conceptualization of myriad forms of urban villages by examining the evolution of different types of settlement commonly known as native or traditional villages and more recently squatter and informal settlements It views village like settlements such as squatter and informal settlements as a type of urban village and examines the role these and other urban villages play in shaping and making the Pacific town and city and arguably the Pacific village city It presents key actions that Pacific countries and development partners need to consider as part of urban and national development plans when rethinking how to conceptualize the ongoing phenomena of urban villages while achieving a more equitable distribution of the benefits of urbanization

The Pretender of Pitcairn Island Tillman W. Nechtman, 2018-09-13 Pitcairn a tiny Pacific island that was refuge to the mutineers of HMAV Bounty and home to their descendants later became the stage on which one imposter played out his influential vision for British control over the nineteenth century Pacific Ocean Joshua W Hill arrived on Pitcairn in 1832 and began his fraudulent half decade rule that has until now been swept aside as an idiosyncratic moment in the larger saga of Fletcher Christian's mutiny against Captain Bligh and the mutineers unlikely settlement of Pitcairn Here Hill is shown instead as someone alert to the full scope and power of the British Empire to the geopolitics of international imperial competition to the ins and outs of naval command the vicissitudes of court politics and as such to Pitcairn's symbolic power for the British Empire more broadly

Garden,2005-08-19 A fascinating study of the environmental history of Australia New Zealand and the islands of the Pacific from the time of the dinosaurs to the present day Of interest to students and academics alike this book provides a much needed synthesis of the recent literature on the environmental history of Australia and Oceania Part of ABC CLIO s Nature and Human Societies series this book maps out the key trends in the region s environmental history charting the creation of the Australian continent from the ancient land mass of Gondwanaland to the arrival of humans Especially fascinating are the chapters highlighting how successive waves of human migration created environmental havoc throughout the region leading to the collapse of the Easter Island civilization and the spread of nonindigenous flora and fauna From the controversies over the reasons why creatures such as the marsupial lion and the giant kangaroo became extinct to such contemporary problems as deforestation and global warming this book contains sobering lessons for us all *Imperial Benevolence* Jane Samson,1998-07-01 This insightful analysis of British imperialism in the south Pacific explores the impulses behind British calls for the protection and improvement of islanders From kingmaking projects in Hawaii Tonga and Fiji to the antislavery campaign against the labor trade in the Western pacific the author examines the deeply subjective cultural roots permeating Britons attitudes toward Pacific Islanders By teasing out the connections between those attitudes and the British humanitarian and antislavery movements *Imperial Benevolence* reminds us that nineteenth century Britain was engaged in a global campaign for Christianization and Civilization *Encyclopedia of Romanticism (Routledge Revivals)* Laura Dabundo,2009-10-15 First Published in 1992 this encyclopedia is designed to survey the social cultural and intellectual climate of English Romanticism from approximately the 1780s and the French Revolution to the 1830s and the Reform Bill Focussing on the spirit of the age the book deals with the aesthetic scientific socioeconomic indeed the human environment in which the Romantics flourished The books considers poets playwrights and novelists critics editors and booksellers painters patrons and architects as well as

include in the Travel Companion **A Son of the Sun** Jack London, 2001 Entertaining atmospheric and action filled yet difficult to obtain until now the eight short stories in Jack London's *A Son of the Sun* center on the thrilling exploits of Captain David Grief in the dangerous and exotic South Seas Captain Grief encounters the adventurers scoundrels pirates and opportunists who followed the example of their colonial predecessors and exploited the islands and their resources early in the twentieth century Inspired by London's own voyage through the South Seas on board his self made yacht the *Snark* these stories paint a colorful and at times horrifying picture of the remote South Pacific Thomas R Tietze and Gary J Riedl provide concise and illuminating introductions to each story as well as informative notes The volume is enlivened by reproductions of London's own photographs and maps and by the illustrations that accompanied each story when first published **In Oceania** Nicholas Thomas, 1997 Australian scholar Nicholas Thomas documents and analyzes rhetorical artifacts of explorers missionaries fiction and travel writers and the people of the Pacific themselves to demonstrate how Oceanic identities have been represented over time The picture Thomas paints of Oceania shows that interactions between indigenous cultures and European influences created entirely new Oceanic identities 62 illustrations Jack London's Tales of Cannibals and Headhunters Jack London, 2006 Jack London's *Tales of Cannibals and Headhunters* is set in the romantic and dangerous South Seas and illustrated with the original artwork and several maps **Tropical Forests and Their Crops** Nigel J. H. Smith, J. T. Williams, Donald L. Plucknett, Jennifer P. Talbot, 2018-05-31 The tropics are the source of many of our familiar fruits vegetables oils and spice as well as such commodities as rubber and wood Moreover other tropical fruits and vegetables are being introduced into our markets to offer variety to our diet Now as tropical forests are increasingly threatened we face a double fold crisis not only the loss of the plants but also rich pools of potentially useful genes Wild populations of crop plants harbor genes that can improve the productivity and disease resistance of cultivated crops many of which are vital to developing economies and to global commerce Eight chapters of this book are devoted to a variety of tropical crops beverages fruit starch oil resins fuelwood fodder spices timber and nuts the history of their domestication their uses today and the known extent of their gene pools both domesticated and wild Drawing on broad research the authors also consider conservation strategies such as parks and reserves corporate holdings gene banks and tissue culture collections and debt for nature swaps They stress the need for a sensitive balance between conservation and the economic well being of local populations If economic growth is part of the conservation effort local populations and governments will be more strongly motivated to save their natural resources Distinctly practical and soundly informative this book provides insight into the overwhelming abundance of tropical forests an unsettling sense of what we may lose if they are destroyed and a deep appreciation for the delicate relationships between tropical forest plants and people around the world
