Maguire, 2024-02-22 What is freedom What is equality And what is sovereignty A foundational text of modern political philosophy Rousseau's *Social Contract* has generated much debate and exerted extraordinary influence not only on political thought but also modern political history by way of the French Revolution and other political events ideals and practices The *Social Contract* is regularly studied in undergraduate courses of philosophy political thought and modern intellectual history as well as being the subject of graduate seminars in numerous disciplines The book inspires an ongoing flow of scholarly articles and monographs Few texts have offered more influential and important answers to research questions than Rousseau's *Social Contract* and in this new *Cambridge Companion* a multidisciplinary team of contributors provides new ways to navigate this masterpiece of political philosophy and its animating questions **Internationalism and Its Betrayal** Micheline Ishay, 1995 *Internationalism and Its Betrayal* was first published in 1995 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions A new world order proclaimed Western leaders after the cold war could extend liberal democracy and human rights around the globe Yet the specter of nationalism once again haunts the world threatening to extinguish the spirit of internationalism Although internationalism is typically understood to be diametrically opposed to nationalism Micheline Ishay argues to the contrary maintaining that internationalism often incorporates an individualist element that manifests itself as nationalism during critical periods such as war For example the new liberal internationalism invoked after the cold war is now revealing its limits as reflected by the UN's inability to interfere promptly to stop ethnic and nationalist conflicts in Bosnia Rwanda and elsewhere *Internationalism and Its Betrayal* explores the tensions and contradictions between ideas of nationalism and internationalism focusing on the major political thinkers from the early modern period into the nineteenth century Ishay examines the writings of Vico Grotius Rousseau Kant Paine Robespierre Burke Fichte de Maistre and Hegel She speaks to an audience of individuals interested in the spread of democracy students of human rights and international relations historians of the French Revolution and political theorists Micheline Ishay was born in Tel Aviv and raised in Israel Luxembourg and Brussels Belgium She is currently assistant professor at the Graduate School of International Studies at Denver University where she is also serving as director of the human rights program and executive

Ramet, 2007-02-28 Students of democratic theory have watched the dramatic transformation of Eastern Europe from communism to various forms of democracy in the last two decades With her unique blend of theory and empirical analysis veteran observer Sabrina P Ramet offers clear insight into the processes challenges and accomplishments of this area Drawing on a classical understanding of liberalism based on a philosophy of Natural Law she probes the issues of capitalism national sovereignty and self determination gender inequality and political legitimacy in the context of Eastern Europe's particular experience She also explores the limitations of classical liberalism and argues for the extension of liberal principles to encompass the rights of women and protection of all species as well as the environment Political theorists political scientists students of Eastern Europe and those interested in the larger questions of political philosophy will be richly rewarded in their reading of this volume by a renowned scholar of Eastern European politics **Rousseau & Nationalism** Anne M. Cohler, 1970-06-21 This book goes beyond much of the literature of nationalism in its brilliant exploration of the basis of nationalism in political philosophy **The Ashgate Research Companion to Federalism** Ann Ward, 2016-04-01 This comprehensive research companion examines the theory practice and historical development of the principle of federalism from the ancient period to the contemporary world It provides a range of interpretations and integrates theoretical and practical aspects of federalism studies more fully than is usually the case The volume identifies and examines nascent conceptions of the federal idea in ancient and medieval history and political thought before considering the roots of modern federalism in the ideas of a number of important European political theorists of the sixteenth through eighteenth centuries The contributors focus on the development and institutionalization of the principle of federalism in the

American Republic and examine the historical development and central policy debates surrounding European federalism The final sections investigate contemporary debates about theories of federalism and regional experiences of federalism in a global context including Africa India Australia the Middle East and North and South America The scope and range of this volume is unparalleled it will provide the reader with a firm understanding of federalism as issues of federalism promise to play an ever more important role in shaping our world

The World We Want Robert B. Loudon, 2010-03-16 The World We Want compares the future world that Enlightenment intellectuals had hoped for with our own world at present In what respects do the two worlds differ and why are they so different To what extent is and isn't our world the world they wanted and to what extent do we today still want their world Unlike previous philosophical critiques and defenses of the Enlightenment the present study focuses extensively on the relevant historical and empirical record first by examining carefully what kind of future Enlightenment intellectuals actually hoped for second by tracking the different legacies of their central ideals over the past two centuries But in addition to documenting the significant gap that still exists between Enlightenment ideals and current realities the author also attempts to show why the ideals of the Enlightenment still elude us What does our own experience tell us about the appropriateness of these ideals Which Enlightenment ideals do not fit with human nature Why is meaningful support for these ideals particularly within the US so weak at present Which of the means that Enlightenment intellectuals advocated for realizing their ideals are inefficacious Which of their ideals have devolved into distorted versions of themselves when attempts have been made to realize them How and why after more than two centuries have we still failed to realize the most significant Enlightenment ideals In short what is dead and what is living in these ideals

Rousseau and Romanticism Irving Babbitt, 1924 **A history of political theories** William Archibald Dunning, 1920

Citizen-soldiers and Manly Warriors R. Claire Snyder, 1999 What happens in a tradition that links citizenship with soldiering when women become citizens Citizen Soldiers and Manly Warriors Military Service and Gender in the Civic Republican Tradition provides an in depth analysis of the theory and practice of the citizen soldier in historical context Using a postmodern feminist lens Snyder reveals that within the citizen soldier tradition citizenship and masculinity are simultaneously constituted through engagement in civic and martial practices Seeking to sever the connection between masculinity and citizenship Snyder calls for women to make gender trouble by engaging in the practices traditionally constitutive of masculine republican citizenship However in order to reconstitute the Citizen Soldier tradition the only tradition we have that holds the military up to democratic standards we must not only trouble but also reconfigure our understandings of gender and citizenship Thus gender parity in the American military is not enough We must also change the type of masculinity produced by the military reintroduce the military to its civic purposes expand the citizenship of civic practices to include other non martial forms of service and give citizens a greater role in political decision making
