Royal Navy Strategy in the Far East 1919-1939 Andrew Field,2004-05-20 Between the ending of the Great War and the start of the Second World War in 1939 the Royal Navy remained the largest in the world But with the League of Nations seeming to offer a solution to all future conflicts a country weary of war and without an obvious enemy there seemed no need for a large battlefleet The strategic focus shifted eastwards to Japan with its growing battlefleet as the new threat to the British Empire and to the Royal Navy s supremacy From 1924 a strategic plan War Memorandum Eastern was written and refined The plan called for the Royal Navy still the largest in the world even after the Washington Naval Treaties to move eastwards to a defended base at Singapore cut off Japan and force her battlefleet into a decisive fleet battle As a strategy War Memorandum Eastern had many flaws Its real importance lay in the fact that it provided a justification for the Royal Navy to maintain its leading position in the world and to be in the forefront of the development of new tactical thinking Through planning for a war with Japan the Royal Navy was able to test its readiness for a future war Many of the lessons learnt during this period were ultimately put to good use against a different foe in 1939 **The Royal Navy in Eastern**

Waters Andrew Boyd,2017-03-30 How British naval power in the Indian Ocean played a critical early role in WWII Commands the reader s attention a history game changer Warship Naval Books of the Year This new work tells the compelling story of how the Royal Navy secured the strategic space from Egypt in the west to Australasia in the East through the first half of the Second World War and explains why this contribution made while Russia s fate remained in the balance and before American economic power took effect was so critical Without it the war would certainly have lasted longer and decisive victory might have proved impossible After the protection of the Atlantic lifeline this was surely the Royal Navy s finest achievement the linchpin of victory The book moves authoritatively between grand strategy intelligence accounts of specific operations and technical assessment of ships and weapons It challenges established perceptions of Royal Navy capability and will change the way we think about Britain s role and contribution in the first half of the war The Navy of 1939 was stronger than usually suggested and British intelligence did not fail against Japan Nor was the Royal Navy outmatched by Japan coming very close to a British Midway off Ceylon in 1942 And it was the Admiralty demonstrating a reckless disregard for risks that caused the loss of Force Z in 1941 The book also lays stress on the key part played by the American relationship in Britain s Eastern naval strategy Superbly researched and elegantly written it adds a hugely important dimension to our understanding of the war in the East [Britain's Anti-submarine Capability 1919-1939](#) George

Franklin,2004-08-02 This book traces the evolution of all the various parts of Britain s anti submarine capability and examines the development of the specialist anti submarine and submarine detector branches **Royal Navy Strategy in the Far East 1919-1939** Andrew Field,2004-05-20 Between the ending of the Great War and the start of the Second World War in 1939 the Royal Navy remained the largest in the world But with the League of Nations seeming to offer a solution to

all future conflicts a country weary of war and without an obvious enemy there seemed no need for a large battlefleet *The British Defence of Egypt, 1935-1940* Steven Morewood, 2005 A comprehensive and challenging analysis of the British defence of Egypt primarily against fascist Italy in the critical lead up period to the Second World War Culminating in the decisive defeat of the Italian military threat at Sidi Barrani in December 1940 this is a fascinating new contribution to the field The security of Egypt a constant of British imperial strategy is a curiously neglected dimension of the still burning appeasement debate Steven Morewood adds to the originality of his interpretation by suggesting the old view should be reinstated that Mussolini should and could have been stopped in his empire building at the Abyssinian hurdle Thereafter as Nazi Germany tore the Versailles peace settlement to shreds the drift to war accelerated as British resolve and credibility were brought into question The fascist dictators in Rome and Berlin held no respect for weakness and Mussolini became the conduit through which Hitler could apply pressure to a sensitive British interest through reinforcing Libya at critical moments *The British Defence of Egypt, 1935-40* Steve Morewood, 2004-11-25 A comprehensive and challenging analysis of the British defence of Egypt primarily against fascist Italy in the critical lead up period to the Second World War Culminating in the decisive defeat of the Italian military threat at Sidi Barrani in December 1940 this is a fascinating new contribution to the field *The Royal Navy in the Age of Austerity 1919-22* G. H. Bennett, 2016-10-06 This book thoroughly explores and analyses naval policy during the period of austerity that followed the First World War During this post war period as the Royal Navy identified Japan its likely opponent in a future naval war the British Government was forced to tighten its belt and cut back on naval expenditure in the interests of National Economy G H Bennett draws connections between the early 20th century and the present day showing how the same kind of connections exist between naval and foreign policy the provision of ships for the Royal Navy business and regional prosperity and employment *The Royal Navy in the Age of Austerity 1919-22* engages with a series of important historiographical debates relating to the history of the Royal Navy the failures of British Defence policy in the inter war period and the evolution of British foreign policy after 1919 together with more mundane debates about British economic industrial social and political history in the aftermath of the First World War It will be of great interest to scholars and students of British naval history **Pacific Star** Reg Newell, 2015-10-01 The war in the South Pacific saw some of the most gruelling fighting of World War Two Conditions were unpleasant fetid heat torrential downpours and hostile flora and fauna while the Japanese enemy were ruthless and would often fight to the last man Amphibious warfare jungle warfare and the need to co operate with our American ally all meant that new demands were made on New Zealand soldiers Yet the war in the South Pacific came to be seen as an easy war generally overlooked with the exception of Guadalcanal by historians From ignorance of what the soldiers were called upon to endure the notion arose that service in the South Pacific was somehow less worthy than the real war in Europe against the Nazis This attitude continued in the post war world and today the soldiers of 3NZ Division are all but forgotten *Pacific Star* sets the record straight shedding new light on the sacrifices and

tribulations which the soldiers of 3NZ Division had to endure in the service of the Allied cause The book covers their initial deployment in Fiji and New Caledonia and describes the major battles the division fought in the Solomons Vella Lavella the Treasury Islands and the Green Islands as well as their sometimes strained relationship with the US military Reg Newell has interviewed veterans for this book which includes new maps and previously unpublished photographs *The Sea and the Second World War* Marcus Faulkner, Alessio Patalano, 2019-12-10 An in depth study of World War II's naval operations Rarely does a collection of essays offer so many new and persuasive assessments Well done Professor David Snead Liberty University The sea shaped the course and conduct of World War II from the first moments of the German invasion of Poland on September 1 1939 to the Japanese surrender on September 2 1945 The impact could be felt far beyond the shoreline as the arms and armies carried across the oceans were ultimately destined to wage war ashore Populations and industries depended on the raw materials and supplies in a war that increasingly became a contest of national will and economic might Ultimately it was the war at sea that linked numerous regional conflicts and theaters of operation into a global war As the war grew in complexity and covered an increasingly larger geographical area the organization of the maritime effort and the impact it had on the formulation of national strategy also evolved This volume illustrates the impact of naval operations on the Second World War by highlighting topics previously neglected in the scholarship In doing so it provides new insights into political strategic administrative and operational aspects of the maritime dimension of the war A fine collection of essays by some of the leading scholars in the field The book addresses comprehensively the vital importance of the sea across a range of theaters during the Second World War through a diverse selection of case studies The examinations and re examinations in this volume will be of interest to both scholars and practitioners Dr Steven Paget University of Portsmouth **A Companion to International History 1900 - 2001** Gordon Martel, 2010-03-29 A comprehensive overview of the most important international events movements and controversies of the 20th century Written by distinguished scholars each an authority in their field Explores influential underlying themes such as imperialism nationalism internationalism technological developments and changes in diplomatic methods Addresses a broad range of topics including diplomacy of wartime and peacemaking the cold war era and the new world order the end of European empires the rise of nationalism in the Third World globalization and terrorism Chronological organization makes the volume easily accessible Includes useful guides for further reading and research *The British Pacific Fleet Experience and Legacy, 1944-50* Jon Robb-Webb, 2016-03-16 The British Pacific Fleet was formed in October 1944 and dispatched to fight alongside the USN in the Central Pacific under Admiral Nimitz Deploying previously unpublished documents this book reveals how relations between the UK and US forces developed from a starting point of barely repressed suspicion to one where both navies came to understand each other and eventually find a remarkable bond Born out of a shared experience of Kamikaze attacks extended operations against bitterly hostile shores the pooling of knowledge and experience the two navies underpinned the diplomatic moves in both

Washington and London The book carries the legacy of this experience through to the next Anglo American participation in war Korea It illustrates and explains how and why certain lessons were incorporated into the composition behaviour and structure of the post war Navy It demonstrates the significance of what was learned from the USN by the RN and by USN from the RN As well as examining the background to the largest fleet the Royal Navy ever put to sea the book also charts its effects on Anglo American relations multinational operations alliance building and the ways naval forces are shaped by and in turn shape politics It addresses a period of rapid technological development that witnessed profound changes in the international system and which raised fundamental questions of what navies were for and how should they operate and organize themselves In so doing the study illustrates how the experience of a few long months at the end of the war in the Pacific would cast a long shadow over these issues in the very different circumstances of the post war world *The Crisis of British Sea Power* James Levy,2024-02-20 This work is a close examination of the conditions surrounding and precipitating the last gasp of British naval hegemony and events that led to its demise Great Britain undertook a massive naval building program in the late 1930s in order to deter aggression and secure dominance at sea against her nascent enemies Nazi Germany and Fascist Italy But the failure of the policy of Appeasement to deter war or delay it into the early 1940s left the building program only partially complete and the exigencies of war led to the cancellation of the critical but costly and time consuming Lion class battleships and the slow delivery of the 1940 battlecruiser HMS Vanguard and two vital fleet carriers Adding to these issues the fall of France spurred the USA to initiate her own even larger naval building program and together with the entry of the powerful and capable Imperial Japanese Navy completely overwhelmed Britain's position as the world's premier naval power This book will be of value to those interested in the history of the Second World War British strategy and the British navy

Fighting in the Dark Vincent O'Hara,Trent Hone,2023-04-15 Before the twentieth century ships when relied upon visual signaling vessels beyond range of sight or a cannon shot were blind deaf and dumb in the dark making night battles at sea rare and near always accidental The introduction of certain technologies like the torpedo the searchlight radio and then radar transformed naval warfare by making night combat feasible and in some cases desirable The process by which navies integrated these new tools of war and turned the dark into a medium for effective combat however was long and difficult *Fighting in the Dark* tells the story of surface naval combat at night from the Russo Japanese War through World War II The book is about the process of confronting and mastering problems brought on by technological change during war It does this by examining seven periods focusing on the Imperial Russian Navy in 1904 1905 the Imperial German Navy from 1914 1918 the Royal Navy from 1916 1939 the Regia Marina from 1940 1943 the Imperial Japanese Navy in 1942 the U S Navy in 1943 1944 and the Royal Navy and Royal Canadian Navy from 1943 1944 The chapters are written by authors hailing from Australia Canada Italy and the United States all recognized masters in their subject *Fighting in the Dark* Vincent P. O'Hara,Trent Hone,2025-01-16 *Fighting in the Dark* is a new book about naval combat at night the title

also however signifies the overarching theme of the book of moving from dark to light in short the process of mastering technological change during war The authors start with the proposition that it is hard to hit an invisible target particularly one in motion In the nineteenth century when ships relied upon visual signaling and vessels beyond hailing range were deaf and mute in the dark night battles at sea were rare and largely accidental Three inventions changed this the torpedo the searchlight and the radio These inventions at the end of the nineteenth and start of the twentieth centuries transformed naval warfare by making combat in the dark feasible and in some cases desirable The process by which navies used the dark and adapted it into a medium for effective combat was long and difficult more so for some than others This book is about that process and about how Russian British German Italian Japanese and US navies confronted the specific new challenges and adapted to unfamiliar situations and emerging technologies Fighting in the Dark consists of chapters written by a group of highly respected naval historians and the book s approach illuminates how different navies and cultures approached common problems The fierce night time battles that are described serve as a metaphor for the larger issues and the reader is led along a fascinating journey of naval warfare from the Russo Japanese War through WWI to the Second World War and from the Pacific to the English Channel *The Royal Navy 1930-1990* Richard Harding, 2004-11-25 This new book explores innovation within the Royal Navy from the financial constraints of the 1930s to World War Two the Cold War and the refocusing of the Royal Navy after 1990 Successful adaptation to new conditions has been critical to all navies at all times

The Royal Navy, 1930-2000 Richard Harding, 2005 This book explores innovation within the Royal Navy from the financial constraints of the 1930s through to the refocusing of the Royal Navy after 1990 *The Royal Navy and Anti-submarine Warfare, 1917-49* Malcolm Llewellyn-Jones, 2006 An essential new account of how anti submarine warfare is conducted with a focus on both historic and present day operations This new book shows how until 1944 U boats operated as submersible torpedo craft which relied heavily on the surface for movement and charging their batteries This pattern was repeated in WWII until Allied anti submarine countermeasures had forced the Germans to modify their existing U boats with the schnorkel Countermeasures along also pushed the development of high speed U boats capable of continuously submerged operations This study shows how these improved submarines became benchmark of the post war Russian submarine challenge Royal Navy doctrine was developed by professional anti submarine officers and based on the well tried combination of defensive and offensive anti submarine measures that had stood the press of time since 1917 notwithstanding considerable technological change This consistent and holistic view of anti submarine warfare has not been understood by most of the subsequent historians of these anti submarine campaigns and this book provides an essential and new insight into how Cold War and indeed modern anti submarine warfare is conducted *Naval Blockades and Seapower* Bruce A. Elleman, S.C.M. Paine, 2007-04-11 This new collection of scholarly readable and up to date essays covers the most significant naval blockades of the nineteenth and twentieth centuries Here the reader can find Napoleon s Continental Blockade of

England the Anglo American War of 1812 the Crimean War the American Civil War the first Sino Japanese War 1894 95 the Spanish American War the First World War the second Sino Japanese War 1937 45 the Second World War in Europe and Asia the Nationalist attempt to blockade the PRC the Korean War the Cuban Missile Crisis the Vietnam War the British blockade of Rhodesia the Falklands War the Persian Gulf interdiction program the PRC missile blockade of Taiwan in 1996 and finally Australia s recent reverse blockade to keep illegal aliens out of the country The authors of each chapter address the causes of the blockade in question its long and short term repercussions and the course of the blockade itself More generally they address the state of the literature taking advantage of new research and new methodologies to provide something of value to both the specialist and non specialist reader Taken as a whole this volume presents fresh insights into issues such as what a blockade is why countries might choose them which navies can and cannot make use of them what responses lead to satisfactory or unsatisfactory conclusions and how far reaching their consequences tend to be This book will be of great interest to all students and scholars of strategic studies military history and maritime studies in particular

Seapower
Geoffrey Till, 2013-02-21 This is the third revised and fully updated edition of Geoffrey Till s *Seapower A Guide for the 21st Century* The rise of the Chinese and other Asian navies worsening quarrels over maritime jurisdiction and the United States maritime pivot towards the Asia Pacific region reminds us that the sea has always been central to human development as a source of resources and as a means of transportation information exchange and strategic dominion It has provided the basis for mankind s prosperity and security and this is even more true in the early 21st century with the emergence of an increasingly globalized world trading system Navies have always provided a way of policing and sometimes exploiting the system In contemporary conditions navies and other forms of maritime power are having to adapt in order to exert the maximum power ashore in the company of others and to expand the range of their interests activities and responsibilities While these new tasks are developing fast traditional ones still predominate Deterrence remains the first duty of today s navies backed up by the need to fight and win if necessary How navies and their states balance these two imperatives will tell us a great deal about our future in this increasingly maritime century This book investigates the consequences of all this for the developing nature composition and functions of all the world s significant navies and provides a guide for anyone interested in the changing and crucial role of seapower in the 21st century *Seapower* is essential reading for all students of naval power maritime security and naval history and highly recommended for students of strategic studies international security and International Relations

Modern Naval History Richard Harding, 2015-12-17 Specifically structured around research questions and avenues for further study and providing the historical context to enable this further research *Modern Naval History* is a key historiographical guide for students wishing to gain a deeper understanding of naval history and its contemporary relevance Navies play an important role in the modern world and the globalisation of economies cultures and societies has placed a premium on maritime communications *Modern Naval History* demonstrates the importance of naval

history today showing its relevance to a number of disciplines and its role in understanding how navies relate to their host societies Richard Harding explains why naval history is still important despite slipping from the attention of policy makers and the public since 1945 and how it can illuminate answers to questions relating to economic diplomatic political social and cultural history The book explores how naval history has informed these fields and how it can produce a richer and more informed historical understanding of navies and sea power
