Johnston,Attilio Mastrocinque,2016-08-17 This volume brings together a variety of approaches to the different ways in which the role of animals was understood in ancient Greco Roman myth and religion across a period of several centuries from Preclassical Greece to Late Antique Rome Animals in Greco Roman antiquity were thought to be intermediaries between men and gods and they played a pivotal role in sacrificial rituals and divination the foundations of pagan religion The studies in the first part of the volume examine the role of the animals in sacrifice and divination The second part explores the similarities between animals on the one hand and men and gods on the other Indeed in antiquity the behaviour of several animals was perceived to mirror human behaviour while the selection of the various animals as sacrificial victims to specific deities often was determined on account of some peculiar habit that echoed a special attribute of the particular deity The last part of this volume is devoted to the study of animal metamorphosis and to this end a number of myths that associate various animals with transformation are examined from a variety of perspectives **Myths And Legends Of Ancient Greece And Rome** E. *The Myths and Legends of Ancient Greece and Rome* E. M. Berens,2011-08-18 Greek mythology is the body of myths and legends belonging to the ancient Greeks concerning their gods and heroes the nature of the world and the origins and significance of their own cult and ritual practices They were a part of religion in ancient Greece Modern scholars refer to the myths and study them in an attempt to throw light on the religious and political institutions of Ancient Greece its civilization and to gain understanding of the nature of myth making itself In Ancient Roman times a new Roman mythology was born through syncretization of numerous Greek and other foreign gods This occurred because the Romans had little mythology of their own and inheritance of the Greek mythological tradition caused the major Roman gods to adopt characteristics of their Greek equivalents The gods Zeus and Jupiter are an example of this mythological overlap In addition to the combination of the two mythological traditions the association of the Romans with eastern religions led to further syncretizations For instance the cult of Sun was introduced in Rome after Aurelian s successful campaigns in Syria The Asiatic divinities Mithras that is to say the Sun and Ba al were combined with Apollo and Helios into one Sol Invictus with conglomerated rites and compound attributes Apollo might be increasingly identified in religion with Helios or even Dionysus but texts retelling his myths seldom reflected such developments The traditional literary mythology was increasingly dissociated from actual religious practice

On the myth that is related to the founding of Rome is the tale of how the Trojan prince Aeneas arrived in Italy after fleeing the city of Troy. The hero's journey continued until he landed in an area southwest of where Rome stands today. Aeneas met King Latinus, who sought to end the war he had begun with Turnus before Aeneas's arrival. Turnus intended to kill Aeneas, and a line from the start of the Aeneid by Virgil describes how Aeneas was forced to become a virgin, but eventually the mother of Romulus and Remus. The myth of the story related to the founding of Rome with the twins Romulus and Remus, who were abandoned and raised by a wolf and eventually found and tamed by a she-wolf. As adults, they killed their grandfather, who had ordered them to kill their infants. They decided to build a city, Rome, but had a fight, and Remus was killed by Romulus.
