Organizing The Movement The Roots And Growth Of Acorn:

Organizing the Movement Gary Delgado, 1987-01-01 **Social Movements and Organization Theory** Gerald F. Davis, Doug McAdam, W. Richard Scott, Mayer N. Zald, 2005-05-09 Although the fields of organization theory and social movement theory have long been viewed as belonging to different worlds recent events have intervened reminding us that organizations are becoming more movement like more volatile and politicized while movements are more likely to borrow strategies from organizations Organization theory and social movement theory are two of the most vibrant areas within the social sciences This collection of original essays and studies both calls for a closer connection between these fields and demonstrates the value of this interchange Three introductory programmatic essays by leading scholars in the two fields are followed by eight empirical studies that directly illustrate the benefits of this type of cross pollination. The studies variously examine the processes by which movements become organized and the role of movement processes within and among organizations. The topics covered range from globalization and transnational social movement organizations to community recycling programs Community Practice Marie Weil, 1997 Presents examples of three of the basic models of community organizing community economic development and coalition building and analyzes current issues relating to them and to community practice in general Also published as the Journal of Community Practice vol 4 no 1 1997 Paper edition 0046 6 14 95 Annotation copyrighted by Book News Inc Portland OR This Could Be the Start of Something Big Manuel Pastor Jr., Chris Benner, Martha Matsuoka, 2015-10-27 For nearly two decades progressives have been dismayed by the steady rise of the right in U S politics Often lost in the gloom and doom about American politics is a striking and sometimes underanalyzed phenomenon the resurgence of progressive politics and movements at a local level Across the country urban coalitions including labor faith groups and community based organizations have come together to support living wage laws and fight for transit policies that can move the needle on issues of working poverty Just as striking as the rise of this progressive resurgence has been its reception among unlikely allies In places as diverse as Chicago Atlanta and San Jose the usual business resistance to pro equity policies has changed particularly when it comes to issues like affordable housing and more efficient transportation systems. To see this change and its possibilities requires that we recognize a new thread running through many local efforts a perspective and politics that emphasizes regional equity Manuel Pastor Jr Chris Benner and Martha Matsuoka offer their analysis with an eye toward evaluating what has and has not worked in various campaigns to achieve regional equity The authors show how momentum is building as new policies addressing regional infrastructure housing and workforce development bring together business and community groups who share a common desire to see their city and region succeed Drawing on a wealth of case studies as well as their own experience in the field Pastor Benner and Matsuoka point out the promise and pitfalls of this new approach concluding that what they term social movement regionalism might offer an important contribution to the revitalization of progressive politics in America Leaders from the
