

WARM WEATHER TIPS WATER SAFETY

LEARN WATER COMPETENCE

Know your limitations! Never swim alone. If possible, choose locations with lifeguards on watch. Be aware of environmental risks (tides, currents, rip currents, shallow and unclear water). Check conditions before you go!

LEARN SWIMMING SKILLS

Find a swim class for you or your child's skill level. Learn 5 skills recommended by the red cross in different environments:
1. Enter water that's over your head, and return to the surface. 2. float for 1 minute. 3. Turn over and around in water. 4. Swim 25 yards. 5. Exit the water.

BE ALERT TO HELP OTHERS

Pay close attention to weak swimmers and children. Know the signs of drowning. Take CPR and first aid classes. Designate an adult to be the 'water watcher', to keep their eye on those in the water at all times.

USE LAYERS OF PROTECTION

Ensure there are barriers between vulnerable people and danger. Teach children to always ask permission before going into water. Lifejackets are recommended for all. At home, fence in pools or water features for added barriers.

KNOW SIGNS OF DISTRESS

A swimmer may need help if: they are not making forward progress. Are vertical in water and not making progress. They are bobbing in water and quiet. Their mouth may be at water level, they are swimming in a ladder climbing motion.

IN CASE OF EMERGENCY

If anyone is unaccounted for, always check water first. Immediately alert life guards. Know and be able to recognize the signs of distress. Do not attempt a rescue if you are not a strong swimmer. Use the "reach or throw, don't go" method of rescue.

PREPARE

The more you learn and prepare, the more likely you are to avoid water emergencies. Find more information and resources at:

Reclamation Era, 1967 **Drinking Water Quality Management from Catchment to Consumer** Bob Breach, 2011-10-04 Part of Water Quality Set. Buy all four books and save over 30% on buying separately. Drinking Water Quality Management from Catchment to Consumer is a best practice book that builds on the experience of water suppliers and experts across the world in order to provide a practical guide to help utilities improve the management of drinking water quality. It is based on the Water Safety Plan approach and the principles of the Bonn

Charter for Safe Drinking Water and is intended to complement and support other relevant publications particularly the WHO Water Safety Plan Manual It has evolved from the work of The Bonn Network which is a global group of water suppliers originally established to develop and share best practice in drinking water quality management based on the Bonn Charter The emphasis is on practical information by operators for operators learning from the experience of a range of water suppliers across the world The book supports and encourages users to think through the best way for them to improve drinking water quality management taking account of local factors It recognises that whilst water suppliers are central to the provision of good drinking water this has to take place within a broader legal institutional and financial framework which is the responsibility of Government and others It thus highlights the ways that water suppliers can work with a range of partners to ensure that all are committed to the same goal of good safe drinking water Drinking Water Quality Management from Catchment to Consumer is an essential reference for water quality laboratory and operational managers from water utilities around the world It is also helpful to consultants working in this area and regulatory health and municipal and catchment management authorities The book is of interest to academics working in the field of drinking water quality and risk management and may be used on any courses aimed at managing drinking water quality
