Classroom Management Serena Pariser, 2024-01-10 Teachers want concrete methods born of actual experience from other teachers. This thorough how-to book reveals actionable best practices of classroom management from award-winning teacher Serena Pariser. In it, she shares the strategies that helped her grow from a teary-eyed first-year teacher to Teacher of the Year, Fulbright Scholar, and now sought-after consultant. This new edition of a bestseller provides updated strategies based on some of the challenges and changes educators have faced over the past 5 years, particularly throughout the COVID-19 pandemic and sociocultural reckoning of the early 2020s. Filled with real experiences Pariser has had with students' real scripts she's used to redirect behavior and get the support of parents, real anecdotes, and real conversations she's had with students, this book weaves together research-based strategies that work and step-by-step instructions for implementation. By sharing authentic personal accounts of failures and successes, Serena paves the way for readers to become the skilled, confident, and connected teachers their students deserve. Departing from the traditional approach of teaching obedience, this book shares how to lift students' voices and increase their agency, build positive relationships in the classroom community with colleagues and with parents, plan instruction that truly engages learners' interests, and nurture independent and curious learners who are ready to be successful in school and their career. Rethinking Classroom Design Todd Finley, Blake

Wiggs, 2016-03-08 Have you ever entered a building or room for the first time and felt enhanced? Felt your body relax and spirit elevate? The effect of human-made environments on learners' brains is not subjective. According to research studies, we all have measurable responses to the design of a space. However, despite the many resources discussing how to decorate and design elementary school classrooms, few resources on middle and secondary level classroom design are available. This book fills that gap. Moreover, the purpose of this guide is to enhance learning spaces, boost student performances, and positively extend teachers' influence. Every instance where you make well-considered decisions about your classroom helps students lead self-actualized lives. This book will help you make those decisions by providing information about everything from students' favorite seating arrangements to what temperature is ideal for learning. And learners will feel that effort every time.

Teaching, 30 Years of My Life Brenda Tate Groat,2010-08-03 Teaching Thirty Years of My Life I think I wanted to be a teacher because I thought it was important I wanted to do something important I stayed teaching because much of the time it was fun and I was I never bored Think about the times you have watched a little kid do something miraculous amazing or hilarious Kids are fun to watch They surprise you and keep you young You cannot help but remember the good and hard times of growing up without actually having to do it over The flip side to this is the number of times you may have been annoyed with your own child teenager adult daughter or son and of course the times you were so angry you couldn t function Well multiply that feeling by seventy five kids each year for thirty years I d like to say a thing or two about state and federal mandated tests Actually I d like to say a lot Thus far no one has asked for my opinion but here it is The feds and the states want the public schools to be accountable Our society wants assurances the tax dollars they spend will produce educated kids I get it Side note The conspiracy part of my brain cannot help but wonder if the anti public school fringe has found a way to target the public school system and reduce tax dollars going to this endeavor Is it possible the people doling out the funds and the mandates for public schools are hoping for failure Or maybe they just have no clue as to what is needed to educate all of America s children not just a very few privileged children All our children must receive a great education if America wants to remain a worldwide powerhouse It s amazing to me all the talk about evaluating teachers on student test scores especially if that measurement is based on an arbitrary cut score 80 percent pass 79 percent fail Students are not piece parts Students cannot and should not be measured like bolts on an assembly line in tolerance out of tolerance People are multi dimensional A test will never tell us all that a child knows or doesn t know In the kindest words this idea of measuring students and evaluating teachers on a single high stakes test is very misguided More to the point this is a really stupid idea and a very dangerous practice Whatever happened to the notion All kids can learn but not always at the same time or same rate When did we ever want people in America to be the same We all benefit from our differences When I look over and reflect on the variety and diversity new buzz word of the decade of my fellow teachers not one of us is like the other Our teaching styles are vastly different We relate to students differently We relate with each other differently We all work together to teach and maximize our students time with us I

might be less annoyed if student improvement was used as a measure of teacher effectiveness Even this approach has major flaws A teacher has a student for nine months In my case students are thirteen or fourteen years old They have had thirteen or fourteen years of prior experiences and baggage before getting to me Five of those years school was not even a part of their lives Research tells us when kids come to school in kindergarten the variances are huge The thought is as a school we should be able to narrow the variances What actually happens is these variances increase Is the school or the teachers responsible for this No What is going on Teachers usually have students for about six to seven hours a day and 180 days a year In the state of Kansas this equates to at least 1116 hours each year Even if we as a nation ever went to year round school the number of days probably wouldn't increase significantly the days would just be spread out This might help might not Most of the research I've read is not conclusive one way or the other Time allocated for school learning amounts to just under twenty percent of the hours in a year 365 days Teachers can't
