Orthopaedics In Primary Care:

Orthopaedics in Primary Care William Hamilton, 2005 Orthopaedic complaints make up a large part of a general practitioner's workload. Few doctors will complete a surgery without one patient at least presenting an orthopaedic problem. Furthermore, as the population ages, the so-called degenerative conditions will continue to increase, as with most conditions, the large majority of orthopaedic complaints are managed entirely in primary care. This book aims to help primary care clinicians to diagnose and treat these complaints and to assist in identifying the small number who would benefit from referral to a specialist. It has been written to cater for both clinicians in training and for those who are already in practice. Every chapter has been completely rewritten since the first edition. A new chapter on sports medicine. A new chapter posing a range of orthopaedic questions in short answer format to mimic the MRCGP exam. *Office Orthopedics for Primary Care:*
