Modernity, Metatheory, and the Temporal-Spatial Divide Michael Kimaid, 2015-03-27. This book is about how modernity affects our perceptions of time and space. Its main argument is that geographical space is used to control temporal progress by channeling it to benefit particular political, economic, and social interests, or by halting it altogether. By incorporating the ancient Greek myth of the Titanomachy as a conceptual metaphor to explore the elemental ideas of time and space, the author argues that hegemonic interests have developed spatial hierarchy into a comprehensive system of technocratic monoculture which interrupts temporal development in order to maintain exclusive power and authority. This spatial stasis is reinforced through the control of historical narratives and geographical settings. While increasingly comprehensive, the author argues that this state of affairs can best be challenged by focusing on the development of unmappable places which presently exist within the socio-spatial matrix of the modern world.

Rewriting the Self, 2004-03-01. While the term *midrash* from the Hebrew *darash* (searched or interpreted) can refer to both legal and extralegal scriptural exegesis, it most commonly refers to symbolic legends, stories, and parables used to make moral or ethical concepts accessible to the layman. As such, *midrash* encompasses an open-ended method of exposition that often allows for the coexistence of seemingly contradictory interpretations of holy writ in a kind of dialogue with each other. In *Rewriting the Self*, Mordechai Rotenberg illustrates how *midrashic* dialogue between a person's past and present may assist in the reorganization of ostensibly contrasting conditions or positions so that by reinterpreting a failing past according to future aspirations, cognitive discord may be reduced and one may begin to rehabilitate and enhance one's life. Rotenberg argues that

the foundations of what he calls a dialogic psychology of progress as well as a pluralistic free choice approach to psychotherapy may be identified in Judaism's midrashic metacode. From a practical therapeutic perspective, a teacher or therapist would no longer be an elite interpreter of a student or client's past, authorized to give the only authentic analysis of that person's problems. Rather, he would be able to offer a variety of options, both rational and emotional. In *Rewriting the Self*, Rotenberg demonstrates his theory with several case studies of rewriting oneself from both the Midrash and Talmud. He contrasts this method with other psychotherapies. This volume is the third in a trilogy; the previous two, *Damnation and Deviance* and *Hasidic Psychology*, are also published by Transaction. That seeks to present a dialogistic psychology as an alternative framework to the perspective that predominates in Western social sciences. It is an original work that will be welcomed by psychotherapists, social scientists, and students of theology.
