Looking At Criminal Law:

The Criminal Law's Person Claes Lernestedt, Matt Matravers, 2022-02-10 The state's use of the threat and imposition of punishments to regulate conduct is thought or at least said by many to be legitimised by the idea that the criminal law's burdens only fall on those who are blameworthy for their conduct. However, the formal concept of blameworthiness needs to be made substantive. This puts various ideas regarding the criminal law's person at the heart of debates about blame, guilt, and responsibility. How is the criminal law's person constructed by whom and with what disciplinary norms? How is it threatened by new knowledge and how do those threats play out amongst the various stakeholders who claim the criminal law's person as theirs? To address these and cognate questions, this volume brings together an international group of academics to engage with the criminal law's person from a range of disciplinary perspectives.

The Oxford Handbook of Criminal Law Markus Dirk Dubber, Tatjana Hörnle, 2014 Providing scholars with a comprehensive international resource, a common point of entry into cutting edge contemporary research, and a snapshot of the state and scope of the field, The Oxford Handbook of Criminal Law takes a broad approach to its subject matter: disciplinarily, geographically, and systematically.

The Boundaries of the Criminal Law R.A. Duff, 2010-11-11 This is the first book of a series on criminalization, examining the principles and goals that should guide what kinds of conduct are to be criminalized and the forms that criminalization should take. The first volume studies the scope and boundaries of the criminal law, asking what principled limits might be placed on criminalizing behaviour.

Making the Modern Criminal Law Lindsay Farmer, 2016-01-21 The Criminalization series arose from an interdisciplinary investigation into criminalization, focussing on the principles that might guide decisions about what kinds of conduct should be criminalized and the forms that criminalization should take. Developing a normative theory of criminalization, the series tackles the key questions at the heart of the issue: what principles and goals should guide legislators in deciding what to criminalize? How should criminal wrongs be classified and differentiated? How should law enforcement officials apply the law's specifications of offences? This, the fifth book in the series, offers a historical and conceptual account of the development of the modern criminal law in England and as it has spread to common law jurisdictions around the world. The book offers a historical perspective on the development of theories of criminalization. It shows how the emergence of theories of criminalization is inextricably linked to modern understandings of the criminal law as a conceptually distinct body of rules and how this in turn has been shaped by the changing functions of criminal law as an instrument of government in the modern state. The book is structured in two main parts. The first traces the development of the modern law as a distinct and conceptually distinct body of rules, looking in particular at ideas of jurisdiction, codification, and responsibility. The second part then engages in detailed analysis of specific areas of criminal law, focusing on patterns of criminalization in relation to property, the person, and sexual conduct.

Comparing Tort and Crime Matthew Dyson, 2015-07-02 The fields of tort and crime have much in common in practice, particularly in how they both try to respond

to wrongs and regulate future behaviour Despite this commonality in fact fascinating difficulties have hitherto not been resolved about how legal systems co ordinate or leave wild the border between tort and crime What is the purpose of tort law and criminal law and how do you tell the difference between them Do criminal lawyers and civil lawyers reason and argue in the same way Are the rules on capacity consent fault causation secondary liability or defences the same in tort as in crime How do the rules of procedure operate for each area Are there points of overlap When how and why do tort and crime interact This volume systematically answers these and other questions for eight legal systems England France Germany Sweden Spain Scotland the Netherlands and Australia **Looking Back at Law's Century** Austin Sarat, Bryant
