Roots of the right , **Opera omnia** Cornelis Winkler, 1918 Up from Conservatism Michael Lind, 2013-08-06 For nearly a decade Michael Lind worked closely as a writer and editor with the intellectual leaders of American conservatism Slowly he came to believe that the many prominent intellectuals he worked with were not the leaders of the conservative movement but the followers and apologists for an increasingly divisive and reactionary political strategy orchestrated by the Republican party Lind s disillusionment led to a very public break with his former colleagues on the right as he attacked the Reverend Pat Robertson for using anti Semitic sources in his writings In Up From Conservatism this former rising star of the right reveals what he believes to be the disturbing truth about the hidden economic agenda of the conservative elite The Republican capture of the U S Congress in 1994 did not represent the conversion of the American public to conservative ideology Rather it marked the success of the thirty year old southern strategy begun by Barry Goldwater and Richard Nixon From the Civil War to the civil rights revolution the southern elite combined a low wage low tax strategy for economic development with a politics of demagoguery based on race baiting and Bible thumping Now Lind maintains the economic elite that controls the Republican party is following a similar strategy on a national scale using their power to shift the tax burden from the rich to the middle class while redistributing wealth upward To divert attention from their favoritism toward the rich conservatives play up the culture war channeling popular anger about falling real wages and living standards away from Wall Street and focusing it instead on the black poor and nonwhite immigrants The United States Lind concludes could use a genuine one nation conservatism that seeks to promote the interests of the middle class and the poor as well as the rich But today s elitist conservatism poses a clear and present danger to the American middle class and the American republic

Getting History Right Mark A. Wolfgram, 2010-12-10 How do individuals societies and nations deal with their difficult pasts Getting History Right examines this question in a comparative context by looking at an authoritarian East Germany and a pluralistic democratic West Germany Eschewing a narrow focus on elites this work draws extensively on societal level discussions of the past in popular culture such as film television radio and newspapers It examines how societal level

discussions of the past shaped individual perceptions and interpretations of the past and how individual perceptions and struggles over the meaning of the past shaped societal level discussions These struggles over meaning and getting history right are not only shaped by political power but are also a source of symbolic power To understand political life scholars must embrace not only material political power but also the symbolic and cultural roots of power The research presented here makes extensive use of public opinion data cinema attendance and television viewer data as well as other sources to look at the multiple meanings that East and West Germans assigned to the Holocaust and World War II across time Rather than culture merely being an extension of political power this work argues that culture and the boundaries of the cultural matrix shape the use of political power by different social actors Getting history right is not only a reflection of political power it is a source of power itself

Basic and Clinical Hepatology P. Motta, L.J. Didio, 2012-12-06 The liver has been an organ of mystery for centuries Slowly but surely its secrets have been disclosed by both basic research and clinically oriented investigators whose current concepts have been brought together in this book by authors from five different countries Three major groups with many subgroups have made inroads into our better understanding of the liver The first of these comprises the basic scientists whose study of single hepatocytes may provide the key to comprehension of mechanisms that will lead eventually to improvement in the morbidity and mortality associated with a variety of hepatic disorders The second group has been concerned with studies in depth of the liver's response to a variety of hormones drugs viruses and infections Both early and late results are their concern in the diagnosis and treatment of the individual patient A third group comprises the surgeons who have become increasingly aggressive in the removal of one or more segments of the liver They have increased the scope of hepatic resection as a result of a better understanding gained from studies of various segments of the liver They have accepted the term segmentectomy and have extended feasible procedures to include trisegmentectomy Indeed transplantation of the liver has been successfully accomplished
