

The Darwin College Lectures

ORIGINS

Origins The Darwin College Lectures

Paola Spinozzi, Alessandro Zironi

Origins The Darwin College Lectures:

Origins A. C. Fabian, 1988-11-10 The first book in the Darwin College Lecture series reports on the origins of the most fundamental features of our world

Origins Richard E. Leakey, 1977

Origins as a Paradigm in the Sciences and in the Humanities Paola Spinozzi, Alessandro Zironi, 2010 In this volume the assumption that origins can be defined as a hermeneutic paradigm in the humanities and in the sciences is explored in relation to specific theoretical frameworks and research methodologies By investigating how origins have been conceptualised in different domains of knowledge biology primatology psychology linguistics history of science critical theory classical studies philology literary criticism strategy and accounting a double movement has been generated towards the very core of each discipline and beyond disciplinary boundaries Which are the most productive theories and methods each discipline has elaborated for investigating origins Can they become trans disciplinary Which synergic enquiries can be devised in order to expand and share knowledge Explaining how and why various disciplines have responded to such questions involves delving into their histories and cultural ideologies in order to verify whether the topic of origins can function as a powerful connector between scientific and humanistic territories

The Origin of the Jews Steven Weitzman, 2019-04-02 The scholarly quest to answer the question of Jewish origins The Jews have one of the longest continuously recorded histories of any people in the world but what do we actually know about their origins While many think the answer to this question can be found in the Bible others look to archaeology or genetics Some skeptics have even sought to debunk the very idea that the Jews have a common origin Steven Weitzman takes a learned and lively look at what we know or think we know about where the Jews came from when they arose and how they came to be He sheds new light on the assumptions and biases of those seeking answers and the religious and political agendas that have made finding answers so elusive Introducing many approaches and theories The Origin of the Jews brings needed clarity and historical context to this enduring and divisive topic

Cosmology Edward Harrison, 2000-03-16 Thoroughly revised and updated introduction to past and present cosmological theory

New Essays on the Origin of Language Jürgen Trabant, Sean Ward, 2011-06-24 The contributions to this volume reflect the state of the art in the renewed discussion on the origin of language Some of the most important specialists in the field life scientists and linguists primarily examine two aspects of the question the origin of the language faculty and the evolution of the first language At stake is the relation between nature and culture and between universality and historical particularity as well as cognition communication and the very essence of language

Risk Layla Skinns, Michael Scott, Tony Cox, 2011-09-01 Recent events from the economic downturn to climate change mean that there has never been a better time to be thinking about and trying to better understand the concept of risk In this book prominent and eminent speakers from fields as diverse as statistics to classics neuroscience to criminology politics to astronomy as well as speakers embedded in the media and in government have put their ideas down on paper in a series of essays that broaden our understanding of the meaning of risk The essays come from

the prestigious Darwin College Lecture Series which after twenty five years is one of the most popular public lecture series at the University of Cambridge The risk lectures in 2010 were amongst the most popular yet and in essay form they make for a lively and engaging read for specialists and non specialists alike [The Social Philosophy of Ernest Gellner](#) ,2023-12-28

Life History Evolution in Plants Timo Olavi Vuorisalo,P. Mutikainen,2001-11-30 The lack of discussion of the life histories of modular organisms is the weakness of this book that I most regret Modular organisms are different S C Steams The Evolution of Life Histories 1992 Life history theory endeavours to increase our understanding of the processes whereby the broad features of the life cycles of organisms such as the timing and magnitude of reproduction have evolved Although reproductive traits have dominated as study objects due to their immediate importance for evolutionary success much work has also been conducted on patterns of development growth and senescence as well as on the shifts in resource allocation related to these processes The basic axiom of life history theory is that patterns of life histories such as reproductive traits are subject to evolutionary explanation This idea can be traced back at least as far as Darwin's Origin of Species 1859 In his discussion of plant domestication Darwin wrote I cannot doubt that the continued selection of slight variations either in the leaves the flowers or the fruit will produce races differing from each other chiefly in these characters Darwin was impressed by the success of plant breeders in moulding the growth and reproductive parameters of cultivated plants and believed that natural selection could have a similar impact in natural populations [The Victorian Achievement of Sir Henry Maine](#) Alan

Diamond, Henry Sumner Maine,1991-11-07 Leading scholars in the social sciences come together to consider the achievement of Sir Henry Maine **Reflexivity And The Crisis of Western Reason** Barry Sandywell,2013-06-17 This ground breaking work explores the genealogical analysis of the discourses of reflection Barry Sandywell traces the differences between the traditional discourses of reflection and the experiences of reflexivity in everyday social and philosophical thought Brilliantly organised and abounding with astonishing insights Reflexivity and the Crisis of Western Reason offers a fundamental challenge to our normal ways of viewing social thought [Literature 1989, Part 1](#)

Astronomisches Rechen-Institut,2013-11-11 From the reviews Astronomy and Astrophysics Abstracts has appeared in semi annual volumes since 1969 and it has already become one of the fundamental publications in the fields of astronomy astrophysics and neighbouring sciences It is the most important English language abstracting journal in the mentioned branches The abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the whole extended material The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences As such it represents a necessary ingredient of any astronomical library all over the world Space Science Review Dividing the whole field plus related subjects into 108 categories each work is numbered and most are accompanied by brief abstracts Fairly comprehensive cross referencing links relevant papers to more than one category and exhaustive author and subject indices are to be found at the back making the catalogues easy to use The series appears to be

so complete in its coverage and always less than a year out of date that I shall certainly have to make a little more space on those shelves for future volumes

The Observatory Magazine Beauty Lauren Arrington, Zoe Leinhardt, Philip Dawid, 2013-05-23 This collection challenges conventional ideas of beauty by exploring unconventional approaches to the topic in the arts sciences and mathematics

Biographical Memoirs of Fellows, II P J Marshall, 2003-12-18 Volume 120 of the Proceedings of the British Academy contains 25 obituaries of recently deceased Fellows of the British Academy

New Scientist, 2000 Ancient Greek Ideas on Speech, Language, and Civilization Deborah Levine Gera, 2003 The source and nature of earliest speech and civilization are puzzles that have intrigued people for many centuries This book explores Greek ideas on the beginnings of language and the links between speech and civilization It is a study of ancient Greek views on the nature of the world's first society and first language the source of language the development of civilization and speech and the relation between people's level of civilization and the kind of language they use Discussions of later Western reflections on the origin and development of language and society particularly during the Enlightenment feature in the book along with brief surveys of recent research on glottogenesis the acquisition of language and the beginnings of civilization

BOOK JACKET

The ^AInteractional Instinct Namhee Lee, Lisa Mikesell, Anna Dina L. Joaquin, Andrea W. Mates, John H. Schumann, 2009-05-21 The Interactional Instinct presents a theory of language based on linguistic evolutionary and biological evidence indicating that language is a culturally inherited artifact that requires no a priori hard wiring of linguistic knowledge Its structure evolved phylogenetically from interaction among speakers and is acquired through emotionally entrained interaction with conspecifics

Origins of Darwin's Evolution J. David Archibald, 2017-10-10 Historical biogeography the study of the history of species through both time and place first convinced Charles Darwin of evolution This field was so important to Darwin's initial theories and line of thinking that he said as much in the very first paragraph of *On the Origin of Species* 1859 and later in his autobiography His methods included collecting mammalian fossils in South America clearly related to living forms tracing the geographical distributions of living species across South America and sampling peculiar fauna of the geologically young Galapagos Archipelago that showed evident affinities to South American forms Over the years Darwin collected other evidence in support of evolution but his historical biogeographical arguments remained paramount so much so that he devotes three full chapters to this topic in *On the Origin of Species* Discussions of Darwin's landmark book too often give scant attention to this wealth of evidence and we still do not fully appreciate its significance in Darwin's thinking In *Origins of Darwin's Evolution* J David Archibald explores this lapse showing how Darwin first came to the conclusion that instead of various centers of creation species had evolved in different regions throughout the world He also shows that Darwin's other early passion geology proved a more elusive corroboration of evolution *On the Origin of Species* has only one chapter dedicated to the rock and fossil record as it then appeared too incomplete for Darwin's evidentiary standards Carefully retracing Darwin's gathering of evidence and the evolution of his thinking *Origins of*

Darwin's Evolution achieves a new understanding of how Darwin crafted his transformative theory Proceedings of the British Academy, Volume 120, Biographical Memoirs of Fellows, II British Academy, 2003-12-18 Volume 120 of the Proceedings of the British Academy contains 25 obituaries of recently deceased Fellows of the British Academy **The SAGE Handbook of Learning** David Scott, Eleanore Hargreaves, 2015-08-17 Profound and useful readers will benefit from the systematic treatment of learning through superb scholarship Cultural philosophical curricular pedagogical historical perspectives on learning curriculum pedagogy and assessment and learners make this collection unique Carol A Mullen Professor of Educational Leadership Virginia Tech Learning is a fundamental topic in education Combining traditional views of learning and learning theory with sociocultural and historical perspectives this Handbook brings together original contributions from respected researchers who are leading figures in the field The editors provide a insightful introduction to the topic and the theories frameworks themes and issues discussed in the individual chapters are central to each and every learning episode The Handbook is organized into four sections each beginning with a short introduction Philosophical Sociological and Psychological Theories of Learning Models of Learning Learning Curriculum Pedagogy and Assessment Learning Dispositions Life Long Learning and Learning Environments
