from a solidbody guitar when they have the same strings and pickups Why does Eric Clapton use a vibrato Stratocaster with
the vibrato arm removed and the mechanism blocked off with a piece of wood Why does a strings though body guitar sound
brighter than an instrument with the strings anchored at the bridge The sound of an electric guitar is the sum of many parts
Every component from the wood in the neck to the metal in the tuners and everything in between including the amount of air
in the body affects the overall tone of an instrument In this book Dave Hunter looks at the development of the electric guitar
since the earliest instruments in the late 1930s and how since then guitar makers and players have sought to define and
refine all the elements that create a guitar s tone This book includes analysis of the different components that make up a
guitar and how each affects the sound of an instrument chapter by chapter breakdown of the main body types their
characteristics and their strengths and weaknesses in depth specifications of over 70 guitars interviews with significant
people in the guitar making world audio examples of many of the guitar sounds described in the book By looking at all the
