Gregorio,2005 The Naturalists wrote from a scientific point of view and no science had more currency in society in the late nineteenth century than Darwin's theory of evolution Until now this motif in Guy de Maupassant has escaped critical attention Maupassant's Fiction and the Darwinian View of Life examines evolutionary theory in the literature in a way accessible to students of literature and science alike It first explains the theoretical basis and Maupassant's affinity for it then studies one short story La Ficelle in its entirety proposing a new and interesting interpretation based on evidence read through a Darwinian lens The remaining chapters organize a lively Darwinian reading of Maupassant according to topics such as natural selection heredity and materialism The book shows that Darwinism and the economic variety of Social Darwinism figure significantly in Maupassant's fiction It is a must for students and teachers of Naturalism and Darwinism across the liberal arts **The Evolution of the French Novel, 1641-1782** Elaine Showalter,2016-04-19 In France between 1641 and 1782 the romance developed into the novel Mr Showalter's intensive study of the novel particularly during the critical period 1700-1720 shows that an important movement toward nineteenth century realism was taking place To trace this development the author has selected five phenomena time space names money and the narrator and follows their treatment throughout the period to show why romance tended toward the novel To show the working out of these ideas there is a detailed analysis of one novel Robert Challe's Les Illustres Françoises which can be precisely located in the chain of literary influence Its central theme of the individual in conflict with society was well suited to the forms available to the eighteenth century novelist Consequently it appears repeatedly in important novels of the period showing that the evolutionary process worked to some degree even on subject matter Originally published in 1972 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Stendhal, Sartre & la morale, ou, La revanche de Stendhal Paul Désalmand,2002 **Le Piège De Noirmoutier** Claude-Jean Siré,2013-06-17 Imaginez que le mur de Berlin ne soit pas vraiment tombé Au cœur d'une
