Roots Of Radical Islam:

The Roots of Radical Islam Gilles Kepel, 2005 Gilles Kepel one of the world's leading experts on Islamist movements was amongst the first to identify Egypt as the cradle of contemporary Islamism This seminal work now with a new introduction gives a profoundly perceptive account of the foundations of today's radical Islamic organisations and offers compelling insights into the structure theory and tactics employed by the various groups as early as the 1970s in Egypt BOOK JACKET

The Muslim Brotherhood and its Quest for Hegemony in Egypt Annette Ranko, 2014-12-26 Annette Ranko analyses the Muslim Brotherhood's challenging of the Mubarak regime and the ensuing struggle between the two from 1981 to 2011 She furthermore traces how the group evolved throughout the process of that struggle She studies how the Brotherhood's portrayal of itself as an attractive alternative to the regime provoked the Mubarak regime to level anti Brotherhood propaganda in the state run media in order to contain the group's appeal amongst the public The author shows how the regime's portrayal of the Brotherhood and the Brotherhood's engagement with it have evolved over time and how this ideational interplay has combined with structural institutional aspects in shaping the group's behaviour and ideology

Scripts of Terror Benedict Wilkinson, 2020 How do terrorists resolve the tension between their ambitions and their often limited resources The Roots of Violent Islamist Extremism and Efforts to Counter it United States. Congress. Senate. Committee on Homeland Security and Governmental Affairs, 2009 **The (De)Legitimization of Violence in Sacred and Human Contexts** Muhammad Shafiq, Thomas Donlin-Smith, 2021-01-21 This book provides a multidisciplinary commentary on a wide range of religious traditions and their relationship to acts of violence Hate and violence occur at every level of human interaction as do peace and compassion Scholars of religion have a particular obligation to make sense out of this situation tracing its history and variables and drawing lessons for the future From the formative periods of the religious traditions to their application in the contemporary world the essays in this volume interrogate the views on violence found within the traditions and provide examples of religious practices that exacerbate or ameliorate situations of conflict

Origins of Political Extremism Manus I. Midlarsky, 2011-03-17 Political extremism is one of the most pernicious destructive and nihilistic forms of human expression During the twentieth century in excess of 100 million people had their lives taken from them as the result of extremist violence In this wide ranging book Manus I Midlarsky suggests that ephemeral gains together with mortality salience form basic explanations for the origins of political extremism and constitute a theoretical framework that also explains later mass violence Midlarsky applies his framework to multiple forms of political extremism including the rise of Italian Hungarian and Romanian fascism Nazism radical Islamism and Soviet Chinese and Cambodian communism Other applications include a rampaging military Japan Pakistan Indonesia and extreme nationalism in Serbia Croatia the Ottoman Empire and Rwanda Polish anti-Semitism after World War II and the rise of separatist violence in Sri Lanka are also examined **Empires of Dirt: Secularism, Radical Islam, and the Mere Christendom**

Alternative Douglas Wilson, 2016-11-08 As it self destructs the strategy of secularism the idea that nations can be religiously neutral is splitting between American exceptionalism and radical Islam American exceptionalism the belief that America is more than a nation is folly Radical Islam is obviously wrong as well but Muslims at least own the nature of the current cultural conflict You must follow somebody whether it s Allah the State or Jesus Christ This important and timely book is an analysis of the changing face of religion and politics and also an extended argument for Christian expression of faith in Jesus Christ This does not mean a withdrawal from politics to our own communities and churches Instead we Christians must take what we have learned from the wreck of secularism and build a Christendom of the New Foundation A network of nations bound together by a formal public civic acknowledgement of the lordship of Jesus Christ and the fundamental truth of the Apostles Creed

Violence in the Name of God Joel Hodge, 2020-01-23 This book traces the trajectory of militant jihadism to show how violence is more intentionally embraced as the centre of worship social order and ideology Undertaking an in depth analysis of militant jihadist groups and utilising the work of Ren Girard Joel Hodge argues that the extreme violence of militant jihadists is a response to modernity in two ways that have not been sufficiently explored by the existing literature Firstly it is a manifestation of the unrestrained and escalating state of desire and rivalry in modernity which militant jihadists seek to counter with extreme violence Secondly it is a response to the unveiling and discrediting of sacred violence which militant jihadists seek to reverse by more purposefully valorising sacred violence in what they believe to be jihad Relevant to anyone interested in Islam philosophy of religion theology and terrorism Violence in the Name of God imagines new ways of thinking about militancy in the name of Islam in the twenty first century

Sectarian Roots of Jihad Adib Abdulmajid, 2024-11-25 Sectarian Roots of Jihad Religious Conflicts in the Middle East examines the sectarian dimension of jihad and delves into the under researched sectarian inspired discursive employment of the notion by radical Islamist groups It explores the transformation of the basic Islamic principle of striving in the Path of God into a radical foundation upon which some of the most fanatic and atrocious organizations are based in terms of thought ideology discourse and course of action This book investigates sectarian based interpretations and connotations of jihad as a concept and practice by means of exploring similarities and differences between Sunni and Shia approaches to the notion and its fundamental principles It analyzes the way sectarian guided Islamist organizations employ jihad in their propaganda activities and exploit it as a brand to religiously legitimize their cause and emotionally manipulate the recipients of their ideological discourse It also delves into the development of sectarianism Islamism Salafism and Jihadism in order to scrutinize and analyze the rise of sectarian guided extremism in the Middle East

Social Roots of Violent Extremism Liana Maria Daher, Francesco Antonelli, Valeria Rosato, 2025-08-02 This volume examines the environments that enable radicalization and extremism today drawing from extensive European research based on the Horizon 2020 project PARTICIPATION Examining theoretical and practical studies the book analyzes how the erosion of institutional integration social participation and political stability

among marginalized groups can lead to feelings of deprivation alienation and self victimization In these environments individuals often from disadvantaged or immigrant backgrounds rebuild their identities through extremism finding a sense of belonging in radical and sometimes violent ideas that are easily accessible online The book further sheds light on this paradox of modern extremism while extremists embrace technological tools like digital platforms they reject core modern values such as personal freedom and cultural diversity This volume argues for innovative approaches to radicalization emphasizing prevention through the creation of inclusive social environments and critical dialogue on the role of digital technology in radical movements

The Islamic Law of War A. Al-Dawoody,2011-03-28 Al Dawoody examines the justifications and regulations for going to war in both international and domestic armed conflicts under Islamic law He studies the various kinds of use of force by both state and non state actors in order to determine the nature of the Islamic law of war *The Faceless Terrorist* Sophie Roche,2019-05-31 How could a person portrayed as a terrorist by the Tajik state also be seen as a mujahid fighter in Islam and be a cousin all at the same time Is this just a matter of perspective and conceptualization To believe in the protection of concepts to safeguard groups and individuals from the uncertain character of the world is to deny the existence of chance and the contradictions in life This book uses approaches from existential anthropology to enquire into the question of how concepts and experiences relate The focus is on the way the notions jihad mujahid and terrorism were used during a military intervention in Tajikistan in 2010 The book includes long term ethnographic material popular pamphlets on Islam and an internet analysis of the conflict offering new insights into how concepts and experiences relate Since the end of the Soviet Union the people from the republic Tajikistan have struggled to find a place in the larger Muslim world a painful process unfolding in relation to global events discourses and politics The primary readership for the book will come from academia

and policy makers The book presents novel material on a fascinating and highly important topic the nature of ostensibly Islamist political violence against the state in Tajikistan John Heathershaw Failed States and the Origins of Violence Tiffany Howard, 2016-04-15 What makes a terrorist Is an individual inherently predisposed to be attracted to political violence or does exposure to a certain environment desensitize them in such a way that violence represents a viable mode for addressing political grievances Identifying state failure as the impetus for political violence this book addresses these questions and focuses on why existing extremist groups find failed states so attractive Utilizing global barometer data Tiffany Howard examines the underpinnings of individual support for political violence and argues that an insidious pattern of deprivation within failed states drives ordinary citizens to engage in and support extreme acts of political violence A rigorous examination of four regions plagued by a combination of failed states and political violence Sub Saharan Africa The Middle East and North Africa Southeast and South Asia and Latin America this text draws parallels to arrive at a single conclusion that failed states are a natural breeding ground for terrorism and political violence **Religious Ideology and the Roots of the Global Jihad** J. Turner, 2014-08-26 The events of 9 11 prompted questions as to the origins nature and purpose of international jihadist organisations In particular why had they chosen to target the US and the West in general Turner s book provides a unique holistic insight into these debates taking into account historical perceptions and ideology as key factors **Symbolism in Terrorism** Jonathan Matusitz, 2014-09-16 The symbolic value of targets is what differentiates terrorism from other forms of extreme violence Terrorism is designed to inflict deep psychological wounds on an enemy rather than demolish its material ability to fight The September 11 2001 attacks for example demonstrated the power of symbolism The World Trade Center was targeted by Al Qaeda because the Twin Towers epitomized Western civilization U S imperialism financial success modernity and freedom The symbolic character of terrorism is the focus of this textbook A comprehensive analysis it incorporates descriptions definitions case studies and theories Each chapter focuses on a specific dimension of symbolism in terrorism and explains the contexts and processes that involve the main actors as well as the symbolism of both the purposes and targets of terrorism Also discussed are new religious movements which represent another important aspect of terrorism such as Aum Shinrikyo the Japanese cult that used sarin gas in the Tokyo subway in 1995 Over forty areas of symbolism are covered throughout the chapters including physical and non physical symbolism linguistic symbolism the social construction of reality rituals myths performative violence iconoclasm brand management logos semiotics new media and the global village This allows for an in depth examination of many issues such as anti globalization honor killing religious terrorism suicide terrorism martyrdom weapons female terrorism public communication visual motifs and cyberspace Main concepts are clearly defined and followed by theory illustrated by international case studies Chapter summaries key points review questions research and practice suggestions are recurring components as well This groundbreaking text encompasses all major aspects of symbolism in terrorism and will be an essential resource for

anyone studying terrorism **Islamism: Religion and Ideology** Wilyam Shar?f,2009 The book is a critique of Islamic fundamentalism modernist rationalism and imperialism It argues that there is a firm relationship between Islamism and the religion of Islam and that Muslims today need a new Islamic discourse **Unmasking Islam** Noble Din,2018-09-06 Islam is the fastest growing religion in the world but what effect is it having in society governments and what effect could it potentially have in the future Unmasking Islam uncovers urgent truths about Islam that Westerners Christians Jews and even Muslims must learn This is a study of these truths that are taken directly from the writings and sayings of Islamic texts and scholars Islam is not a religion of peace and never was Who is Allah and Muhammad Many young Muslims are not aware of what the Qur an teaches as they do not read speak or write Arabic What is the media not telling the world about Sharia law radical Islam and atrocities worldwide in the name of Allah Most importantly Muslims are children of God just like all of us The purpose of this book is to explain the truth about what the Qur an teaches Christians today must share the truth and love of Christ so that we can truly live in a more peaceful world and retain the freedoms we have fought so diligently to preserve
