**The Origins** Miles Augustus Navarr,2024-02-13 There are many fundamental issues whether scientific cultural religious and even philosophical that we accept as fact or truth simply because our peers have done so Our peers have been wrong before For two thousand years Euclidean geometry and geo centricity was the absolute truth in scientific and religious communities Law of some of these issues concern the origins of our domain Origin of the universe origin of life on earth origin of Homo sapiens origin of

what we categorize as civilization and origin of religion particularly monotheistic religions This book has endeavored to investigate these five very fundamental issues in simple and non scientific language as far as conceivable To most people these subject matters have very little or no consequence in their daily lives and for this reason they are not explored nor merit any time contemplating But they are so innate and engrained in our subconscious that most people must have pondered reflected or discussed one or more of these issues at least a few times in their lifetime The remarkable fact is that despite their vital and elemental relevance people simply accept and consent to what the authorities propagate That maybe the most convenient approach but none of the mainline theories regardless of where they came from Charles Darwin Albert Einstein The Pope Carl Sagan Steven Hawking or any other scientists philosophers or religious authorities are simply theories not proven and thus still mysteries worth investigating The book does not try to find answers It simply investigates the flaws inadequacies and weaknesses in some of these theories and where possible to explore other alternatives and options The only purpose and indeed hope in writing this book is to create a fertile domain in the mind of the readers to ask question albeit The Right questions Where there is consciousness there is doubt      **Evidence for the Bible** Elgin L. Dallal,2018-04-20 Replete with a cast of giants in Islamic thought and philosophy Ahmad S Dallal s pathbreaking intellectual history of the eighteenth century Muslim world challenges stale views of this period as one of decline stagnation and the engendering of a widespread fundamentalism Far from being moribund Dallal argues the eighteenth century prior to systematic European encounters was one of the most fertile eras in Islamic thought Across vast Islamic territories Dallal charts in rich detail not only how intellectuals rethought and reorganized religious knowledge but also the reception and impact of their ideas From the banks of the Ganges to the shores of the Atlantic commoners and elites alike embraced the appeals of Muslim thinkers who while preserving classical styles of learning advocated for general participation by Muslims in the definition of Islam Dallal also uncovers the regional origins of most reform projects showing

how ideologies were forged in particular sociopolitical contexts Reformists ventures were in large part successful up until the beginnings of European colonization of the Muslim world By the nineteenth century the encounter with Europe changed Islamic discursive culture in significant ways into one that was largely articulated in reaction to the radical challenges of colonialism
