## **Roman Syria And The Near East:**

Roman Syria and the Near East Kevin Butcher, 2003 Table of contents      **Near Eastern Cities from Alexander to the Successors of Muhammad** Walter D. Ward, 2019-07-10 Near Eastern Cities from Alexander to the Successors of Muhammad compares the evolution of several cities in the Near East from the time of Alexander the Great until the beginning of the Islamic Abbasid Dynasty This volume examines both archaeological remains and literary sources to explain the diversity of imperial cultural and religious influences on urban life It offers several case studies chosen from different regions of the Roman Near East demonstrating that Greco Roman and Islamic culture spread unevenly through these various cities and that it is impossible to make broad generalizations It argues instead that there were different patterns of urbanism that demonstrate a continued vitality of civic life up to the Abbasid revolution Near Eastern Cities from Alexander to the Successors of Muhammad will be of particular interest to students of this period in the Ancient Near East as well as those studying ancient cities and everyday life      *The Oxford Handbook of the Hellenistic and Roman Near East* Rubina Raja, 2025 The Near East during the Hellenistic and Roman periods has been studied for centuries This Handbook includes fifty chapters written by experts from a variety of disciplines archaeology including classical near eastern and Islamic ancient history anthropology art history data and network science epigraphy and historiography Together these chapters shed a fresh light on the vast regions that made up Hellenistic and later Roman Syria and the Near East The material and written evidence from the region is considered side by side with historical sources as well as scientific data coming out of archaeological science and network science and shows how new knowledge about the region can be brought to the forefront of current literature on the subject The dynamic volatile diverse and culturally rich regions that this volume focuses on have left an abundant cultural heritage and in many places these regions are under constant threat In this Handbook knowledge about the newest research on a myriad of these regions sites and locations is highlighted together with overviews of the centuries long history of research The Handbook is essential for students scholars and the archaeologically inclined reader and constitutes the definitive collection of current research in the field      The Near East, 1916      **Testing the Canon of Ancient Near Eastern Art and Archaeology** Amy Gansell, Ann Shafer, 2020-01-06 This book considers the Greatest Hits of ancient Near Eastern art and archaeology including canonical objects sites and monuments from Egypt the Levant Turkey Syria Iraq and Iran from the prehistoric era through the Classical period Gansell Shafer and their contributors investigate the factors that have made these historical artifacts so well known for so long By questioning the canon this book allows readers to better reflect on the range of ancient Near Eastern culture and revise the canon so it can accommodate new discoveries represent the values of heritage communities and remain relevant to contemporary and future audiences

**Understanding Syria through 40 Monuments** Ross Burns, 2024-06-27 How can a nation's archaeological treasures help explain its history especially one as richly complex as Syria's Ross Burns chooses 40 among Syria's outstanding range of

sites accompanied by over 200 colour illustrations to take the reader through the tangled paths of this crossroads of the eastern Mediterranean where numerous world cultures intersected Given the last 12 years of savage conflict the author reports too on the plight of many of these monuments addressing the common but unhelpful assumption that much of the country's archaeological treasures have been destroyed A better approach is to recognise that Syria's heritage can play a role in the country's recovery and cannot simply be declared a write off This is a history which tells us much about how Syria's mixture of traditions defy simplistic categorisation through modern definitions of cultures and identities **The New**

**Cambridge History of Islam: Volume 1, The Formation of the Islamic World, Sixth to Eleventh Centuries** Chase F. Robinson, 2010-11-04 Volume One of The New Cambridge History of Islam which surveys the political and cultural history of Islam from its Late Antique origins until the eleventh century brings together contributions from leading scholars in the field The book is divided into four parts The first provides an overview of the physical and political geography of the Late Antique Middle East The second charts the rise of Islam and the emergence of the Islamic political order under the Umayyad and the Abbasid caliphs of the seventh eighth and ninth centuries followed by the dissolution of the empire in the tenth and eleventh Regionalism the overlapping histories of the empire's provinces is the focus of Part Three while Part Four provides a cutting edge discussion of the sources and controversies of early Islamic history including a survey of numismatics archaeology and material culture **The Oxford Handbook of Palmyra** Rubina Raja, 2024 With contributions from thirty archaeologists

epigraphists historians and philologists this book covers Palmyra's archaeological remains and history from its earliest phases in the pre Roman era to the destruction of many of its monuments during the Syrian Civil War and subsequent looting The authors give comprehensive overviews of already published evidence as well as significant new findings and analyses from fieldwork and cover a broad range of themes which not only relate to the archaeology and history of the site but also to its relationship with the rest of the ancient world as a major trade hub during the Roman period Palmyrena: City,

Hinterland and Caravan Trade between Orient and Occident Jørgen Christian Meyer, Eivind Heldaas Seland, Nils

Anfinset, 2016-04-18 The contributions to this volume address the archaeology and history of the ancient Syrian city of

Palmyra Pageants and Processions Herman du Toit, 2009-10-02 Nowadays pageants often take the form of parades of effervescent young women competing for popular recognition in hyped up media events However these beauty pageants are a mere pastiche of the elaborate historical parades of the medieval period that took significant social religious or civic events and their protagonists as subjects Pageants were historically characterized by resplendent costuming and elaborate processions that were often given to much pomp and ceremony Pageantry has formed an important part of the civic life of most societies both ancient and modern serving a variety of cultural and political purposes The use of drama and public spectacle as an instrument of civic social and religious activism has recently become the focus of renewed academic inquiry The essays in this interdisciplinary anthology provide carefully researched insights into the phenomenon of pageantry over

the centuries and across broad cultural boundaries      *The Emergence of Islam in Late Antiquity* 'Azīz 'Azmah, 2014-03-06 A comprehensive and innovative reconstruction of the emergence of early Muslim religion and polity in their historical religious and ethnological contexts Intended principally for scholars of late antiquity Islamic studies and the history of religions the book opens up many novel directions for future research      *The Oxford Handbook of the Second Sophistic* Daniel S. Richter, William A. Johnson, 2017-10-24 Focusing on the period known as the Second Sophistic an era roughly co extensive with the second century AD this Handbook serves the need for a broad and accessible overview The study of the Second Sophistic is a relative new comer to the Anglophone field of classics and much of what characterizes it temporally and culturally remains a matter of legitimate contestation The present handbook offers a diversity of scholarly voices that attempt to define as much as is possible in a single volume the state of this rapidly developing field Included are chapters that offer practical guidance on the wide range of valuable textual materials that survive many of which are useful or even core to inquiries of particularly current interest e g gender studies cultural history of the body sociology of literary culture history of education and intellectualism history of religion political theory history of medicine cultural linguistics intersection of the Classical traditions and early Christianity The Handbook also contains essays devoted to the work of the most significant intellectuals of the period such as Plutarch Dio Chrysostom Lucian Apuleius the novelists the Philostrati and Aelius Aristides In addition to content and bibliographical guidance however this volume is designed to help to situate the textual remains within the period and its society to describe and circumscribe not simply the literary matter but the literary culture and societal context For that reason the Handbook devotes considerable space at the front to various contextual essays and throughout tries to keep the contextual demands in mind In its scope and in its pluralism of voices this Handbook thus represents a new approach to the Second Sophistic one that attempts to integrate Greek literature of the Roman period into the wider world of early imperial Greek Latin Jewish and Christian cultural production and one that keeps a sharp focus on situating these texts within their socio cultural context      *Rome's Eastern Trade* Gary K. Young, 2003-10-04 Utilising new archaeological research the author questions the traditionally held view that the imperial government had a strong political interest in eastern trade Instead he argues that their primary motivation was the tax income      **The Near East** Arthur Cotterell, 2017-08-15 This ambitious and wide ranging popular history is the first narrative account of the entire Near East Turkey Iraq Syria Lebanon Jordan Israel Saudi Arabia and the Gulf States from the genesis of civilization in the fourth millennium BCE until modern times It provides an historical outline of the civilizations and cultures that dominated the region one that has had an immense impact on the development of humankind ever since the ancient Sumerians invented urban living and writing around 3200 BCE Later the Babylonians and the Assyrians built upon the Sumerian legacy They were the world's earliest great powers whose actions in the cradle of monotheism influenced Judaism and eventually Christianity and Islam The Near East discusses the long eras of Arab Persian and Ottoman rule and the destabilizing

intervention of Western colonial powers Cotterell's book is a timely reminder of how historical events have shaped the outlooks of various peoples just as political turbulence in the Near East is challenging both neighboring countries and the wider world     The Hellenistic Settlements in the East from Armenia and Mesopotamia to Bactria and India Getzel M. Cohen, 2013-06-02 This is the third volume of Getzel Cohen's important work on the Hellenistic settlements in the ancient world Through the conquests of Alexander the Great his successors and others Greek and Macedonian culture spread deep into Asia with colonists settling as far away as Bactria and India In this book Cohen provides historical narratives detailed references citations and commentaries on all the Graeco Macedonian settlements founded or refounded in the East Organized geographically Cohen pulls together discoveries and debates from dozens of widely scattered archaeological and epigraphic projects making a distinct contribution to ongoing questions and opening new avenues of inquiry     Sinews of Empire Eivind Seland, Hakon Teigon, 2017-06-30 A recent surge of interest in network approaches to the study of the ancient world has enabled scholars of the Roman Empire to move beyond traditional narratives of domination resistance integration and fragmentation This relational turn has not only offers tools to identify map visualize and in some cases even quantify interaction based on a variety of ancient source material but also provides a terminology to deal with the everyday ties of power trade and ideology that operated within below and beyond the superstructure of imperial rule Thirteen contributions employ a range of quantitative qualitative and descriptive network approaches in order to provide new perspectives on trade communication administration technology religion and municipal life in the Roman Near East and adjacent regions     Great Britain and the East , 1928     The Prestige Language of Christianity in the Book of Acts Sung Min Park, 2025-04-07 Researching ancient languages is notoriously difficult in sociolinguistics due to the scarcity of data This challenge is addressed by utilizing recent sociolinguistic theories and models to investigate the prestige languages used by early Christians in Acts Drawing on historical documents archaeology and inscriptions this study reconstructs the complex multilingual settings of the time It reveals how Greek despite the diverse linguistic landscape became the dominant language in nearly all official contexts of early Christianity This work breaks new ground in understanding early Christian communities and their linguistic practices offering historical sociolinguistic approaches to the study of ancient languages and societies

**Community and Identity at the Edges of the Classical World** Aaron W. Irvin, 2020-09-28 A timely and academically significant contribution to scholarship on community identity and globalization in the Roman and Hellenistic worlds Community and Identity at the Edges of the Classical World examines the construction of personal and communal identities in the ancient world exploring how globalism multi culturalism and other macro events influenced micro identities throughout the Hellenistic and Roman empires This innovative volume discusses where contact and the sharing of ideas was occurring in the time period and applies modern theories based on networks and communication to historical and archaeological data A new generation of international scholars challenge traditional views of Classical history and offer

original perspectives on the impact globalizing trends had on localized areas insights that resonate with similar issues today This singular resource presents a broad multi national view rarely found in western collected volumes including Serbian Macedonian and Russian scholarship on the Roman Empire as well as on Roman and Hellenistic archaeological sites in Eastern Europe Topics include Egyptian identity in the Hellenistic world cultural identity in Roman Greece Romanization in Slovenia Balkan Latin the provincial organization of cults in Roman Britain and Soviet studies of Roman Empire and imperialism Serving as a synthesis of contemporary scholarship on the wider topic of identity and community this volume Provides an expansive materialist approach to the topic of globalization in the Roman world Examines ethnicity in the Roman empire from the viewpoint of minority populations Offers several views of metascholarship a growing sub discipline that compares ancient material to modern scholarship Covers a range of themes time periods and geographic areas not included in most western publications Community and Identity at the Edges of the Classical World is a valuable resource for academics researchers and graduate students examining identity and ethnicity in the ancient world as well as for those working in multiple fields of study from Classical Hellenistic and Roman historians to the study of ethnicity identity and globalizing trends in time

**The Assyrian Genocide** Hannibal Travis, 2017-07-20 For a brief period the attention of the international community has focused once again on the plight of religious minorities in Iraq Syria and Turkey In particular the abductions and massacres of Yezidis and Assyrians in the Sinjar Mosul Nineveh Plains Baghdad and Hasakah regions in 2007 2015 raised questions about the prevention of genocide This book while principally analyzing the Assyrian genocide of 1914 1925 and its implications for the culture and politics of the region also raises broader questions concerning the future of religious diversity in the Middle East It gathers and analyzes the findings of a broad spectrum of historical and scholarly works on Christian identities in the Middle East genocide studies international law and the politics of the late Ottoman Empire as well as the politics of the Ottomans British and Russian rivals for power in western Asia and the eastern Mediterranean basin A key question the book raises is whether the fate of the Assyrians maps onto any of the concepts used within international law and diplomatic history to study genocide and group violence In this light the Assyrian genocide stands out as being several times larger in both absolute terms and relative to the size of the affected group than the Srebrenica genocide which is recognized by Turkey as well as by international tribunals and organizations Including its Armenian and Greek victims the Ottoman Christian Genocide rivals the Rwandan Bengali and Biafran genocides The book also aims to explore the impact of the genocide period of 1914 1925 on the development or partial unraveling of Assyrian group cohesion including aspirations to autonomy in the Assyrian areas of northern Iraq northwestern Iran and southeastern Turkey Scholars from around the world have collaborated to approach these research questions by reference to diplomatic and political archives international legal materials memoirs and literary works
