Langenscheidt, 2009-05-26 Now fully revised and updated and featuring more than 55 000 entries these foreign language dictionaries feature hundreds of new words reflecting today's cultural political and technological changes plus contemporary idioms and expressions Revised reissue Studies in Temporal Urbanism Fabian Neuhaus, 2011-08-04 This book is very much about what the name urbanTick literally says about the ticking of the urban the urban as we experience it everyday on the bus in the park or between buildings It is about the big orchestrated mass migration of commuters the seasonal blossoms of the trees along the walkway and the frequency of the stamping rubbish eater trucks It is also not to forget about climate infrastructure opening hours term times parking meters time tables growing shadows and moon light But most of all it is about how all this is experienced by citizens on a daily basis and how they navigate within this complex structure of patterns The content of this book is based on the content of the urbanTick blog between 2008 2010 One year blogging about this topic

brought together a large collection of different aspects and thoughts It is not at all a conclusive view the opposite might be the case it is an exploratory work in progress while trying to capture as many facets of the topic as possible Einstein's Clocks and Poincare's Maps: Empires of Time Peter Galison, 2004-09-17 More than a history of science it is a tour de force in the genre New York Times Book Review A dramatic new account of the parallel quests to harness time that culminated in the revolutionary science of relativity Einstein's Clocks Poincaré's Maps is part history part science part adventure part biography part meditation on the meaning of modernity In Galison's telling of science the meters and wires and epoxy and solder come alive as characters along with physicists engineers technicians and others Galison has unearthed fascinating material New York Times Clocks and trains telegraphs and colonial conquest the challenges of the late nineteenth century were an indispensable real world background to the enormous theoretical breakthrough of relativity And two giants at the foundations of modern science were converging step by step on the answer Albert Einstein an young obscure German physicist experimenting with measuring time using telegraph networks and with the coordination of clocks at train stations and the renowned mathematician Henri Poincaré president of the French Bureau of Longitude mapping time coordinates across continents Each found that to understand the newly global world he had to determine whether there existed a pure time in which simultaneity was absolute or whether time was relative Esteemed historian of science Peter Galison has culled new information from rarely seen photographs forgotten patents and unexplored archives to tell the fascinating story of two scientists whose concrete professional preoccupations engaged them in a silent race toward a theory that would conquer the empire of time Space and Time Hermann Minkowski, 2013-08-27 This is the first publication in German or English of Hermann Minkowski's three papers on relativity together The Relativity Principle lecture given at the meeting of the Göttingen Mathematical Society on November 5 1907 This is the first English translation The Fundamental Equations for Electromagnetic Processes in Moving Bodies lecture given at the meeting of the Göttingen Scientific Society on December 21 1907 New translation Space and Time lecture given at the 80th Meeting of Natural Scientists in Cologne on September 21 1908 New translation *German*, 1999 A German phrasebook laid out dictionary style for easy access It includes English German and German English sections and a menu reader Feature boxes contain cultural know how and other matters where language is important like making a phone call **Minkowski Spacetime: A Hundred Years Later** Vesselin Petkov, 2010-03-11 Celebrating the one hundredth anniversary of the 1909 publication of Minkowski's seminal paper Space and Time this volume includes a fresh translation as well as the original in German and a number of contributed papers on the still controversial subject *Ether and Modernity* Jaume Navarro, 2018-08-30 Ether and Modernity offers a snapshot of the status of an epistemic object the ether or aether in the early twentieth century The contributed papers show that the ether was often regarded as one of the objects of modernity hand in hand with the electron radioactivity or X rays and not simply as the stubborn residue of an old fashioned long discarded science The prestige and authority of scientists and

popularisers like Oliver Lodge and Arthur Eddington in Britain Phillip Lenard in Germany or Dayton C Miller in the USA was instrumental in the preservation defence or even re emergence of the ether in the 1920s Moreover the consolidation of wireless communications and radio broadcasting indeed a very modern technology brought the ether into audiences that would otherwise never have heard about such an esoteric entity The ether also played a pivotal role among some artists in the early twentieth century the values of modernism found in the complexities and contradictions of modern physics such as wireless action or wave particle puzzles a fertile ground for the development of new artistic languages in literature as much as in the pictorial and performing arts Essays on the intellectual foundations of Umberto Boccioni s art the linguistic techniques of Lodge and Ernst Mach s considerations on aesthetics and physics witness to the imbricate relationship between the ether and modernism Last but not least the ether played a fundamental part in the resurgence of modern spiritualism in the aftermath of the Great War This book examines the complex array of meanings strategies and milieus that enabled the ether to remain an active part in scientific and cultural debates well into the 1930s but not beyond This portrait may be easily regarded as the swan song of an epistemic object that was soon to fade away as shown by Paul Dirac s unsuccessful attempt to resuscitate some kind of aether in 1951 with which this book finishes

The Scientific Correspondence of H.A. Lorentz A.J. Kox,2008-09-18 This volume presents a selection of 434 letters from and to the Dutch physicist and Nobel Prize winner Hendrik Antoon Lorentz 1853 1928 covering the period from 1883 until a few months before his death in February 1928 The sheer size of the available correspondence approximately 6000 letters from and to Lorentz preclude a full publication The letters included in this volume have been selected according to various criteria the most important of which is scientific importance A second criterion has been the availability of letters both from and to Lorentz so that the reader can follow the exchange between Lorentz and his correspondent Within such correspondences a few unimportant items dealing with routine administrative or organizational matters have been omitted An exception to the scientific criterion is the exchange of letters between Lorentz and Albert Einstein Max Planck Woldemar

Voigt and Wilhelm Wien during World War I these letters have been included because they shed important light on the disruption of the scientific relations during the war and on the political views of these correspondents as well as of Lorentz similar reasons the letters exchanged with Einstein and Planck on post war political issues have been included Biographical sketch Hendrik Antoon Lorentz was born on July 18 1853 in the Dutch town of Arnhem He was the son of a relatively well to do owner of a nursery

Poincaré, Einstein and the Discovery of Special Relativity Jean-Marc Ginoux,2024-04-16 1905 is probably the best known year in physics since it was the year of the discovery of the special theory of relativity For decades historiography has told us that Albert Einstein then a patent examiner in Bern succeeded in developing this theory on his own overcoming all the difficulties that the greatest scientists of his time had not been able to solve However some have pointed out that before Einstein's first publication in this field the French mathematician and physicist Henri Poincaré had obtained the same results which he had published several months before Einstein Yet today this theory is known as Einstein's special theory of relativity Thus considering the indisputable anteriority of Poincaré's contributions there is only one real question that needs to be answered Why didn't Poincaré claim the authorship of special theory of relativity After recapping on the ideas and concepts of the special theory of relativity in a manner accessible to non specialists and recalling the historical context of the discovery of this theory we will answer this question and thus put finally an end to this long running controversy

Dictionary of Business, Commerce and Finance Worterbuch Fur Wirtschaft, Handel und Finanzen Sinda Lopez, 2019-07-12
First published in 2002 The German Dictionary of Business Commerce and Finance is the second dictionary to be published in Routledge's programme of bilingual business dictionaries The series was launched in December 1995 with the French Dictionary of Business Commerce and Finance It would not have been possible to compile this dictionary within a relatively short timescale and to the standard achieved without the use of a highly sophisticated custom designed database The database's most significant feature is that it is designed as a relational database term records for each language are held in separate files with further files consisting only of link records Links between terms in different language files represent translations enabling us to handle various types of one to many and many to one equivalences Links between terms within a single language file represent crossreferences between geographical variants and abbreviations The content of the database for this dictionary was created in three principal phases A considerable proportion of the English term list was already available following the publication of the French Dictionary of Business Commerce and Finance The term list was then sent out to specialist translators with current practical experience of business translation who supplied German equivalences and expanded the English and German term lists to include the main relevant terminology in their particular spheres of work

Embracing the Track of Expression: An Mental Symphony within **Ortszeitlocal Time**

In a world eaten by monitors and the ceaseless chatter of quick conversation, the melodic elegance and emotional symphony produced by the prepared term frequently diminish into the background, eclipsed by the constant sound and disruptions that permeate our lives. However, set within the pages of **Ortszeitlocal Time** a wonderful fictional value filled with organic feelings, lies an immersive symphony waiting to be embraced. Constructed by an elegant musician of language, this captivating masterpiece conducts readers on an emotional journey, well unraveling the hidden songs and profound influence resonating within each cautiously crafted phrase. Within the depths of this poignant analysis, we shall discover the book is central harmonies, analyze its enthralling writing design, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
