Beautifully illustrated with 180 colour photographs it will appeal to natural history enthusiasts and everyone who cares about the country they live in. The book contains the latest research gathered in the making of this new landmark series from the BBC's NHU in Bristol. Alan Titchmarsh is a bestselling BBC author and has sold over a million copies of his books which include *How To Be A Gardener* 1 and 2 and *Royal Gardeners*. **The Encyclopaedia Britannica**, 1910. *The Encyclopaedia Britannica* Hugh Chisholm, 1910. This eleventh edition was developed during the encyclopaedia's transition from a British to an American publication. Some of its articles were written by the best known scholars of the time and it is considered to be a landmark encyclopaedia for scholarship and literary style. *Britain's Insects* Paul D. Brock, 2021-07-13. An innovative up to date field guide to Britain and Ireland's 25 insect orders concentrating on popular groups and species that can be identified in the field. [The Encyclopædia Britannica](#) Hugh Chisholm, James Louis Garvin, 1926. *The British Foundation of Indian Entomology* Michael Darby, 2023-12-14. This is the first book devoted to the interest taken by amateur British collectors in Indian insects between 1750 and 1947. Many employed as soldiers and medics by the East India Company. Initially confined to the building up of personal collections many of which would later form the foundation of the London Natural History Museum's collection. The early entomologists also donated specimens to the Asiatic Society of Bengal, the Bombay Natural History Society and local museums. Some published their findings in the journals of these institutions. Towards the end of the nineteenth century interest in entomology shifted to focus on insect pests and their economic impact on forestry and horticulture. The result was the founding of the Institutes of Forestry and Horticulture at Dehra Dun and Pusa where Indian scientists continue to conduct entomological research today. The present work elucidates this previously under researched aspect of British insect history documenting the people, places, publications and institutions associated with the exploration of the rich entomological fauna of the Indian subcontinent.
