Chambers,2024-11-19 It has traditionally been accepted that one cannot derive how the world ought to be from the way the world is The discipline of bioethics endeavors to respond to ethical issues as they arise in the world For these issues to be analyzed they must first be described Redescribing

Bioethics How the Field Constructs Its Argument argues the descriptions bioethicists provide of the moral problems anticipate the proposed solution to these problems To understand the rhetorical power of bioethics arguments we need to reverse the structure of the argument seeing the anticipated solution as driving the presentation of the problem Arguing the story of bioethics is as much one of powerful redescriptions as of proposed solutions Tod S Chambers examines seven rhetorical strategies in how bioethics texts have steered readers toward a particular moral vision of the world retrodiction anagnorisis imbalance dissociation metaphor sources and hypertextuality Through these techniques bioethicists construct a world in which their particular moral theory thrives and alternative theories will struggle Interpreting Statutes Suzanne Corcoran, Stephen Bottomley, 2005 Interpreting Statutes was cited 4 times by the High Court in Momcilovic v The Queen 2011 HCA 34 8 September 2011 Interpreting Statutes has been written for lawyers and judges who must interpret statutes on a daily basis as well as for students and scholars who have their own responsibility for the future This book takes a new approach to statutory interpretation The authors consider the fundamental importance of context in statutory interpretation across various fields of regulation and explore the problems which arise from the frequent disjunction between regulatory design and subsequent statutory interpretation As a result they bring to the fore fundamental theoretical questions underlying interpretive choice and expand our appreciation of how critical interpretive issues are to the proper functioning of our legal system The book is divided into two parts The first covers several areas dealing with fundamental theoretical issues The second deals with particular areas of the law such as criminal law or corporate law addressing the utility and functionality of the general theories from different legal perspectives and illustrating the fact that different interpretive principles may take precedence in different areas of the law It reveals the complexity of statutory interpretation when applied to actual practice in a particular area of law Despite this complexity and the unique problems of statutory interpretation within each area of law some major themes emerge including the strong influence of constitutional interpretation tension between common law rights and statutory innovation questions about the interaction of domestic law with international law tension between settled judicial principles of interpretation and principles embedded in legislation issues concerning the interpretation of delegated legislation and questions about gap filling and discretion in the interpretation of statutes and codes Ethics in Nursing Martin Benjamin Professor of Philosophy, Joy Curtis Professor of Nursing and University Ombudsman both at Michigan State University, 1992-01-02 Written by a nurse and a philosopher Ethics in Nursing blends the concrete detail of recurring problems in nursing practice with the perspectives methods and resources of philosophical ethics It stresses the aspects of the nurses role and relations with others physicians patients administrators other nurses that give ethical problems in nursing their special focus Among the issues addressed are deception parentalism confidentiality conscientious refusal nurse autonomy compromise and personal responsibility for institutional and public policy The third edition has been enlarged with new cases and case discussions related to AIDS and

an additional chapter on the expanding scope of nursing ethics as it addresses issues related to scarce resources cost containment justice and the possibilities of health care rationing *Pilgrims in Medicine: Conscience, Legalism and Human Rights* Thomas Faunce, 2005-02-01 This arrestingly novel work develops a normative synthesis of medical humanities virtue ethics medical ethics health law and human rights It presents an ambitious complex and coherent argument for the reconceptualisation of the doctor patient relationship and its regulation utilising approaches often thought of as being separate if not opposed virtue based ethics and universal human rights The case is argued gracefully with moderation but also with respect for opposing positions The book's analysis of the foundational professional virtue of therapeutic loyalty is an original departure from the traditional discourse of patient autonomy and the ethical and legal duties of the medical practitioner The central argument is not merely presented as bookends in the introduction and conclusion It is cogently represented in each chapter and section and measured against the material considered A remarkable feature is the use of aptly selected canonical literature to inform the argument These references run from Hesse's *The Glass Bead Game* in the abstract to Joyce's *Ulysses* in the conclusion They include excerpts from and discussion about Bergman Borges Boswell Tolstoy de Beauvoir Chekhov Dostoevsky Samuel Johnson Aristotle Orwell Osler Chaucer Schweitzer Shakespeare Thorwalds Kafka and William Carlos Williams Such references are used not merely as an artistic and decorative leitmotif but become a critical narrative element and another complex and rich layer to this work The breadth and quality of the references are testimony to the author's clear understanding of the modern law and literature movement This work provides the basis of a medical school course As many medical educators as possible should also be encouraged to read this work for the insights it will give them into using their own personal life narratives and those of their patients to inform their decision making process This thesis will also be of value to the judiciary whose members are often called upon to make normatively difficult judgments about medical care and medical rules The human rights material leads to a hopeful view of an international movement toward a universal synthesis between medical ethics and human rights in all doctor patient relationships *Ethical Dilemmas in Social Service* Frederic G. Reamer, 1990 Reamer discusses the ethical concerns involved in working with individuals and families the design and implementation of social welfare programs and policies community work and relationships with colleagues and employers Medical Benefit and the Human Lottery Duff R. Waring, 2008-01-18 Bioethicists moral philosophers and social policy analysts have long debated about how we should decide who shall be saved with scarce lifesaving resources when not all can be saved It is often claimed that it is fairer to save younger persons and that age is an ethically relevant consideration in such tragic decisions Medical benefit should be maximized and final selection should aim to minimize the contaminating influence of chance These claims are challenged by Duff R Waring in *Medical Benefit and the Human Lottery* one of the few books that attempts a sustained defence of random patient selection This book combines ethics and political philosophy in its novel and strict egalitarian approach to patient selection for

transplantable organs Waring addresses the question of whether we should choose between lives on the basis of fair chances or best outcomes He argues that final selection criteria should be based on fair chances that equalize opportunity as opposed to best outcomes His defence of hardy egalitarianism aims to show that random selection by lottery can affirm both a common humanity and the equal value of lives The notion of patient selection by lottery has not fared well in bioethics and has been regarded by some as a moral affront Waring argues that a human selection lottery may be neither as crude nor as ethically anomalous as some have supposed Indeed it can reflect a familiar conception of equality as a political and moral ideal This conception abstracts from many undeniable differences between patients and claims that scarce resources should be allocated on the principled assumption that each of their lives is equally worth saving The book is also notable for its critiques of some recent utilitarian notions of medical benefit which can have an age biased impact on elderly patients Waring then argues against the leading contemporary age based approaches to patient selection He explores the way random selection by lottery can affirm his egalitarian ethos in cases where eligible transplant candidates have each passed a threshold level of prospective medical benefit that has been set by democratic deliberation Taming chance with a human lottery is defended as the most lucid means of ensuring equal opportunity In so doing Waring argues that we give the principle of equal concern and respect a radical expression above a noncomparative threshold of medical benefit each candidate can have an equal claim to life

Renegotiating Ethics in Literature, Philosophy, and Theory Jane Adamson, Richard Freadman, David Parker, 1998-12-10 Is it possible for postmodernism to offer viable coherent accounts of ethics Or are our social and intellectual worlds too fragmented for any broad consensus about the moral life These issues have emerged as some of the most contentious in literary and philosophical studies In *Renegotiating Ethics in Literature Philosophy and Theory* a distinguished international gathering of philosophers and literary scholars address the reconceptualisations involved in this turn towards ethics An important feature of this has been a renewed interest in the literary text as a focus for the exploration of ethical issues Exponents of this trend include Charles Taylor Bernard Williams Iris Murdoch Cora Diamond Richard Rorty and Martha Nussbaum the latter a contributor and a key figure in this volume This book assesses the significance of this development for ethical and literary theory and attempts to articulate an alternative postmodern account of ethics which does not rely on earlier appeals to universal truths

Genetics and the Law II Milunsky, 2013-11-11 The law is a mandate and a mirror it both commands and reflects It should not come as a shock that scientists and physicians often prefer the mirror at times when society seems to be demanding a mandate This may be especially true in the rapidly advancing field of medical genetics where recent discoveries leading to potentially startling applications have raised old questions of law in a new light Nevertheless we believe that in general the conflict between the law and science as illustrated in the field of genetics is embroiled with exaggeration The Chief Justice of the United States Supreme Court Warren Burger has noted that the prime function of the law is to protect basic human values individual human values sometimes even at the expense of scientific progress and that it is not the function of the law to keep pace with science While both of these statements are true as far as they go we believe the law must make an affirmative effort to anticipate scientific developments so that those beneficial to society can be nurtured rather than stultified It was to nurture cooperation and understanding that we brought together a distinguished faculty of internationally known experts on law and genetics to discuss their fields in 1975

Reflections on Bioethics Jose Antonio Morales-Gonzalez, Eugenia Aguilar Nájera, 2018-06-27 The book Reflections on Bioethics is an effort that brings together works grouped into five sections Bioethics and Health Bioethics and Education Bioethics and Technology Bioethics in the Use of Experimental Animals and Selected Topics of Bioethics In each of these sections the fundamental concepts of bioethics and their relationship with each of these branches of knowledge are covered The purpose is to give the reader a specific document of topics it is not intended to be a treaty because the study of any of the five sections is very broad However this is an effort that manages to combine interdisciplinary subjects that are fundamental for professionals of all fields of knowledge
