The Origins of Modern Consciousness John Higham, *The Origins of Modern Consciousness* John Higham, 1965

The Origins of Modern Consciousness John Weiss, 1965 **The Origins And History Of Consciousness** Erich Neumann, 2015-12-22 The Origins and History of Consciousness draws on a full range of world mythology to show how individual consciousness undergoes the same archetypal stages of development as human consciousness as a whole Erich Neumann was one of C G Jung's most creative students and a renowned practitioner of analytical psychology in his own right In this influential book Neumann shows how the stages begin and end with the symbol of the Uroboros the tail eating serpent The intermediate stages are projected in the universal myths of the World Creation Great Mother Separation of the World Parents Birth of the Hero Slaying of the Dragon Rescue of the Captive and Transformation and Deification of the Hero Throughout the sequence the Hero is the evolving ego consciousness Featuring a foreword by Jung this Princeton Classics edition introduces a new generation of readers to this eloquent and enduring work *Hanging Together* John Higham, 2001-01-01 This book presents three decades of writings by one of America's most distinguished historians John Higham renowned for his influential works on immigration ethnicity political symbolism and the writing of history here traces the changing contours of American culture since its beginnings focusing on the ways that an extraordinarily mobile society has allowed divergent ethnic class and ideological groups to hang together as Americans The book includes classic essays by Higham and more recent writings some of which have been substantially revised for this publication Topics range widely from the evolution of American national symbols and the fate of our national character to new perspectives on the New Deal on other major turning points and on changes in race relations after major American wars Yet they are unified by an underlying theme that a heterogeneous society and an inclusive national culture need each other *The Origins of Modern Consciousness* John Weiss, 1965 Reiner Schuermann Reiner Schürmann, 2018-01-15 If we are to understand the specifically modern function of self consciousness we must first look to the origins of the concept Among the key thinkers who elaborated on self consciousness was the German monk and theologian Martin Luther Reiner Schuermann's writings and lectures on Luther therefore offer an innovative reading of the systematic role of self consciousness in both premodern and modern cultures This volume in a planned twenty nine part series Reiner Schuermann Luther The Origin of Modern Self Consciousness sees Schuermann tracing Luther's conception of the rise of self consciousness as the subjective reference point Schuermann then explores this conception in conversation with both the Cartesian cogito and Kantian apperception

Myth and the Crisis of Historical Consciousness American Academy of Religion,1975 **Risen Sons** John F. Desmond,2010-11-01 Though stressing that Flannery O Connor was first and foremost a writer of fiction John Desmond maintains in *Risen Sons* that her orthodox Catholic theology stands at the center of her vision providing the metaphysical base from which the fiction evolved Given this religious context Desmond contends that O Connor s stated view of fiction writing as an incarnational act suggests a direct connection between the practice of fiction writing and the Incarnation of Christ the pivotal historic event which her fiction seeks to imitate and through which her vision is revealed O Connor s attempts to create images that would connect the Incarnation with fictional incarnation Mystery with mystery were not immediately realized in her early works It was only with *Wise Blood* that she came to recognize Christian historical vision as her particular fictional subject and the analogical method as the appropriate fictional strategy This discovery made possible the convergence of her metaphysics historical vision and artistic technique providing the thematic and structural basis for the quality of unique wholeness that distinguishes all her works Desmond suggests that O Connor achieved the fullest development of her analogical vision and most complete identification of thought and technique in her novel *The Violent Bear It Away* Her dramatic rendering of the route Tarwater takes before he can comprehend the transcendent mysterious source of personality and the meaning of personhood in history parallels the actions of Christ embodying O Connor s complex and

dramatic vision of the mind's engagement with history in all its ultimate extensions of meaning **The Origin of Consciousness** Charles Augustus Strong, 1918 Hellfire and Lightning Rods Frederick Ferré, 2018-06-21

Renowned philosopher Frederick Ferre invites us to contemplate a new world to be constructed out of the debris of modernity. Hellfire and Lightning Rods displays a vision in which the dichotomies between religion, philosophy, science, and technology can be seen as too narrow construals of a single but polyvalent organic world. Ferre wisely notes that the conceptual worlds of premodern animism, modern scientism, and biblical orthodoxy have major internal flaws and create immense practical problems. Yet while they are largely unconvincing to persons who see the need for postmodern approaches, a successor to these views is nowhere near universally accepted. In that context, Ferre suggests that an important interim worldview that he calls multi-mythic organicism will help humanity recover spiritual dimensions now lacking.

Poetics of Critique Andrew W. Hass, 2018-05-08

Title first published in 2003. Poetics of Critique breaks new ground in its pursuit of a formal and critical language of interdisciplinarity. The founding disciplines within the humanities—theology, philosophy, and literature—are brought together here in a shared space, but one that reconstitutes the very nature of each and any discipline. Readings alternate between discursive analysis and imaginative revisioning; texts alternate between those of the critical thinker (Kant, Nietzsche, Gadamer) and those of the novelist, the poet, and the playwright (Bulgakov, Goethe, Kundera, Sophocles). In this movement between traditions, a fusion at once organic and dynamic takes place: theologian, philosopher, and artist become one, and a pure interdisciplinarity begins to emerge into view. Andrew Hass draws us into a new critical poetic sensibility by which we may explore the ultimate questions of human existence and divine reality with new vigor and sustain or indeed revitalize our deep passion for the fundamental question of truth.
