The Evolution of Rhythm Cognition: Timing in Music and Speech Andrea Ravignani, Henkjan Honing, Sonja A. Kotz, 2018-07-24 Human speech and music share a number of similarities and differences One of the closest similarities is their temporal nature as both i develop over time ii form sequences of temporal intervals possibly differing in duration and acoustical marking by different spectral properties which are perceived as a rhythm and iii generate metrical expectations Human brains are particularly efficient in perceiving producing and processing fine rhythmic information in music and speech However a number of critical questions remain to be answered Where does this human sensitivity for rhythm arise How did rhythm cognition develop in human evolution How did environmental rhythms affect the evolution of brain rhythms Which rhythm specific neural circuits are shared between speech and music or even with other domains Evolutionary processes long time scales often prevent direct observation understanding the psychology of rhythm and its evolution requires a close fitting integration of different perspectives First empirical observations of music and speech in the field are contrasted and generate testable hypotheses Experiments exploring linguistic and musical rhythm are performed across sensory modalities ages and animal species to address questions about domain specificity development and an evolutionary path of rhythm Finally experimental insights are integrated via synthetic modeling generating testable predictions about brain oscillations underlying rhythm cognition and its evolution Our understanding of the cognitive neurobiological and evolutionary bases of rhythm is rapidly increasing However researchers in different fields often work on parallel potentially converging strands with little mutual awareness This research topic builds a bridge across several disciplines focusing on the cognitive neuroscience of rhythm as an evolutionary process It includes contributions encompassing although not limited to 1 developmental and comparative studies of rhythm e g critical acquisition periods innateness 2 evidence of rhythmic behavior in other species both spontaneous and in controlled experiments 3 comparisons

of rhythm processing in music and speech e.g. behavioral experiments systems neuroscience perspectives on music speech networks 4 evidence on rhythm processing across modalities and domains 5 studies on rhythm in interaction and context social affective etc 6 mathematical and computational e.g. connectionist symbolic models of rhythmicity as an evolved behavior

Art, Space and the City Malcolm Miles, 2005-08-16 Public art the making management and mediation of art outside its conventional location in museums and galleries and the livable city a concept involving user centred strategies for urban planning and design are both socially produced but have emerged from different fields and tend to be discussed in isolation This book applies a range of critical perspectives which have emerged from different disciplines art criticism urban design urban sociology geography and critical theory to examine the practice of art

for urban public spaces seeing public art from positions outside those of the art world to ask how it might contribute to possible urban futures Exploring the diversity of urban politics the functions of public space and its relation to the structures of power the roles of professionals and users in the construction of the city the gendering of space and the ways in which space and citizen are represented the book explains how these issues are as relevant to architecture urban design and urban planning as they are to public art Drawing on a wealth of images from across the UK and Europe and the USA in particular the author questions the effectiveness of public art in achieving more convivial urban environments whilst retaining the idea that imagining possible futures is as much part of a democratic society as using public space Sweden Jason

Porterfield,2003-12-15 In the north of Sweden people herd reindeer for a living To the south they build mobile phones Sweden once home to the fiercest warriors in the world has been neutral for almost 200 years A country of contrasts Sweden s history as well as its everyday life is described in this lively text Readers will be fascinated by the dazzling Swedish primary source images that enhance the written material including photographs of ancient Viking artifacts unique red wooden farmhouses important early automobiles musicians who enchanted the world artistic and scientific geniuses who changed the course of history and much more **Appleton's Magazine** ,1903 **Family Spaces in Art Museums** Julia

Forbes,Marianna Adams,2022-02-21 Families are a critical audience for art museums and museums use many different strategies for reaching families such as special family days and festivals workshops special tours family backpacks and gallery guides in gallery materials or demonstration carts and specific family galleries Here is a practical guide based on research that helps art museum educators understand the role and value of spaces designed for families and helps them to create dedicated spaces for intergenerational play and learning This book features insights best practices and lessons learned from years of experience in creating dedicated spaces for families in a wide range of art museums Through case studies in depth stories and engaging graphics and images this book identifies key issues that museum professionals need to consider when developing family spaces in museums This book is a how to guide to creating or updating an interactive family space Everything you need to know soup to nuts from understanding your audience to hiring a designer and opening your doors to the public is here Each section is situated within groundbreaking visitor research findings and how museum educators have used those findings to better understand the family audience and develop fun safe inclusive spaces that inspire wonder and curiosity as well as places for meaning making and family bonding all in the service of creating loyal and committed museum visitors *Routes, Roads and Landscapes* Brita Brenna,Janike Kampevold Larsen,2016-12-05 Routes and roads make their way into and across the landscape defining it as landscape and making it accessible for many kinds of uses and perceptions Bringing together outstanding scholars from cultural history geography philosophy and a host of other disciplines this collection examines the complex entanglement between routes and landscapes It traces the changing conceptions of the landscape from the Enlightenment to the present day looking at how movement has been facilitated

imagined and represented and how such movement in turn has conditioned understandings of the landscape A particular focus is on the modern transportation landscape as it came into being with the canal the railway and the automobile These modes of transport have had a profound impact on the perception and conceptualization of the modern landscape a relationship investigated in detail by authors such as Gernot Böhme Sarah Bonnemaïson Tim Cresswell Finola O Kane Charlotte Klonk Peter Merriman Christine Macy David Nye Vittoria Di Palma Charles Withers and Thomas Zeller
