Rotten Relations:

Informal Relations from Democratic Representation to Corruption Zdenka, 2014-04-15 Informal relations have been one of the major research topics of the social sciences since the 1990s In order to allow for meaningful comparisons between different combinations of the positive and negative effects of informal relations on democratic representation this book focuses on post socialist Central and Eastern Europe as a particular region where formal democratic rules have been established but competing informal rules are still strong A broad spectrum of related analytical concepts is discussed from different perspectives and from different academic disciplines then empirical cases of the relationship between informal relations and democratic representation are analyzed The contributions span the whole continuum as we perceive it from civil society networks seen as supporting democratic representation to the perversion of democratic representation through political corruption The final part of the book takes a closer look at corruption through four case studies from Russia **The Moral Metaphor System** Ning Yu, 2022-06-27 This book investigates moral metaphors in English and Chinese applying conceptual metaphor theory to a comparative study of the linguistic manifestation of the moral metaphor system rooted in the domains of bodily and physical experience Ning Yu sheds light on the metaphorical nature of moral cognition and how it is systematically manifested in language and explores the potential commonalities that define moral cognition in general as well as the differences that characterize distinct cultures The work investigates moral cognition at the cultural level as reflected in language based on linguistic evidence from both English and Chinese and to a limited extent multimodal evidence from the corresponding cultures The moral metaphor system is taken to consist of three major subsystems referred to as physical visual and spatial These subsystems are clusters of conceptual metaphors whose source concepts are from domains of embodied experiences in the physical world and which are formulated in contrastive categories with bipolar values for the target concepts of moral and immoral The study is characterized by two keywords system and systematicity The former refers to the fact that metaphors conceptual and linguistic are connected within networks and the latter to the need for those metaphors to be studied in such networks **How to Stop Destroying Your Relationships** Albert Ellis, Robert A.
