Exploring Archaeoastronomy Liz Henty, 2022-03-24 Archaeoastronomy and archaeology are two distinct fields of study which examine the cultural aspect of

societies but from different perspectives Archaeoastronomy seeks to discover how the impact of the skyline is materialized in culture by alignments to celestial events or sky based symbolism yet by contrast archaeology's approach examines all aspects of culture but rarely considers the sky Despite this omission archaeology is the dominant discipline while archaeoastronomy is relegated to the sidelines The reasons for archaeoastronomy's marginalized status may be found by assessing its history For such an exploration to be useful archaeoastronomy cannot just be investigated in a vacuum but must be contextualized by exploring other contemporaneous developments particularly in archaeology On the periphery of both there are various strands of esoteric thought and pseudoscientific theories which paint an alternative view of monumental remains and these also play a part in the background The discipline of archaeology has had an unbroken lineage from the late 19th century to the present On the other hand archaeoastronomy has not been consistently titled having adopted various different names such as alignment studies orientation theory astro archaeology megalithic science archaeotopography archaeoastronomy and cultural astronomy names which depict variants of its methods and theory sometimes in tandem with those of archaeology and sometimes in opposition Similarly its academic status has always been unclear so to bring it closer to archaeology there was a proposal in 2015 to integrate archaeoastronomy research with that of archaeology and call it skyline archaeology This volume will examine how all these different variants came about and consider archaeoastronomy's often troubled relationship with archaeology and its appropriation by esotericism to shed light on its position today

Archaeological Fantasies Garrett G. Fagan, 2006 Including case studies this collection of engaging and stimulating essays written by a diverse group of scholars scientists and writers examines the phenomenon of pseudoarchaeology from a variety of perspectives Hidden History (Volume 2 of 2) (EasyRead Super Large 24pt Edition) , Cosmic Womb Chandra Wickramasinghe, Ph.D., Robert Bauval, 2017-12-19 Compelling evidence that life intelligence and evolution on Earth were seeded by comets and cosmic intelligence Explains how life first came from interstellar dust and comets and how later arrivals of cosmic dust and comets spurred evolution Explores the possibility that universal knowledge may be stored in human DNA and how ancient cultures may have known a way to retrieve this knowledge Reveals new discoveries about the dimensions of the Great Pyramid of Giza All ancient cultures link humanity's origins to the heavens The Egyptians for example were adamant that their ancestors came from the stars of Orion and Sirius Today however religion and science assert that life arose spontaneously here on Earth Did the ancients know our true cosmic origins Have they left us clues Expanding on the panspermia theory developed with the celebrated astronomer Sir Fred Hoyle namely that the building blocks of life were imported to Earth by comets in the distant past Chandra Wickramasinghe and Robert Bauval explore the latest findings in support of a cosmic origin for humanity They detail the astrobiological discoveries of organic molecules deep in space how microbes are incredibly resistant to the harshest conditions of space enabling the transfer of genes from one star system to another and the recent recovery of microorganisms from comets still in space They argue that the

universe was born and preset with the blueprint of life and that the cosmos must be teeming with lifeforms far older and perhaps far more developed than us They show how life arrived on our planet in the form of interstellar dust containing alien bacteria approximately 3.8 billion years ago and how later comets meteoroids and asteroids brought new bacterial and viral genetic material which was vital for evolution Using the latest advances in physics cosmology and neuroscience the authors explore how universal knowledge may be stored in human DNA and cells and they postulate that ancient cultures such as the pyramid builders of Egypt and the temple builders of India may have known a way to retrieve this knowledge Sharing new discoveries from experienced architects engineers and mathematicians they show how the Great Pyramid is a three dimensional mathematical equation in stone bearing a potent message for humanity across time and space about who we are and where we come from

tragedy associated with Cleopatra's needle on the Embankment of the River Thames *Antiquity Imagined* Robin Derricourt, 2015-06-26 Outsiders have long attributed to the Middle East and especially to ancient Egypt meanings that go way beyond the rational and observable. The region has been seen as the source of civilization, religion, the sciences and the arts but also of mystical knowledge and outlandish theories whether about the Lost City of Atlantis or visits by alien beings. In his exploration of how its past has been creatively interpreted by later ages, Robin Derricourt surveys the various claims that have been made for Egypt, particularly the idea that it harbours an esoteric wisdom vital to the world's survival. He looks at alternative interpretations of the pyramids, from maps of space and time to landing markers for UFOs, to images of the Egyptian mummy and at the popular mythology of the pharaoh's curse and at imperialist ideas of racial superiority that credited Egypt with spreading innovations and inventions as far as the Americas, Australia and China. Including arcane ideas about the Lost Ten Tribes of biblical Israel, the author enlarges his focus to include the Levant. His book is the first to show in depth how ancient Egypt and the surrounding lands have so continuously and seductively tantalised the Western imagination.

Esoteric Egypt J. S. Gordon, 2015-01-30 A study of the 100 000 year old spiritual science of ancient Egypt. Examines the metaphysical structure of our universe as seen by the ancient Egyptians, Greeks and Celts, showing that each is based on the same central concepts from time immemorial. Reveals that the ancient Egyptians believed in reincarnation and a spiritual evolutionary process. Explains the connections between the movements of Orion and Sirius and the story of Osiris and Isis, the importance of the Pleiades and circumpolar stars to the Egyptians and the fundamental unity of the Egyptian pantheon. Investigates the people who colonized greater Egypt 100 000 years ago, descendants of the Atlanteans. In *Esoteric Egypt*, J. S. Gordon reveals how the sacred science and wisdom tradition of ancient Egypt, the Land of Khem, stems from an advanced prehistoric worldwide civilization. Examining the metaphysical structure of our universe as seen by the ancient Egyptians, Greeks and Celts, he shows that each tradition is merely a variation on the central concepts of the precession of the equinoxes and the obliquity of the ecliptic pole. He explores the connections between the cyclical movements of Orion and Sirius and the story of Osiris and Isis, the importance of the Pleiades and the circumpolar stars and the ancient tradition of man as a divine being born from the substance of the stars. He investigates the people who colonized greater Egypt 100 000 years ago, the progenitors of ancient Egyptian civilization, descended from the 4th and 5th Root Race, Atlanteans. Gordon explores the magical and esoteric meanings behind Egyptian sacred ritual and temple art, drawing parallels to the Mystery School process of initiation. Explaining the fundamental unity of the Egyptian pantheon and the structure of the after-death state, he shows that the Egyptians clearly believed in reincarnation and a spiritual evolutionary process. Revealing the ancient sacred science of the Land of Khem, teachings passed down from the earliest times, he examines the psychospiritual nature of the human being and the function of our spiritual identity and our souls.
