Marambio, Kirrily Pells, Rajib Timalsina, 2024-06-14 This book demonstrates how participatory arts based approaches can help children and youth contribute to peacebuilding within post conflict contexts and to their communities Cultural forms of storytelling through visual arts drama music and dance can help to enhance post conflict community well being social cohesion and conflict prevention However in the planning and implementation of these arts based projects children and youth are often marginalised in decision making processes Drawing on cases from Kyrgyzstan Rwanda Indonesia and Nepal this book demonstrates the benefits of participatory action research with children and youth to inform education curricula and policies for sustaining peace Showing how artforms can be adapted to meet the needs of children and youth the book emphasises the need to scale up arts based peacebuilding initiatives and leverage for greater policy enactment from the bottom up It is also an excellent example of South South learning advocating for a local approach to engage with arts based methodologies and peacebuilding This book will be of interest to researchers across the applied arts sociology anthropology political science peacebuilding and international development Practitioners and policymakers would also benefit from the book s recommendations for the implementation of successful arts based research projects and interventions **Children's**

Bureau Publication United States. Children's Bureau, 1918 **Handbook of Children's Rights** Martin D. Ruck, Michele Peterson-Badali, Michael Freeman, 2016-12-08 While the notion of young people as individuals worthy or capable of having rights is of relatively recent origin over the past several decades there has been a substantial increase in both social and political commitment to children s rights as well as a tendency to grant young people some of the rights that were typically accorded only to adults In addition there has been a noticeable shift in orientation from a focus on children s protection and provision to an emphasis on children s participation and self determination With contributions from a wide range of international scholars the Handbook of Children s Rights brings together research theory and practice from diverse perspectives on children s rights This volume constitutes a comprehensive treatment of critical perspectives concerning children s rights in their various forms Its contributions address some of the major scholarly tensions and policy debates comprising the current discourse on children s rights including the best interests of the child evolving capacities of the child states rights versus children s rights rights of children versus parental or family rights children as citizens children s rights versus children s responsibilities and balancing protection and participation In addition to its multidisciplinary focus the handbook includes perspectives from social science domains in which children s rights scholarship has evolved largely

independently due to distinct and seemingly competing assumptions and disciplinary approaches e.g childhood studies developmental psychology sociology of childhood anthropology and political science The handbook also brings together diverse methodological approaches to the study of children s rights including both quantitative and qualitative perspectives and policy analysis This comprehensive cosmopolitan and timely volume serves as an important reference for both scholarly and policy driven interest in the voices and perspectives of children and youth
