My Early Times:

Early Times in Raleigh David Lowry Swain, 1867 *In the Early Times* Tad Friend, 2022-05-10 In this dazzling John Irving memoir acclaimed New Yorker staff writer Tad Friend reflects on the pressures of middle age exploring his relationship with his dying father as he raises two children of his own How often does a memoir build to a stomach churning I can't breathe climax in its final pages Brilliant intensely moving William Finnegan Pulitzer Prize winning author of *Barbarian Days* ONE OF THE BEST BOOKS OF THE YEAR The New Yorker Almost everyone yearns to know their parents more thoroughly before they die to solve some of those lifelong mysteries Maybe just maybe those answers will help you live your own life But life doesn't stop to wait In his fifties New Yorker writer Tad Friend is grappling with being a husband and a father as he tries to grasp who he is as a son Torn between two families he careens between two stages in life On some days he feels vigorous on the brink of greatness when he plays tournament squash On others he feels distinctly weary troubled by his distance from millennial sensibilities or by his own face in the mirror by a grimace that's so like his father's His father an erudite historian and the former president of Swarthmore College has long been gregarious and charming with strangers yet cerebral with his children Tad writes that trying to reach him always felt like ice fishing Yet now Tad's father known to his family as Day seems concerned chiefly with the flavor of ice cream in his bowl and when pushed interested only in reconsidering his view of Franklin Roosevelt Then Tad finds his father's journal a trove of passionate confessions that reveals a man entirely different from the exasperatingly logical father Day was so determined to be It turns out that Tad has been self-destructing in the same way Day has a secret each has kept from everyone even themselves These discoveries make Tad reconsider his own role as a father as a husband and as a son But is it too late for both of them Witty searching and profound *In the Early Times* is an enduring meditation on the shifting tides of memory and the unsteady pillars on which every family rests [The Cambridge History of Southeast Asia: From early times to c. 1800](#) Nicholas Tarling, 1992 The Cambridge

History of Southeast Asia is a multi-authored treatment of the whole of mainland and island Southeast Asia from Burma to Indonesia Unlike other histories of the region it is not divided on a country by country basis and is not structured purely chronologically but rather takes a thematic and regional approach to Southeast Asia's history aiming to present the current state of historical research on Southeast Asia as well as stimulating further thought and investigation Publisher description

The Boy Settlers: A Story of Early Times in Kansas Noah Brooks,2021-12-02 Charles Dickens and the Street Children of London Andrea Warren,2011 Provoked by the horrors he saw every day Charles Dickens novels were originally written as instruments for social change to save his country s children **Pottery and Porcelain, from Early Times Down to the Philadelphia Exhibition of 1876** Charles Wyllys Elliott,1878 What we have attempted has been to gather and present in a way to be easily understood the most important facts respecting Pottery and Porcelain Preface **Evolution of Psychology: From Ancient Times to the Present Day** Mioara Crenganis,2024-11-21 In the pages of this remarkable book we embark on a fascinating journey through the history and evolution of psychology We will uncover the key milestones that shaped this ever evolving science exploring the revolutionary theories and visionary minds that have left an indelible mark on the field With each page we will be drawn into the brilliance of groundbreaking ideas witnessing how the insights of these pioneers have interwoven into a vast legacy of knowledge From Freud and Jung s profound theories to Pavlov and Skinner s groundbreaking experiments and Maslow and Rogers humanistic vision we traverse an intellectual landscape rich in diversity and discovery This journey reveals the intricate complexity of the human mind offering a deeper understanding of behavior emotions and cognition As we walk in the footsteps of those who have transformed our understanding of psychology we will encounter surprising revelations at every turn Prepare to immerse yourself in this fascinating world navigate the waves of knowledge and emerge with a broadened perspective Let your passion for psychology guide you as you uncover the secrets of the human mind From the earliest times in human history spanning back to ancient civilizations there has been an innate curiosity surrounding the enigmatic workings of the human mind It has been a persistent endeavour to comprehend the intricacies of the mind and the multifaceted ways in which it can veer off course Mental illness contrary to popular belief is not a product of modernity it has plagued societies throughout the annals of time Scarcely any society has managed to grapple with mental illness without resorting at least to some extent to the supernatural The delineation between those influenced by abnormal mental processes and those who exhibit similar behaviours due to their purported evil inclinations

has historically proven to be an arduous task Furthermore the ancient practice of confining perilous individuals a contemporary perception of the possessed in custodial settings has been superseded by a modern counterpart Now individuals who transgress societal norms and legislation are incarcerated based on the perception that they are inherently wicked or harbour evil within them This confinement extends even to those afflicted by genuine psychological disorders who find themselves subjected to the same imprisonment as those who have committed malevolent deeds Given the vast expanse of time the history of psychology can undoubtedly be perceived as paralleling the chronicles of humankind Remarkably even in bygone eras primitive attempts were made to elucidate the intricate tapestry of human behaviour This enduring intrigue persisted through the ages gradually evolving into a more sophisticated discipline However it is only in the mid nineteenth century that the transformation of psychology into an empirical science can be discerned Over the course of the last 150 years this scientific field has undergone seismic shifts transcending its initial focus on experimental psychology It has now burgeoned into a multifaceted domain that encompasses not just the intangible realm of the mind and its myriad functions but also entwines with aspects pertaining to the physical biological clinical and social facets of human existence In this book I will take an intriguing journey to explore the fascinating history of psychology This journey will cover centuries from its origins in ancient times to the present day highlighting the significant advancements that have occurred over the past 150 years

In Northern Mists: Arctic Exploration in Early Times (Complete) Fridtjof Nansen, IN the beginning the world appeared to mankind like a fairy tale everything that lay beyond the circle of familiar experience was a shifting cloudland of the fancy a playground for all the fabled beings of mythology but in the farthest distance towards the west and north was the region of darkness and mists where sea land and sky were merged into a congealed mass and at the end of all gaped the immeasurable mouth of the abyss the awful void of space Out of this fairy world in course of time the calm and sober lines of the northern landscape appeared With unspeakable labour the eye of man has forced its way gradually towards the north over mountains and forests and tundra onward through the mists along the vacant shores of the polar sea the vast stillness where so much struggle and suffering so many bitter failures so many proud

victories have vanished without a trace muffled beneath the mantle of snow When our thoughts go back through the ages in a waking dream an endless procession passes before us like a single mighty epic of the human mind s power of devotion to an idea right or wrong a procession of struggling frost covered figures in heavy clothes some erect and powerful others weak and bent so that they can scarcely drag themselves along before the sledges many of them emaciated and dying of hunger cold and scurvy but all looking out before them towards the unknown beyond the sunset where the goal of their struggle is to be found We see a Pytheas intelligent and courageous steering northward from the Pillars of Hercules for the discovery of Britain and Northern Europe we see hardy Vikings with an Ottar a Leif Ericson at their head sailing in undecked boats across the ocean into ice and tempest and clearing the mists from an unseen world we see a Davis a Baffin forcing their way to the north west and opening up new routes while a Hudson unconquered by ice and winter finds a lonely grave on a deserted shore a victim of shabby pilfering We see the bright form of a Parry surpassing all as he forces himself on a Nordenskiöld broad shouldered and confident leading the way to new visions a Toll mysteriously disappearing in the drifting ice We see men driven to despair shooting and eating each other but at the same time we see noble figures like a De Long trying to save their journals from destruction until they sink and die Midway in the procession comes a long file of a hundred and thirty men hauling heavy boats and sledges back to the south but they are falling in their tracks one after another they lie there marking the line of route with their corpses they are Franklin s men
