supremacy By the early twentieth century the blackface version of the American identity had become a part of America's consumer culture while the Hutchinsons songs were increasingly regarded as old fashioned Blackface Nation elucidates the central irony in America's musical history much of the music that has been interpreted as black authentic and expressive was invented performed and enjoyed by people who believed strongly in white superiority At the same time the music often depicted as white repressed and boringly bourgeois was often socially and racially inclusive committed to reform and devoted to challenging the immoralities at the heart of America's capitalist order
