**Origins and Grand Finale** Gary Haitel, 2014-05-15 Origins and Grand Finale presents an in depth study of how modern science and astronomy compare to the biblical narrative of the origin of the universe as well as the origin of life Distinguishing between scientific facts and fairy tales as well as biblical facts and poetry author Gary Haitel attempts to build a perfect harmony between science and theology In Origins and Grand Finale Haitel is not proposing new scientific theories Instead he merely examines current scientific theories however bizarre they may seem and explains how they relate to the biblical narrative The second part of this guide focuses primarily on biblical end times and the abuse of political authority In the third part Haitel reflects upon not only the finale of humanity as described in the Bible but also the finale of an individual's physical life here on earth and what to expect after the body returns to the dust of the earth Are we just complex biological accidents or are we immortal spiritual eternal beings Written in a straightforward down to earth fashion Origins and Grand Finale offers a unique opportunity to understand the perfect harmony between science and theology

**The Unifying Theory of Everything** Muhammed A. Asadi,2000-08-28 In the past few decades physicists have uncovered a hidden order in nature some have called it the Cosmic Code Based on this order scientists aim to uncover a grand unifying Theory of Everything TOE Once this order is decoded it is envisioned by some that all fields of knowledge could be linked together based upon it Using the work of experts in various fields this book links testable scientific evidence in the Koran with modern discoveries that lead to a normative decoding of that order The book is unique and has the potential to evoke great interest among scientists and lay people alike because of its non traditional linking of science and religion The work leading to the writing of this book and the book itself can well be described as the most important discovery of the modern era It also presents the Koran as a falsifiable scientific theory which years of scientific inquiry have provided testable evidence for It is a coherent presentation of the author s life work a collection of over 15 years of research carried out by him The author was nominated for the prestigious Templeton Prize for Progress in Religion

[A Search for Purpose](#) The Prince Sharma,2017-03-20 I wrote this book for people who want to know the purpose of life who want to know the purpose in life and who want to live a life of exhilaration and abundance The objective of this book is to collect the traces of truth we find in science psychology history and spirituality and to answer the following three great questions of life Who are we What is reality What are we doing here The answers will help us understand the purpose of life and give us clarity on our purpose in life It is necessary to know the truth or a part of it instead of following blind ambitions or live aimlessly On our journey to find the purpose we will learn the nature of the universe mind and life and then dive in to some concepts of metaphysics which resonates with science After a decade of research experiment introspection and cognition I have reasons to believe that we are born with a purpose in life a legend to manifest Life has a special meaning for each one of us Once we realize our purpose we can not only live a fulfilled and abundant life but also reach our greatness
