors in regulating the metabolic adaptation of medicinal and aromatic plants Many of the chapters present cutting edge findings on the contamination of medicinal plants through horizontal transfer as well as nanomaterials and the biosynthesis of pharmacologically active compounds In addition the book highlights the impacts of environmental factors e g high and low temperature climate change global warming UV irradiation intense sunlight and shade ozone carbon dioxide drought salinity nutrient deficiency agrochemicals waste heavy metals nanomaterials weeds pests and pathogen infections on medicinal and aromatic plants emphasizing secondary metabolisms In recent years interest has grown in the use of bioactive compounds from natural sources Medicinal and aromatic plants constitute an important part of the natural environment and agro ecosystems and contain a wealth of chemical compounds known as secondary metabolites and including alkaloids glycosides essential oils and other miscellaneous active substances These metabolites help plants cope with environmental and or external stimuli in a rapid reversible and ecologically meaningful manner Additionally environmental factors play a crucial role in regulating the metabolic yield of these biologically active molecules Understanding how medicinal plants respond to environmental perturbations and climate change could open new frontiers in plant production and in agriculture where successive innovation is urgently needed due to the looming challenges in connection with global food security and climate change Readers will discover a range of revealing perspectives and the latest research on this vital topic

Bioactive Compounds from Multifarious Natural Foods for Human Health Hafiz Ansar Rasul Suleria,Megh R. Goyal,Huma Bader Ul Ain,2022-08-01 Divided into two sections the volume first examines health claims of food based bioactive compounds which are extra nutritional constituents that typically occur in small quantities in foods This section lays out the concepts of extraction of food based bioactive molecules along with both conventional and modernized extraction techniques The book goes to present new research on health claims of bioactive compounds from medicinal plants their importance and health perspectives Both sections cover the various pharmacological and therapeutic aspects of bioactive compounds along with their methods of extraction their phytochemistry their pharmacological and biological activities their medicinal properties and their applications for disease management and prevention This volume sheds new light on the potential of natural and plant based foods for human health from different technological aspects contributing to the ocean of knowledge on food science and technology

Natural Medicinal Products - Principles and Analysis - I Mr. Rohit Manglik,2024-07-24 Covers the sources classifications and chemistry of natural medicinal products emphasizing methods of extraction identification and preliminary analytical techniques

Medical Toxicology of Natural Substances Donald G. Barceloux,2012-03-07 Interest and information in the field of medical toxicology has grown rapidly but there has never been a concise authoritative reference focused on the subjects of

natural substances chemical and physical toxins drugs of abuse and pharmaceutical overdoses Medical Toxicology of Natural Substances finally gives you an easily accessible resource for vital toxicological information on foods plants and animals in key areas in the natural environment

Proceedings of 4th International Conference and Exhibition on Natural Products, Medicinal Plants & Marine Drugs 2018 ConferenceSeries, June 11 12 2018 Rome Italy Key Topics Natural Products Development of Marine Drugs and Natural Products Natural Products Chemistry Natural Products Drug Discovery Phytomedicine and Phytochemistry Medicinal Natural Products Natural Products as Anti Cancer Drugs Marine The Ultimate Source of Bioactives and Drug Metabolites Marine Biotechnology New Sources and Approaches to Natural Products Marine Natural Products Drug Discovery Bioactive Natural Products Bioactive Natural Products from Marine Bacteria Marine Probiotics and Prebiotics A Promising Future for Marine Drugs and Natural Products Medicinal Chemistry Drug Discovery Anti cancer agents in Medicinal Plants Therapeutic Drugs and Personalized Medicines *Bioprospecting Algae for Nanosized Materials* Devarajan Thangadurai,Jeyabalan Sangeetha,Ram Prasad,2022-02-27 Algae are simple primitive heterogeneous autotrophic eukaryotic or prokaryotic organisms that lead a symbiotic parasitic or free living mode of life Microalgae and macroalgae possess great potential in various fields of application Microalgae are ubiquitous and extremely diverse microorganisms that can accumulate toxic contaminants and heavy metals from wastewater making them a superior candidate to become a powerful nanofactory Algae were discovered to reduce the presence of metal ions and afterwards aid in the biosynthesis of nanoparticles Since algae mediated biogenic nanoparticles are eco friendly cost effective high yielding speedy and energy efficient a large number of studies have been published on them in the last few years This book focuses on recent progress on the utilization of algae for the synthesis of nanoparticles their characterization and the possible mechanisms involved Bioprospecting Algae for Nanosized Materials describes the synthesis of algal nanomaterials and its application in various fields for sustainable development This book outlines the procedures to prepare phyconanomaterials techniques to utilize the nanomaterials and applications in agriculture environment and medicine **Algae Biotechnology for Biomedical and Nutritional Applications** Ashfaq Ahmad,Syed Salman Ashraf,2025-01-06 Algal based functional foods have potential health benefits and their commercial value depends on their application in the food and nutraceutical industries Algae Biotechnology for Biomedical and Nutritional Applications provides a comprehensive overview of different micro and macroalgal species their industrial production processes and the latest advancements in and applications of algae in biomedical fields This book describes advances in the biomedical and nutritional applications of algae achieved during the last decade identifies gaps in the present knowledge and proposes research areas for the future This book covers various aspects of algal biotechnology from the basics to large scale cultivation harvesting and processing for a variety of high value bioproducts Additionally it also covers topics such as algal biomaterials algal medicinal foods algal production for bio medicine as well as applications in pharmaceutical nutritional and value added bioproducts With contributions from an

international array of expert researchers in the field this book is a comprehensive resource for academics researchers postgraduates graduate students and industry professionals Covers basic and applied research on scaling up algal biochemicals for commercial use Discusses the underexplored and underutilized health benefits of chemicals derived from marine sources specifically from algae Provides broad coverage of integrated algal biotechnology and engineering for biomedical issues and their solutions Provides a roadmap for potential applications of integrated algal biotechnology in dietary supplements and biomedical product *Algae as a Natural Solution for Challenges in Water-Food-Energy Nexus* Tonni Agustiono Kurniawan, Abdelkader Anouzla, 2024-07-13 This book provides an overview of challenges and opportunities for algal management to mitigate climate change This book offers new perspectives on how to control water pollution due to algae while converting it to biosorbent and biodiesel that could be sold in market The work also explores how to improve the performance of algae for such purposes By identifying existing knowledge gap this work uncovers new research directions for further development of algal management to address global environmental pollution Extensive literature survey 2001 2023 in algal management based on empirical approach in the body of knowledge A comprehensive overview with critical analysis of algal management for water treatment biodiesel production and food production while dealing with climate change Providing insights about challenges research direction outlook and perspectives of algal management in Industry 4 0 era This book has an advantage that each chapter will be written by experts around the world working in their respective fields As a result this volume presents a balanced picture across the whole spectrum of algae Furthermore the authors are from both the developing and developed countries thus giving a worldwide perspective of looming climatic problems

Marine Natural Products Research in South-East Asia Lik Tong Tan, Novriyandi Hanif, 2025-09-30 This unprecedented volume offers a comprehensive review of marine natural products research across Southeast Asia a region teeming with untapped marine biodiversity It provides an extensive survey of the chemistry and biology of specialized metabolites derived from marine organisms such as sponges tunicates soft corals and marine microbes Highlighting both the scientific advances and critical gaps the book identifies strategic areas for future research and drug discovery initiatives With its regional focus and collaborative insights this edited collection serves as a vital resource for researchers policymakers and industry stakeholders engaged in marine biotechnology and sustainable pharmaceutical development in one of the world's most biodiverse marine ecosystems **Deep Eutectic Solvents for Medicine, Gas Solubilization and Extraction of Natural Substances** Sophie Fourmentin, Margarida Costa Gomes, Eric Lichtfouse, 2020-10-19 Initially considered as a subclass of ionic liquids eutectic mixtures are formed by mixtures of low cost often biodegradable Lewis or Bronsted acids and bases Eutectic mixtures have gathered a growing scientific interest by the academic and industrial communities as they are interesting for many applications ranging from metal processing to biomass treatment or pharmaceuticals This volume gathers contributions by some of the most active research groups in the world using eutectic mixtures for applications in

separation extraction or pharmaceutical and medical applications The different contributions aim at a large overview of the field for these particular applications by reviewing literature data and presenting ground breaking research in the different fields

Oxidative Stress: Diagnostic Methods and Applications in Medical Science Pawan Kumar Maurya,Pranjal Chandra,2017-10-24 This book discusses the importance of oxidative stress related biomarkers and its diagnostic methods including bio analytical and advanced detection systems Oxidative stress is associated with diminished capacity of a biological system to overcome the overproduction of reactive oxygen species Since oxidative stress has been suggested as a causative factor in many diseases its prevention is vital and there is an urgent need for oxidative stress monitoring using in vitro and in vivo models Interdisciplinary approaches have lead to the development of various oxidative stress monitoring models for real world clinical and biomedical applications The development of such methods requires a broad understanding of biology chemistry molecular biology immunology and microbiology As such the book is a valuable resource for students researchers and clinicians interested in the fundamental as well as applied aspects of oxidative stress associated diseases

Herbal Medicine Phytochemistry Sylvester Chibueze Izah,Matthew Chidozie Ogwu,Muhammad Akram,2024-07-09 This book offers a comprehensive perspective of herbal medicine phytochemistry and explores the application of plant extracts as bioactive compounds in disease prevention and treatment in modern or traditional medicine The book starts with an introduction to the history and value of herbal medicine followed by 3 parts covering the main phytochemical components and metabolites in herbal medicine different uses and practices in herbal medicine including a region wise analysis of methods and practices and an overview of regulations and policies for herbal medicinal practitioners and the advances and challenges in quality assessment of herbal medicine Plants generally have the tendency to bioaccumulate trace metals from the environment and they are easily contaminated by microorganisms from water sources and poor hygiene practices of the herbalist Quality assessment and assurance is thus a pertinent challenge in herbal medicine practice i e in remedy formulation and application and this book offers an authoritative perspective on this topic covering aspects such as quality control strategies preparation techniques chemical quantification in phytomedicine and the efficacy and safety of herbal remedies Moreover in this book readers will find valuable insights into the latest trends and developments in the field and a critical review of the application of medicinal plants to treat cardiovascular digestive respiratory neurological and reproductive diseases Particular attention is given to the advances and trends in the field and readers will learn about the latest biotechnological approaches the use of nanotechnology in herbal medicine metabolomic analysis of medicinal plants big data application in herbal medicine and the value of herbal medicine towards sustainability Given its breadth this book is aimed at researchers academics practitioners and professionals working in the fields of natural life health clinical and biomedical sciences and interested in herbal remedies pharmacology pharmacognosy human nutrition and dietetics plant biology and biotechnology microbiology
