Orozco El Mito:

Mexican Murals in Times of Crisis Bruce Campbell, 2022-08-16 Murals have been an important medium of public expression in Mexico since the Mexican Revolution and names such as Diego Rivera David Alfaro Siqueiros and Jos Clemente Orozco will forever be linked with this revolutionary art form Many people however believe that Mexico's renowned mural tradition died with these famous practitioners and today's mural artists labor in obscurity as many of their creations are destroyed through hostility or neglect This book traces the ongoing critical contributions of mural arts to public life in Mexico to show how postrevolutionary murals have been overshadowed both by the Mexican School and by the exclusionary nature of official public arts By documenting a range of mural practices from fixed site murals to mantas banner murals to graffiti Bruce Campbell evaluates the ways in which the practical and aesthetic components of revolutionary Mexican muralism have been appropriated and redeployed within the context of Mexico's ongoing economic and political crisis Four dozen photographs illustrate the text Blending ethnography political science and sociology with art history Campbell traces the emergence of modern Mexican mural art as a composite of aesthetic discursive and performative elements through which collective interests and identities are shaped He focuses on mural activists engaged combatively with the state in barrios unions and street protests to show that mural arts that are neither connected to the elite art world nor supported by the government have made significant contributions to Mexican culture Campbell brings all previous studies of Mexican muralism up to date by revealing the wealth of art that has flourished in the shadows of official recognition His work shows that interpretations by art historians preoccupied with contemporary high art have been incomplete and that a rich mural tradition still survives and thrives in Mexico

Compromised Positions Katherine Elaine Bliss, 2010-11-01 To illuminate the complex cultural foundations of state formation in modern Mexico *Compromised Positions* explains how and why female prostitution became politicized in the context of revolutionary social reform between 1910 and 1940 Focusing on the public debates over legalized sexual commerce and the spread of sexually transmitted disease in the first half of the twentieth century Katherine Bliss argues that political change was compromised time and again by reformers' own antiquated ideas about gender and class by prostitutes' outrage over official attempts to undermine their livelihood and by clients' unwillingness to forgo visiting brothels despite revolutionary campaigns to promote monogamy sexual education and awareness of the health risks associated with sexual promiscuity In the Mexican public's imagination the prostitute symbolized the corruption of the old regime even as her redemption represented the new order's potential to dramatically alter gender relations through social policy Using medical records criminal case files and letters from prostitutes and their patrons to public officials *Compromised Positions* reveals how the contradictory revolutionary imperatives of individual freedom and public health clashed in the effort to eradicate prostitution and craft a model of morality suitable for leading Mexico into the modern era

Post-conflict Colombia and the Global Circulation of Military Expertise Manuela Trindade Viana, 2022-05-14 By challenging more common analyses that point to the existence of a post conflict scenario in Colombia

and those that resist the narrative of success both of which operate within the logic of presence absence of violence this book proposes instead that we think of post conflict in terms of the transformation of the rules on the use of violence The analysis unfolds in two parts the first explores the conditions of possibility of the Colombian success story and the web of criteria legitimizing the success as well as the silencing mechanisms allowing for Colombia to circulate internationally as a formula to be replicated in other parts of the world the second focuses on the historicization of the mechanisms through which new rules are transmitted among the professionals of the public force specifically the transformations of military schools and training centers in Colombia from times of war to peace The author argues that key to this transformation is a unique discursive articulation around the military professional which slides from citizen soldier to expert soldier
