**Bibliography of Business History** Francis Goodall,Terry Gourvish,Steven Tolliday,2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving

links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians

**Frank McClean** Philip Jarrett, 2011-07-13 During aviations pioneering years Francis Kennedy McClean used his vast inherited wealth to help the now famous Short Brothers company become established as one of Britains greatest aircraft manufacturers and in doing so he helped the Royal Navys first pilots into the air In effect he was Godfather to British naval aviation But McClean did much more than even that He was himself a balloonist and pioneer aviator flying with Wilbur Wright in France in December 1908 He provided the Royal Aero Club with one of the first flying grounds in the UK personally purchased no fewer than sixteen aeroplanes from Short Brothers before the First World War and also acted as the companys unpaid test pilot Convinced that aviation was destined to play a vital role in the nations defence he made his own aeroplanes freely available for training and ensured that the Navy had a suitable site from which to fly founding Englands first naval flying school at Eastchurch in Kent His flight up the Thames to Westminster on 10 August 1912 during which he flew between the upper and lower spans of Tower Bridge and passed beneath the other bridges caught the public imagination but despite all these achievements he remained unassuming modest and reticent This is a fascinating and informative account of McCleans great influence on early aviation and his achievements and significant contribution to naval aviation are revealed here for the first time

Force on 1 April 1918 Britain created the world's first independent air service Britain entered the First World War with less than 200 ill assorted flying machines divided between the army and the navy but by the end of the war the RAF mustered almost 300 000 personnel and 22 000 aircraft Originally published in 1986 more than 65 years after the event the decision to form the RAF remained poorly understood and Malcolm Cooper presented the first detailed modern analysis of its creation shedding new light on the process by which Britain entered the air age Set against the background of the build up of air power during the First World War the book explains how deepening political concern at failures in home air defence public demands for retaliatory air action against Germany problems of mobilization and expansion in the aircraft industry and disagreements between the existing army and navy air services combined to create the conditions for an independent air force The author argues that the pressures of war were insufficient to give real substance to the RAF's independence and that its failure to escape from its wartime role as an ancillary service was also of crucial significance in the evolution of British air strategy in later years Based on an extensive study of official documents and private papers and amply illustrated with contemporary photographs this title will prove invaluable in understanding both strategic thinking in the Great War and the early development of a form of warfare which dominated military and naval operations in the twentieth century A Modern History of the English People Richard Henry Gretton,1929 **Country Life** ,1909 **The Life of the Automobile** Steven Parissien,2014-05-13 The Life of the Automobile is the first comprehensive world history of the car The automobile has arguably shaped the modern era more profoundly than any other human invention and author Steven Parissien examines the impact development and significance of the automobile over its turbulent and colorful 130 year history Readers learn the grand and turbulent history of the motor car from its earliest appearance in the 1880s as little more than a powered quadricycle and the innovations of the early pioneer carmakers The author examines the advances of the interwar era the Golden Age of the 1950s and the iconic years of the 1960s to the decades of doubt and uncertainty following the oil crisis of 1973 the global mergers of the 1990s the bailouts of the early twenty first century and the emergence of the electric car This is not just a story of horsepower and performance but a tale of extraordinary people of intuitive carmakers such as Karl Benz Sir Henry Royce Giovanni Agnelli Fiat Andr Citro n and Louis Renault of exceptionally gifted designers such as the eccentric Ohio born Chris Bangle BMW and of visionary industrialists such as Henry Ford Ferdinand Porsche the Volkswagen Beetle and Gene Bordinat the Ford Mustang among numerous other game changers Above all this comprehensive history demonstrates how the epic story of the car mirrors the history of the modern era from the brave hopes and soaring ambitions of the early twentieth century to the cynicism and ecological concerns of a century later Bringing to life the flamboyant entrepreneurs shrewd businessmen and gifted engineers that worked behind the scenes to bring us horsepower and performance The Life of the Automobile is a globe spanning account of the auto industry that is sure to rev the engines of entrepreneurs and gearheads alike *Dictionary of National Biography: Neil-Young* ,1912
