**The Brandt Commission and the Multinationals** Bo Stråth, 2023-02-11 Set against the backdrop of dramatic world order transformations across the 1970s and 1980s this book examines the competing planetary perspectives of the Brandt Commission and the multinationals arguing that the missed opportunities of these decades created a path for contemporary political and economic crises At the Global South s request for a New International Economic Order the Brandt Commission chaired by Willy Brandt was appointed in 1977 The commission with a goal to formulate arguments on how to close the gap between the North and South developed a planetary perspective grounded in economic redistribution ecological considerations and disarmament The multinationals at that time a new kind of business corporation repressed Brandt s vision by seeking freedom from political monitoring This book discusses the ways that global corporations created facts that changed the world and the preconditions of politics It moves beyond existing research that considers the competition merely a theoretical clash between Keynesianism and neoliberalism Featuring a thorough analysis of the decades trends and a new interview with Shridath Ramphal the Commission s unofficial vice chair this is a timely volume for students and researchers of international relations political science and contemporary history

Studies in the Interwar European Economy Derek H. Aldcroft, 2019-05-23 First published in 1997 this book analyses some of the key economic issues facing Europe in the interwar period against the uncertain international political and economic background of the time Among the subjects discussed are the legacy of the peace settlements inflation trade and reconstruction international lending depression and recovery the position of Eastern and Central Europe and the progress of the peripheral nations The book contends that the peace treaties raised more problems than they solved while the policy mistakes of the Allied powers after the First World War and their failure to devise an adequate programme of economic and financial reconstruction weakened the already divided continent contributing to its disintegration

*The Battle for Asia* Mark T. Berger, 2004 This book is a history of the Asian region from 1945 to the present day which delineates

the various ideological battles over Asia's development      International Bibliography of Economics British Library of Political and Economic Science, 1993 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences      **Europe in the International Economy, 1500 to 2000** Derek Howard Aldcroft, Anthony Sutcliffe, 1999 A survey of the European economy from 1500 to 2000 It explains why Europe overtook the formerly advanced Eastern civilizations and how it influenced the rest of the world It also compares Europe's position of world dominance in the 19th century with its vacillating fortunes in the 20th century      Fragments of Inequality Sanjoy Chakravorty, 2014-06-03 Fragments of Inequality merges sociological geospatial and economic explanations of global inequality into a grand synthesis of the subject that breaks new ground by stressing the phenomenon's spatial foundations Concentrating on inequality within and between regions the book demonstrates that spatial inequality has increased in recent years It employs modified evolutionary principles i.e. punctuated equilibrium not entirely smooth and linear in terms of chronological development rather than the more abstract ones of rationality and self interest that economists use and on a fragmented rather than abstract conception of space Global in its empirical coverage it also addresses the current impact of economic globalization

1750-1914 Derek Howard Aldcroft, Simon P. Ville, 1994 The years between 1750 and 1914 saw the industrial transformation of Europe and a fundamental reorientation of its economy This textbook is among the first to eschew country by country analysis of Europe's economic development instead it offers a continent wide thematic analysis of the sectors involved

*The Legitimacy of Economic Inequality* Juan Carlos Castillo, 2011 This research is an empirical study of the legitimacy of economic inequality with a focus on the case of Chile Chile is an appealing case study in this regard because it has been one of the countries with the highest indexes of economic inequality over the past several decades Theoretical perspectives based on the rational interest of the median voter have pointed out a negative association between high levels of inequality and legitimacy Nevertheless empirical evidence indicates that an unequal distribution of income is not necessarily challenged by the majority of a society a phenomenon associated with the concept of legitimacy of economic inequality Most empirical studies of this topic to date have considered social contexts that are not characterized by comparatively high levels of income inequality thus the impact of the level of inequality on its legitimacy remains largely unclear The present study aimed at bridging this research gap guided by the question How do high levels of income inequality in a society influence the legitimacy of economic inequality Using data obtained by comparative public opinion projects including the International Social Survey Program ISSP and the International Social Justice Project ISJP this research considered individual preferences for occupational earnings inequality the just earnings gap as the main object of study The central hypothesis was that individual preferences are strongly influenced by contextual standards such as the current income distribution leading individuals of countries with high levels of inequality to have stronger average preferences for economic inequality the so called existential argument Empirical evidence of legitimacy was related to two central dimensions based on David Beetham's multidimensional concept of legitimacy a consensus regarding the inequality in the distribution of earnings in Chile and b the impact of the country level of income inequality on individual preferences for a larger just earnings gap The empirical analysis provided partial evidence regarding the consensus about inequality in Chile whereas in an international comparative framework countries with higher levels of income inequality showed a stronger preference for a larger just earnings gap

After the Third World? Mark T. Berger, 2013-10-18 The emergence of the Third World is generally traced to onset of the Cold War and decolonization in the 1940s and 1950s In the 1960s and 1970s the three worlds of development were central to the wider dynamics of the changing international order By the 1980s Third Worldism had peaked entering a period of dramatic decline that paralleled the end of the Cold War Into the 21st century the idea of a Third World and even the pursuit of some form of Third Worldism has continued to be advocated and debated For some it has passed into history and may never have had as much substance as it was credited with while others seek to retain or recuperate the Third World and give Third Worldism contemporary relevance Beginning with a comprehensive introduction this edited volume brings together a wide range of important contributions Collectively they offer a powerful overview from a variety of angles of the history and

contemporary significance of Third Worldism in international affairs The question remains did the Third World exist what was it does it still have intellectual and political purchase or do we live in a global era that can be described as After the Third World This book was previously published as a special issue of Third world Quarterly
