Subcommittee on Elementary, Secondary, and Vocational Education, 1976 Volunteers in Public Schools National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on the Use of Volunteers in Schools, 1990-02-01 Among the most prominent of President Bush's thousand points of light are volunteers who work with our nation's students. The last several decades show considerable growth in the numbers of school volunteers, with increasing participation by people from the business community, retired citizens, and college students in addition to the traditionally active mothers of school children. Yet

we must do more to ensure the success of volunteer programs in schools It is not enough to assume that any volunteer effort will produce results nor is it wise to use volunteers simply because they are free This new volume from the National Research Council provides the first overview ever compiled of volunteer activity in U S public schools reporting on how volunteers are being used in schools what factors make programs successful what further research will enhance our ability to create good programs and what directions our national policy should take Included in this study of volunteers in public schools are the reports of the committee s site visits to 13 volunteer programs identified as exemplary from Boston Partners in Education to Project Rescue for dropout prevention in Corsicana Texas Each site report describes local economic conditions and their effects on education the organization and size of the school system and the volunteer program with details on how each program functions and what results have been achieved This book will be immediately useful to federal state and local policymakers school boards and administrators principals and teachers PTA members business firms involved with schools and of course managers or coordinators of volunteer activities and concerned volunteers Citizenship Education in China Kerry J. Kennedy,Gregory Fairbrother,Zhenzhou Zhao,2013-10-15 There is a flourishing literature on citizenship education in China that is mostly unknown in the West Liberal political theorists often assume that only in democracy should citizens be prepared for their future responsibilities yet citizenship education in China has undergone a number of transformations as the political system has sought to cope with market reforms globalization and pressures both externally and within the country for broader political reforms Over the past decade Chinese scholars have been struggling for official recognition of citizenship education as a key component of the school curriculum in these changing contexts This book analyzes the citizenship education issues under discussion within China and aims to provide a voice for its scholars at a time when China s international role is becoming increasingly important **United States Government Organization Manual** ,1996
