American Dream Mike Davis, 2018-06-26 Prisoners of the American Dream is Mike Davis's brilliant exegesis of a persistent and major analytical problem for Marxist historians and political economists: Why has the world's most industrially advanced nation never spawned a mass party of the working class? This series of essays surveys the history of the American bourgeois democratic revolution from its Jacksonian beginnings to the rise of the New Right and the reelection of Ronald Reagan, concluding with some bracing thoughts on the prospects for progressive politics in the United States. *Bulletin of the United States Bureau of Labor Statistics*, 1957

And the Wolf Finally Came John Hoerr, 2014-07-22 Choice 1988 Outstanding Academic Book Named one of the Best Business Books of 1988 by USA Today A veteran reporter of American labor analyzes the spectacular and tragic collapse of the steel industry in the 1980s. John Hoerr's account of these events stretches from the industrywide bargaining failures of 1982 to the crippling work stoppage at USX U.S. Steel in 1986-87. He interviewed scores of steelworkers, company managers at all levels, and union officials and was present at many of the crucial events he describes. Using historical flashbacks to the origins of the steel industry, particularly in the Monongahela Valley of southwestern Pennsylvania, he shows how an obsolete and adversarial relationship between management and labor made it impossible for the industry to adapt to shattering changes in the global economy. *Public Policy Digest of the National Planning Association*, 1940

Forging a Union of Steel Paul F. Clark, Peter Gottlieb, Donald Kennedy, 2018-08-06 More than any other labor victory of the 1930s, the emergence of the Steel Workers Organizing Committee symbolized the rise of organized labor to a position of power in the United States. Yet as the contributors to this volume demonstrate, the unionization of the steel industry and most notably the role of SWOC and Philip Murray in that process has received far less attention than it deserves. Beginning with a discussion of why the unionization of steel has been relatively neglected by labor historians, the contributors to this volume analyze early organizing efforts in steel, the major transformations wrought and felt by the union, and the character of the union members and leaders. Critical throughout is discussion of the role of Philip Murray in shaping the United Steelworkers of America into one of the premier economic, social, and political institutions of the war years and beyond. Contributors: David Brody, Malvyn Dubovsky, Ronald L. Filippelli, Mark McCulloch, Ronald W. Schatz

The Postwar Moment Isser Woloch, 2019-01-22 An incisive comparative study of the development of Post-World War II progressive politics in Britain, France, and the United States. Toward the end of World War II, the three democracies faced a common choice: return to the civic order of prewar normalcy or embark instead on a path of progressive transformation. In this ambitious and original work, Isser Woloch assesses the progressive agendas that crystallized in each of the allied democracies, their roots in the interwar decades, their development during wartime, the struggles to enact them in the early postwar years, and the mixed outcomes in each country. *The Postwar Moment* examines three progressive postwar manifestos that reveal a common agenda in the three nations. The issues at stake included priorities for reconstruction or reconversion, full employment via economic planning, price controls, the roles of trade unions, expansion of social security, national health

care public housing and educational reform A highly regarded scholar of European history Woloch persuasively adds the United States to a discussion that is usually focused solely on Europe *The Rise and Fall of the New Deal Order, 1930-1980* Steve Fraser,Gary Gerstle,2020-07-21 The description for this book The Rise and Fall of the New Deal Order 1930 1980 will be forthcoming **Manufacturing Knowledge** Richard Gillespie,1993-05-28 What motivates workers to work harder What can management do to create a contented and productive workforce Discussion of these questions would be incomplete without reference to the Hawthorne experiments one of the most famous pieces of research ever conducted in the social and behavioral sciences Drawing on the original records of the experiments and the personal papers of the researchers Richard Gillespie has reconstructed the intellectual and political dynamics of the experiments as they evolved from the tentative experimentation to seemingly authoritative publications Manufacturing Knowledge raises fundamental questions about the nature of scientific knowledge and about the assumptions and evidence that underlay debates on worker productivity **Catholic New Deal** Kenneth J.
