whose presence harms the wider environment Hugh explores the complex history of species control revealing the global movement of species and the impacts of their presence Combining scientific theory with gentle humour in his signature style he explains the issues conservationists face to control non native animals and protect native species including grey and red squirrels on Anglesey ravens and tortoises in the Mojave Desert cane toads in Australia and the smooth billed ani on the Galapagos and describes cases like Pablo Escobar s cocaine hippos and the Burmese python pet trade Taking a balanced and open approach to this emotive subject Hugh speaks to experts on all sides of the debate How do we protect endangered native species Which species do we prioritise And how do we reckon with the ethics of killing anything in the name of conservation
